

11. Map of proposed project: show clearly the proposed point of diversion, place of use, section number, township and range number.

BE IT KNOWN that the undersigned hereby makes application for permit to appropriate the public waters of the State of Idaho as herein set forth.

Frank Galey, Jr.
(Applicant)

RECEIVED

JUL 19 1976

Department of Water Resources

**NOTICE OF APPLICATION
FOR WATER PERMIT**

Notice is hereby given that FRANK GALEY, JR. Boise, ID has on June 25, 1976 submitted Application No. 61-7273 for a permit to appropriate 3000 acre feet per annum of water from Bennett Creek trib. to Snake River by means of a diversion and ditch within the SE $\frac{1}{4}$ SW $\frac{1}{4}$ Sec 1 T4S-R8E B.M., to a dam located in the NW $\frac{1}{4}$ NW $\frac{1}{4}$ Sec 15 T4S-R8E B.M., Elmore County. The water is to be used from Apr. 1 to Oct. 31 for the irrigation of 2600 acres within parts of Sec 22, 23, 26, 27 34 & 35 T4S-R8E and parts of Sec 2 & 3 T5S-R8E. The water is proposed to be diverted to storage from Nov 1 to Apr 15 at a rate of 100 cfs.

If issued, this permit will be subject to all prior water rights. Protests against the granting of the permit must be filed with the Idaho Department of Water Resources, Statehouse, Boise, Idaho, 83720, on or before July 26, 1976.

CHANNEL Capacity MEASUREMENT.

Channel: Abt Springs #2 Diversion Canal

Calculate flow capacity of the concrete gate structure at the Bennett Creek Diversion.

Assume structure opening 5' x 10', gates are not submerged.

$$Q = CLH^{3/2} \quad - \quad (\text{Rect. Weir equation})$$

$$C = 3.33$$

$$L = 10 \text{ Ft}$$

$$H = 5 \text{ Ft MAX.}$$

$$Q = 3.33 (10 \text{ Ft}) (5 \text{ Ft})^{3/2}$$

$$Q = 372.3 \text{ CFS}$$

Estimated max. discharge through gate structure = 372 CFSEstimated max. discharge through canal = 508 CFS
(Per attached Manning Calc.)∴ The gate structure is the capacity limiter.

CONDITIONS OF APPROVAL AND REMARKS

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Use of water under this water right will be regulated by the watermaster of State Water District No. 61C.
6. Permanent measuring devices must be installed in such a manner that the amount of water entering the reservoir and the amount of water released from the reservoir can be measured.

JUL 28 1996

State of Idaho
Department of Water Resources**WATER RIGHT LICENSE**

WATER RIGHT NO. 61-07273

CONDITIONS OF APPROVAL AND REMARKS

7. Rights 61-02236D and 61-07561 are also diverted at the point of diversion described above.
8. Two points of re-diversion are located within NWNE, S03, T05S, R08E.
9. This right when combined with Right 61-02236D is limited to an annual irrigation storage volume of 4880 af.
10. This right is limited to the irrigation of 2600 acres within the place of use described above in a single irrigation season.
11. Water diverted under this right is injected into and rediverted from Hot Springs Creek.
12. The reservoir used to store water under this right is located in Sections 4, 9, 10, 15, and 16 of T4S, R8E, and is locally known as Hot Springs Creek Reservoir No. 2.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code. Witness the seal and signature of the Director, affixed at Boise, this 24TH day of MAY, 1996.

APPLICATION FOR AMENDMENT
(For Licensing Purposes)
WATER RIGHT NO. 61-07273

FOR DEPARTMENT USE ONLY

Preliminary check by _____ Fee = \$ 50⁰⁰ Receipted by MTS # W020374 Date 2-9-96

ACTION OF THE DEPARTMENT OF WATER RESOURCES

I, Karl J. Dreher, of the Department of Water Resources hereby approve the
above Application for Amendment for Permit No. 61-07273 with the following;

CONDITIONS OF APPROVAL AND REMARKS

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Use of water under this water right will be regulated by the watermaster of State Water District No. 61C.
6. Permanent measuring devices must be installed in such a manner that the amount of water entering the reservoir and the amount of water released from the reservoir can be measured.
7. Rights 61-02236D and 61-07561 are also diverted at the point of diversion described above.
8. Two points of re-diversion are located within NWNE, S03, T05S, R08E.
9. This right when combined with Right 61-02236D is limited to an annual irrigation storage volume of 4880 af.
10. This right is limited to the irrigation of 2600 acres within the place of use described above in a single irrigation season.
11. Water diverted under this right is injected into and rediverted from Hot Springs Creek.
12. The reservoir used to store water under this right is located in Sections 4, 9, 10, 15, and 16 of T4S, R8E, and is locally known as Hot Springs Creek Reservoir No. 2.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No 61-7273, and said application is hereby APPROVED.

- 1 Approval of said application is subject to the following limitations and conditions:
 - a SUBJECT TO ALL PRIOR WATER RIGHTS
 - b Proof of construction of works and application of water to beneficial use shall be submitted on or before September 1, 1981.
 - c Other 1. Measuring devices of a type acceptable to the Department of Water Resources shall be installed above and below the reservoir.
2. Use of water under this permit is subject to control by the watermaster of State Water District No. 61-C, Bennett Creek.
3. The storage of water under this permit is subject to the same conditions as under permit no. 61-7244 set forth by the agreement dated February 27, 1976.

Witness my hand this 13 day of September 19 76.

R. Keith Higin
Director

RE: Water Right Nos. 61-07561, 61-02236D, 61-02236C, 61-07244, 61-07273

Dear Mr. Ensley:

The Department of Water Resources (IDWR) is currently preparing water right licenses to be issued on the permits referenced above. The rights are all for reservoir storage and irrigation as developed by Frank S. Galey and/or Carl F. Reynolds and Sons in the Bennett Creek drainage.

During our verification process, it was discovered that water from these projects may have been used to irrigate property you own in the NE¼ of Section 25, Township 4 South, Range 8 East. When the development of a water project does not conform exactly to the authorization on the permit approval, it is necessary to amend the permit to cover the lands actually irrigated before a license is issued. Steve Reynolds has submitted amendment applications that reconfigure the points of diversion and places of use of the rights to conform with actual development. However, the amendment applications do not include your land within the place of use descriptions.

I am writing you to ascertain your interest, if any, in the water rights. If the water was beneficially used on your land and has continued to be used on your land at least once every five years, you may have some entitlement to a portion of some or all of the water rights.

Please contact me within fourteen days if you wish to explore your options in this matter. You may reach me at 208-327-7946. If I do not hear from you within fourteen days, the amendments will be processed and the licenses will be prepared without your property in the legal place of use for the water rights.

Respectfully,

Shelley Walter Keen
Water Rights Supervisor

MEMORANDUM

TO: Files 61-02236C/02236D/07244/07273/07561
Carl F. Reynolds and Sons

FROM: Brenda Chapman *BC*

DATE: March 6, 1996

RE: Ownership Information

=====

Per 2/15/96 telephone conversation with a representative from the Elmore County Assessor's Office, Mr. Ed Ensley is the owner of the NE $\frac{1}{4}$ of Section 25, Township 4S, Range 8E. Therefore, the recommended number of acres to be licensed under the above storage water rights will be reduced to 3,585.

Re: Applications for Amendment

Department of Water Resources

On this date the Place of Use land list on the Applications for Amendment for the Permits described above were changed by myself and Steve Reynolds. The alteration deleted the NE1/4, Sec 25, 04S, 08E from the Place of Use. This parcel is not owned by Reynolds & Sons Partnership but by a Mr & Mrs Ensley. It has however been included in their farm's operation for many years. Due to the non-ownership issue they do not want their water rights to become appurtenant to this land.

The history of the Ensley property as understood and explained by Steve Reynolds is as follows: The prior owner, Frank Galey, by virtue of some kind of lease arrangement, included this land in his farming operation in the late 1970's or early 1980's. He supposedly raised potatoes on the land for one year using his own water but didn't continue irrigating the land in future years due to a lack of water. The Reynolds family began leasing Mr Galey's farm in 1986 and purchased it in 1989. In 1987 a large part of the Galey farm, including the Ensley parcel, was entered into the CRP program. The Reynolds family, at the request of Mr Ensley, planted the Ensley property with a dry land cover crop to meet the CRP requirements but never irrigated the land.

The ownership of the Ensley parcel was not known when the licensing amendments were prepared. This issue was subsequently discovered and rather than re-print the amendment applications they were altered at the time they were executed by Steve Reynolds on 2/9/1996.

RE: WATER RIGHT NOS. 61-07244 & 61-07273

Dear Mr. Reynolds,

I am writing to you about Water Right Permits Nos. 61-07244 and 61-07273, which were originally issued to Travelers Insurance Group. The permits are being reviewed for licensing. Before water right licenses can be issued, however, the permits must be amended to depict the water rights as they have actually been developed. I have sent Application for Amendment forms to the permit holders of record, but I have been unable to locate them. Because our field examiner indicated that you may now own the property on which the water developments occurred, I am writing to give you the opportunity to complete the process necessary to obtain the water right licenses.

Previously we sent you a "copy" of the Applications for Amendment for water right nos. 61-07244 and 61-07273 in the event we did not receive a response from Traveler's Ins. Group. I am now enclosing a copy for you to sign and return to the Department if you wish to pursue the licenses. The enclosed Applications for Amendment contain information that will be included on the licenses when they are issued. The amendments reflect a change in the location of the point(s) of diversion and the place(s) of use description. The last page of the Application for Amendment forms contain a list of CONDITIONS and REMARKS proposed for the licenses when they are issued. These conditions and remarks may be modified upon further administrative review.

Please review the amendment forms carefully. If you concur with the information presented, sign the forms and return them with the \$100.00 (\$50.00 each) filing fee as soon as possible.

JUN 28 1996

In order for the department to issue the water right licenses in your name, the permit holders of record must assign the permits to you. I have enclosed Assignment of Permit forms to help you obtain the required information and signatures. If you do not obtain assignments from Traveler's Ins. the department may still issue licenses if you submit the necessary Applications for Amendment and fees. Once the licenses are issued, the water rights become appurtenant to the land, regardless of the name listed on the documents.

If you have any questions about this information, please contact me at (208) 327-7946 in Boise.

Sincerely,

Shelley Walter Keen
Water Rights Supervisor

RE: WATER RIGHT NOS. 61-07244 and 61-07273

Dear Water Right Holder(s):

The above referenced water rights are in the process of being licensed. However, before licenses can be issued, your permits must be amended to depict your water rights as they have actually been developed.

The enclosed Applications for Amendment contain information that will be included on the licenses when they are issued. The amendment for 61-07244 reflects a change in the location of the point(s) of diversion and the place(s) of use description. The amendment for 61-07273 reflects a change in the location of the place(s) of use description. Please review carefully and if you concur, sign the amendments and return with the \$100.00 (\$50.00 each) filing fee within 14 days.

The last page of the Application for Amendment forms contain a list of CONDITIONS/REMARKS proposed for the licenses when they are issued. These conditions/remarks may be modified upon further administrative review.

If you do not concur, or if you have any questions about this information, please contact me as soon as possible. My telephone number is (208) 327-7946.

MEMORANDUM

TO: Files 61-02236C/02236D/07244/07273/07561
Frank Galey, Jr and Travelers Insurance
SRBA claims filed by Carl F. Reynolds and Sons

FROM: Brenda Chapman

DATE: January 3, 1996

RE: Recommendation Adjustment(s)

=====

Per the December 28th meeting with Jim Johnson, Shelley Keen, and I, the final licensing recommendations for the above rights are based on the following information:

* Ownership Change: Mr. Galey is deceased and according to the exams and the SRBA claims filed, the new owners are Carl Reynolds and Sons. Two of the permits (61-7244 and 61-07273) are owned by Mr. Galey's lienholder, The Travelers Insurance Company and the licenses will be issued in their names. Those licenses in Mr. Galey's name will be sent in care of the new owners, Carl Reynolds and Sons. Claims have been filed by the new owner on four of the five rights. A claim is not required for 61-07561.

* A statement on the application for Permit 61-02236 mentions the feeder channel from Bennett Creek has a capacity of 20 cfs. However, the permit as approved without an active flow component. Per the 6/21/78 Administrative Memorandum guidelines for off stream storage, a rate of 20 cfs can be included in the recommendations. This will not constitute an expansion of the permit.

* Hot Springs Creek will not be added as one of the sources for 61-02236D/07273/07561/07244. It would change the original intent of the permit holder to divert water into storage reservoirs that happen to be on another stream.

* The above rights divert water to a combined total of 3,725 acres. All of the water can be diverted to the entire place of use; therefore, all of the acres will be recommended on all of the licenses. According to Idaho Code § 42-222, as long as other water right holders are not injured, the number of acres irrigated from stored water can be increased.

* The point of injection from Bennett Creek into Hot Springs Creek Reservoir has been added to 61-02236D, 61-07273 and 61-07561. The same points of redirection have been added to all of the rights.

RE: GALEY PERMIT No.s 61-7561, 61-2236A, 61-7273 & 61-7244
AND FIELD EXAMS

=====

I originally reviewed the above permits over a year ago in connection with Swan Falls processing. In particular, I was reviewing the permits to determine development prior to July of 1985 and whether the permits were subject to reprocessing under Section 42-203D, I.C.

My review raised several questions about the field exams. These questions were sent to the field examiner, Sherl Chapman, and the present owner (see correspondence in file). After more than a year, I think I have obtained the information I needed. It appears that all of the development represented by these permits and exams was completed prior to July of 1985. The permits therefore are not subject to reprocessing requirements of Section 42-203D. The department can continue reviewing the exams and proceed with licensing. Please note that we have obtained some additional information concerning the exams. This information is outlined below.

Field Exam Report Information/Clarification:

1) Name/Ownership change:

- The permits and farm operation are now owned by Carl Reynolds. Frank S. Galey died at least several years ago. I have not previously discussed or advised Reynolds as to what we might require to reflect the ownership change.

2) Place of use:

- My review of the exams revealed that some land was included as the irrigated place of use on the exam but recent aerial photos did not show that land as irrigated. Also, the examiner's maps did not include this land. It appeared that this land may have had an incorrect legal description. My letter of June 17, 1991 describes the land in question (see specific descriptions for land within sections 19, 30, & 27, T4S, R8E). The present owner, Carl Reynolds, called me on July 15, 1991 and explained that the land in question has not been developed and is not irrigated. Reynolds verified that the land in question should not be included on the field exam or any forthcoming license.

JUL 28 1996

3) Points of Diversion/storage volume for permit no. 61-2236A:

- Permit no. 61-2236A is the only permit which includes Hot Springs Creek as a source of water (this permit also includes Bennet Creek as a source). Only this permit should include Hot Springs Creek Reservoir No. 1 as a point of diversion and storage facility. This reservoir is actually identified as Hall reservoir in the department's dam safety records. The difference in names between the dam records and Sherl Chapman's field exam report probably accounts for why Sherl did not report a volume for this reservoir. The dam safety records reports a volume of 450 AF for this reservoir. John Westra, who regularly inspects this dam, says that this reservoir rarely fills and that Hot Springs Creek is generally a very low yield stream. However, John also told me that this capacity is essentially correct and has suggested that this capacity should be licensed.

I have also noted that this reservoir is also included on license no. 61-2225. Under this license, the reservoir has a capacity of only 164.7 AF. The place of use under this license overlaps the place of use of the Galey permits. Perhaps permit no. 61-2236A should only include the additional capacity above that licensed for 61-2225.

4) Rates of Diversion/Storage Volume:

- Two of the remaining four reservoirs are located directly on Bennet Creek. Permit no. 61-7244 and accompanying field exam includes these two reservoirs (Upper and Lower Teapot Reservoirs). The field exam storage volume for permit 61-7244 is based on the combined capacity of the two reservoirs. Both John Westra and Mike Stubblefield have reported to me that these capacities are accurate and should approximately reflect current storage capacities.

The other two reservoirs on the system, Hot Springs reservoir 2 and 3, store water from both Bennet and Hot Springs Creek. A ditch diverts water from Bennet Creek to Hot Springs Reservoir with a headgate on Bennet Creek located in the SESW sec. 1, T4S, R8E. The combined capacity of the two reservoirs per dam safety records is 5443 AF. A report found in the dam safety files (see attached), indicates that the canal from Bennet Creek has a discharge capacity of 900 cfs. To check this latter figure, John Westra collected data on the ditch this summer and calculated a flow capacity of the ditch using the Manning's Equation. The capacity of the ditch using Manning's is 508 cfs. (see attached calculations and photos submitted by John Westra).

Recommendations:

Permit no. 61-7244 should be licensed for irrigation storage and irrigation of 1238 AF from the Upper and Lower Teapot Reservoirs.

Permit no. 61-2236A should be split, with one license issued for irrigation storage of 450 AF from Hot Springs Creek in Hot Springs Creek Reservoir no. 1, and the second license issued for irrigation storage of 2433 AF from Hot Springs Creek and Bennet Creek in Hot Springs Reservoir no. 2. The second license may include a

diversion to storage from Bennett Creek up to the permitted rate of 500 cfs.

Permit 61-7273 should be licensed for irrigation storage and irrigation of 3000 AF from Bennett Creek in Hot Springs Reservoir no. 2, and diversion to storage from Bennett Creek of 100 cfs.

Permit no. 61-7561 should be licensed for irrigation storage and irrigation of 553 AF in Hot Springs Reservoir no.3, with diversion to storage of 50 cfs from Bennet Creek. Permit no.s 61-2236A, 61-7273 and 61-7561 should be conditioned so that the maximum combined rate of diversion from Bennet Creek under the three rights does not exceed 500 cfs.

Place of use recommendations:

When I last spoke with the present owner, Carl Reynolds, we discussed his system and the operation of his different pumping plants. Reynolds explained that several of the plants are interconnected and that the lower most plants (stations no. 5, 6 & 7), have been used to pump water back up to higher ground and used on land normally irrigated via pumps 1 through 4. Since water from all of the reservoirs can be used on all of the irrigated acreage, the licensed place of use for all of the permits should be consistent. Other than the acreage described in this memo which the present owner confirmed was not irrigated, all of the remaining acreage recommended for licensing in the exam report should be licensed.

RECEIVED
JUN 8 1968

File Nos: 61-7273; 61-7561

CHANNEL Capacity MEASUREMENT.

Channel: Abt Springs #2 Diversion Canal

Calculate flow capacity of the concrete gate structure at the Bennett Creek Diversion.

Assume structure opening 5' x 10', gates are not submerged.

$$Q = C L H^{3/2} \quad - \quad (\text{Rect Weir equation})$$

$$C = 3.33$$

$$L = 10 \text{ Ft}$$

$$H = 5 \text{ Ft MAX.}$$

$$Q = 3.33 (10 \text{ Ft}) (5 \text{ Ft})^{3/2}$$

$$Q = 372.3 \text{ CFS}$$

$$\text{Estimated max. discharge through gate structure} = \underline{\underline{372 \text{ CFS}}}$$

$$\text{Estimated max. discharge through canal} = 508 \text{ CFS}$$

(Per attached Manning Calc.)

∴ The gate structure is the capacity limiter.

IV. EVALUATION

A. Structural and Geotechnical

The dam appears to be stable and well maintained; the inspection did not reveal evidence of slope movement, cracking, or instability. However, limited soils tests indicated Zone I materials may be slightly more permeable than Zone II material which may cause an elevated phreatic surface under prolonged storage. An elevated phreatic surface could lead to embankment failure if sufficiently advanced.

The limited soil data available in Appendix III is inadequate to provide data for theoretical slope stability computations. Previous inspections have not noted cracking or other stability problems in the embankment.

The dam is located in Seismic Zone 2 and the area does not have a history of seismic activity. A seismic stability analysis is not required by State guidelines and does not appear warranted at this site.

B. 100-Year Flood

Calculated discharge for the 100-year flood event on Hot Springs Creek to the Hall Dam above Hot Springs No. 2 Dam is 707 cfs. The Hall Dam outlet and combined spillway capacity is apparently adequate to accommodate this discharge. The discharge for the 100-year flood event calculated at Hot Springs No. 2 Dam is 880 cfs from Hot Springs Creek. In addition to water supplied to Hot Springs No. 2 Reservoir from Hot Springs Creek, a diversion works on Bennett Creek supplies water through a feeder canal which empties into the reservoir. A low gravel bar separates the main channel of Bennett Creek from the diversion canal. This bar is located just upstream from the canal headgate and forms the right abutment for the headgate. Under flood stress loss of control is likely. The gravel bar would overtop and wash out, rendering the headgate useless and releasing large discharges of water down the canal into Hot Springs No. 2 Reservoir. Low areas of the canal embankment downstream from the diversion works would add greatly to the failure potential of the diversion works by allowing water from Bennett Creek to enter the canal. See Photographs 15-25 in Appendix II. The canal discharge capacity is 900 cfs. This volume of water could flow down the canal until it reached the twin culverts that convey water under the county road in Sec. 10, T4S, R8E. The culverts

Total number of acres irrigated

281996

ACTION REQUIRED

FROM: Tim

TO: File

DAVID Reynolds called 7-15-91 in response to my letter of 6-17-1991. The acreage in question on my letter is not & has not been irrigated under any of the baby permits or system.

The acreage should be omitted from the field exams.

Hot Springs Reservoir on field exam is actually Hall Reservoir - data is in Dam Safety Records. Pull data & write up memo for File. & Route & Submit.

Also, Reynolds said several ^{pumping} plants are interconnected, and low-level pumping plants on system in Tropic Reservoir have been used on higher ground in northern Farm unit. $\therefore$ All sts. should share common P/V

RE: Permit No.s 61-2236A, 61-7273, 61-7244 & 61-7561

Dear Mr. Reynolds:

Pursuant to our discussion from several days ago concerning the above permits and my past correspondence with Sherl Chapman, I am forwarding you a copy of the letter which I sent to Sherl in April of 1990.

Question no. three of my letter asked for some information about specific tracts of land and whether those tracts were irrigated prior to July of 1985. I have attempted to answer this question on my own. This question was asked because the permits were being reviewed in connection with potential processing under the Swan Falls settlement. Permits with development prior to July of 1985 are exempt from Swan Falls processing requirements. Nearly all of the development shown on Sherl's field exams appears to have been in place prior to 1985. Certain tracts however were not irrigated as per my review of 1984 aerial photos. As I reviewed Sherl's exams and the aerial photos, I was concerned that perhaps a mistake was made in describing the location of several tracts. The tracts which I did not find irrigated and are of question are as follows:

T4S, R8E, Section 19: SW1/4, SENW, & W1/2SE, containing 200 acres
Section 30: W1/2, containing 280 acres
Section 27: W1/2, containing 50 acres

If you consult a map, you will notice that sections 19 and 30 of T4S, R8E are located some two to three miles west of Bennett Creek and your lower reservoirs. Most of the irrigated land under the permits and shown on Sherl's exams are east of Bennett Creek and the reservoirs. I wondered if perhaps these tracts should have been located in Township 4 South, Range 9 East, instead of Range 8 east. One of the maps submitted with Sherl's exams does appear to show that the land is located in Range 9 East instead of Range 8 East.

In either case, I did not find any irrigated acreage in sections 19 or 30 in the 1984 photos, but perhaps the acreage was in place

JUN 28 1996

at the time of Sherl's field exam in 1987. This may also be the case with the 50 acres in section 27. However, the aerial photos submitted with Sherl's exams (photos undated) do not show the lands in sections 19, 30 (either R8E or R9E) and 27 as irrigated.

Before we can continue with licensing the permits, I will need to clarify the questions concerning the acreage identified in this letter. Please clarify if and when this land has been irrigated under your system and if so, verify the correct legal description of the lands in sections 19 and 30.

Please also consider the other questions raised in my April, 1990 letter. As we discussed, you may not wish or need to include the Hot Springs Creek Reservoir no. 1 in any of the permits being considered for licensing. In regard to the question about rate of diversion from Bennett Creek, I think we probably have enough information in the dam safety records concerning the design of the diversion ditch which will allow us to license the permits and show a diversion to storage.

Please provide a response to this inquiry at your earliest convenience. You may contact me directly at 327-7864 if you have questions concerning this matter.

Sincerely,

Tim Luke

Re: License Exams for Permit No.s 61-2336A, 61-7244, 61-7273 &
61-7561 in name of Frank S. Galey

Dear Sherl:

I have been reviewing the above exams for licensing and have developed several questions and concerns which are outlined below.

1) On all four of the exams, you recommend listing reservoir no.s one through five as points of diversions. The Department will most likely not list the five reservoirs as point of diversions on the four licenses. Reservoir no. 1 can only be included on permit no. 61-2336A since this is the only permit which lists Hot Springs Ck. as a source. It appears that any storage held in reservoir no. 1 is water from Hot Springs Ck. None of the four field exams you submitted includes any volume measurement for reservoir no. 1.

If you or your client intend to have reservoir no. 1 included on a license for permit 61-2336A, you must submit a volume measurement for this reservoir.

2) Two of the permits above, 61-7273 & 61-7561 include flow rates for diversion to storage. Your field exams include no measurements for diversion from Bennett Ck. to the diversion ditch which provides inflow to Hot Springs Reservoirs 2 & 3. You also did not include the diversion ditch headgate as a point of diversion.

The Department will have to include a rate of diversion for the ditch from Bennett Ck and requests that you provide diversion flow data or measurements for this purpose. If data is unavailable, we may have to rely on past dam inspection records.

3. My final concern regards whether certain acreage under permit no.s 61-7273 & 61-7561 was irrigated prior to July 1, 1985. According to the Department's 1984 remote sensing data, acreage in the following sections was not irrigated at that time:

Section 19 T4S R8E

Sections 2 & 3 T5S R8E

If there is no evidence that the acreage listed in the exam for the above sections was not developed prior to July of 1985,

JUN 28 1990

then water diverted for that acreage will be considered trust water, and the acres will count toward the 20,000 acre annual trust water depletion limit as per section 42-203C, Idaho Code. Trust conditions will be added to any license issued for the permits and the Department may be required to re-advertise those permits as well.

The Department therefore asks that you provide information as to whether or not the acreage in the above sections were irrigated prior to July 1, 1985. If the lands were irrigated prior to July of 1985, please provide some documentation which may confirm dates of first development.

Your earliest response to the above questions and concerns will help expedite the licensing of these permits. Please do not hesitate to call me directly or visit if you have questions concerning this matter.

Sincerely,

A handwritten signature in cursive script, appearing to read "Tim Luke".

D. FLOW MEASUREMENTS

☐ Additional Data Sheets Attached

1

Measurement Equipment	Type	Make	Model No.	Serial No.	Size	Calib. Date
N/A						

2 Measurements:

Hot Springs Reservoir no. 2 provides water for these lands. Reservoir capacity is 4880 acre feet.

E. FLOW CALCULATIONS

☐ Additional Computation Sheets Attached

1. Measured Method

2. Alternate Method for Checking Purposes.

F. PUMP EFFICIENCY DATA (Optional)

Discharge Pressure. _____ psi x 2.31 = _____ ft (1), Dynamic pumping level _____ ft (2)

Total Head (1) + (2) = _____ (3) ; Flow rate. _____ cfs (4)

Water HP (3) x (4) ÷ 8.8 = _____ (5)

Meter Input KW: 3.6 x _____ KH x _____ CTR or _____ MULT x _____ PTR x _____ N/ _____ T = _____ (6)

Meter Input HP (6) x 1.34 = _____ (7)

Panel Input KW: _____ Ave PF x _____ Ave Volts x _____ Ave Amps x .001732 = _____ (6)

Panel Input HP: (6) x 1.34 = _____ (7) Efficiency. (5)/(7) x 100 = _____ %

G. VOLUME CALCULATIONS

1 Volume Calculations for Irrigation:

$V_{IR} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 2600 \times 4.5 = 11,700 \text{ ac ft}$

$V_{DR} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 =$ _____

$V = \text{Smaller of } V_{IR} \text{ and } V_{DR} = 11,700 \text{ ac ft}$

2 Volume Calculations for Other Uses

RECEIVED

JUN 28 1996

H. REMARKS AND OVERLAP REVIEW ANALYSIS

The measuring devices required by the permit have not been completely installed as of yet. The remaining measuring devices are under design and will be installed in 1988.

I. RECOMMENDATIONS

1. Recommended Amounts

Beneficial Use	Period of Use		Rate of Diversion Q (cfs)	Annual Volume V (afa)
	From	To		
Irrigation	3-15	11-15		4880

Totals:

4880

2. Recommended Amendments

- ☐ Change P.D. as reflected above
- ☐ Add P.D. as reflected above
- ☒ Change P.U. as reflected above
- ☐ Add P.U. as reflected above
- ☐ None

Re: Water Permit ~~61-7273~~ *61-7244*
Our Loan No. 400253 1
GALEY, Frank S., Jr.

Department of Water Resources

Gentlemen:

We are in receipt of your letter of December 10, 1981 regarding Permit No. 61-7273 which we have forwarded to our borrower.

In the future we ask that you please forward all notices to our borrower, Frank S. Galey, P.O. Box 5305, Boise, Idaho 83705, as he is the property owner. Copies of the notices should be sent to The Travelers Indemnity Company, Real Estate Investment Dept., 707 S.W. ~~Washington Street, Portland, Oregon 97205.~~ *Boise*

Note

If you have any questions in this regard, please let us know.

Best wishes for a Happy Holiday Season.

Very truly yours,

THE TRAVELERS INDEMNITY COMPANY

CERTIFIED MAIL

EXAMINATION FEE NOTICE

Dear Permit Holder:

Department records show that proof of beneficial use has been submitted for the above-referenced permit, but that a field examination has not yet been conducted to determine the extent of beneficial use of the water for licensing purposes.

House Bill 671 (effective April 4, 1986) enacted by the 1986 Idaho Legislature requires the payment of a fee before this department can conduct the field examination needed to issue a license confirming use of water under the permit. This letter is notification that the license examination fee is due within sixty (60) days of the date of this letter. The examination fee information sheet (enclosed) must be returned with the fee.

As an alternative to submitting the fee, the department will accept a field examination report completed by a certified water right examiner from the private sector. If you choose to have the examination done by a certified water right examiner, you need not submit the license examination fee to the department, but you must within sixty (60) days of the date of this letter return to the department, the examination fee information set showing appropriate information together with a statement from the certified examiner to verify that you have retained a certified examiner to conduct the field examination. If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot later change your decision to use this alternative and submit the fee needed for the department to conduct the field examination; but you may change to another certified examiner.

Don,

These two notices were forwarded to Portland on the July 28 1986. They are water rights. Portland seems to be ignoring them. Is there some way to get them to forward them to us? It is important to not neglect our water rights.

If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot later change your decision to use this alternative and submit the fee needed for the department to conduct the field examination, but you may change to another certified examiner.

page 2

Examination Fee Notice

Certified water right examiners are licensed engineers, geologists, or land surveyors certified by the department to conduct water right examinations. The procedure for certifying examiners results from the recently enacted HB 671 and is available from the department upon request. A listing of certified water-right examiners is also available.

If your permitted use, in fact, has already been examined by the department and you have not asked to have the examination repeated, the fee requirement is not applicable to your permit. If you believe this is the case, please contact the department.

The license examination fee is to be based on the amount of water you indicate you have developed, as listed in item 6 on the examination fee information sheet. The amount of water on which the examination fee is based can be less than the permitted amount, if less water has been diverted and beneficially used. The licensed amount of water, however, will not exceed the amount you claim on the examination fee information sheet. The license examination fee schedule, on the back of the enclosed information sheet, shows a listing of applicable fees.

FAILURE TO SUBMIT WITHIN THE SIXTY (60) DAY PERIOD, THE FEE OR THE STATEMENT THAT A CERTIFIED EXAMINER HAS BEEN RETAINED TO MAKE THE FIELD EXAMINATION, WILL BE CAUSE TO ADVANCE THE PRIORITY OF THE PERMIT ONE DAY FOR EACH DAY THAT THE FEE SUBMITTAL IS LATE.

FAILURE TO SUBMIT THE FEE OR THE COMPLETED FIELD EXAMINATION REPORT WITHIN A YEAR WILL BE CAUSE TO CONSIDER THE PROOF OF BENEFICIAL USE TO BE INCOMPLETE AND TO LAPSE THE PERMIT.

The attached examination fee information sheet and the fee may be returned to this office. If you have questions or concerns please feel free to call at (208) 334-2190, or to visit the office at our new location near the airport, at 2735 Airport Way.

Sincerely,

DAVID R. TUTHILL, JR., P. E.

RE: 61-7273

Dear Sirs:

We acknowledge receipt of your statement submitted as proof as beneficial use for the above referenced permit.

Before a license can be issued, a field examination must be made by a representative of this Department.

☐ A field examination of your system has been scheduled for

_____.

If this time and date is not convenient for you, please contact this office as soon as possible.

☐ A field examiner will contact you to arrange to examine your system.

If you have any questions regarding the field examination, please contact this office.

Sincerely,

Judy Pense

DEAR PERMIT HOLDER:

ONE OF THE CONDITIONS OF APPROVAL OF YOUR WATER PERMIT NO. 61-7273 WAS THAT EVIDENCE OF THE EXTENT OF DEVELOPMENT MUST BE SUBMITTED TO THIS OFFICE ON OR BEFORE SEPTEMBER 01, 1981. (SEE LAST PAGE OF YOUR APPROVED PERMIT). ENCLOSED IS A POST CARD WHICH MAY BE USED TO SUBMIT THE REQUIRED PROOF OF BENEFICIAL USE.

IF YOU HAVE NOT FULLY COMPLETED YOUR PROJECT, AND YOU HAVE NOT PREVIOUSLY RECEIVED AN EXTENSION OF TIME, YOU MAY REQUEST AN EXTENSION OF TIME PROVIDED THE DELAY IS FOR REASONABLE CAUSE AS INDICATED IN SECTION 42-204, IDAHO CODE, AMENDED. IF YOU HAVE BEEN PREVENTED FROM PROCEEDING BY A GOVERNMENTAL AGENCY OR BY LITIGATION, MORE THAN ONE EXTENSION OF TIME CAN BE GRANTED. A REQUEST FOR EXTENSION OF TIME FORM IS ENCLOSED FOR YOUR CONVENIENCE. PLEASE NOTE THAT A FEE OF \$15.00 MUST BE SUBMITTED WITH THIS FORM.

EITHER THE BENEFICIAL USE POST CARD OR A REQUEST FOR AN EXTENSION OF TIME MUST BE RECEIVED BY THIS DEPARTMENT ON OR BEFORE THE ABOVE MENTIONED DATE. OTHERWISE, THE PERMIT WILL LAPSE AND BE OF NO FURTHER FORCE OR EFFECT WITHIN 60 DAYS.

SINCERELY,

RITA FLECK

Dear Mr. Galey:

Enclosed is a copy of your approved Application for Permit No. 61-7273. We direct your attention to the conditions of approval as listed on the fourth page.

Be sure to note that a special condition requiring you to install and maintain a measuring device at your point of diversion has been placed upon your permit. We are enclosing a letter describing different types of measuring devices accepted by this office.

Sincerely,

BOBBY D. FLEENOR
Chief, Water Rights

Gentlemen:

Re: Application No. 61-7273
Frank Galey, Jr.

I write in reference to the Protest which I filed in behalf of Anchor Ranches, Inc., to the above application. I sent a copy of the Protest to Mr. Galey.

Mr. Galey has now furnished me with a copy of the application for permit which he filed and which states specifically that the agreement which was reached in connection with Application 61-7244, filed by Joe A. Lamb, will apply to Mr. Galey's Application No. 61-7273. An executed copy of this agreement was filed with your office.

With the understanding that Permit No. 61-7273 will be issued subject to the terms and conditions of the above-mentioned agreement we agree to withdraw the protest which was filed in behalf of Double Anchor Ranches. Unless other protests were filed, it will therefore be unnecessary to hold the conference or hearing set for Wednesday, August 18, 1976.

I am sending a copy of this letter to Mr. Galey.

Very truly yours,

Perce Hall

BEFORE THE DIRECTOR OF THE DEPARTMENT OF WATER RESOURCES
OF THE
STATE OF IDAHO

IN THE MATTER OF PROTEST AGAINST APPROVAL)
OF THE APPLICATION FOR PERMIT NO. 61-7273)
IN THE NAME OF FRANK GALEY, JR.)
_____)

NOTICE OF CONFERENCE
AND/OR HEARING

On June 25, 1976, Frank Galey, Jr. filed with the Department of Water Resources an application to appropriate the public waters of the State of Idaho. On July 26, 1976, the Department received a protest against approval of said application from Perce Hall, Attorney on behalf of Double Anchor Ranches, Inc.

The Department has set the matter of protest for conference and/or hearing for Wednesday, August 18, 1976 at 10:00 a.m., in the juryroom of the Elmore County Courthouse, Mountain Home, Idaho. Any hearing will be held in accordance with the Rules and Regulations of the Idaho Code and adopted Rules of Practice and Procedure of the Department of Water Resources. Opportunity shall be afforded all parties to respond and present evidence and argument on all issues involved.

Any party may request in writing five (5) days before any hearing that the oral proceedings thereof be taken in the form of stenographic notes. Any party may have such stenographic notes of the oral proceedings, or part thereof, transcribed at his own expense. A taped record of the proceedings will be maintained for the appeal period.

Failure to appear at the time and place set for hearing by the applicant or protestant may allow the Department without prejudice to dismiss the protest or the application. Any and all cost incurred by reason of such non-appearance may be assessed against such non-appearing parties.

Dated this 5th day of August, 1976.

L. GLEN SAXTON, P.E.

Western Regional Supervisor

RE: Application for Permit No. 61-7273

Frank Galey, Jr.
P. O. Box 5305
Boise, ID 83705

Dear Mr. Galey:

Enclosed is a copy of a protest filed against the issuance of a permit pursuant to your Application No. 61-7273. You should be aware that the following are the principle items we can consider at a conference and/or hearing in either approving or denying an application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purposes intended?=-
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?

A permit issued by this office is subject to all prior water rights and does not in any way convey or establish a right-of-way over private or governmental lands. Any right-of-way or easement must be obtained by the applicant through action outside of the water right proceedings.

You will be notified at a later date as to the time and place set for a conference and/or hearing to discuss the matters of protest.

If we may be of any assistance, please contact us.

Sincerely,

L. GLEN SAXTON, P.E.
Western Regional Supervisor

PROTESTANT.)

*

*

*

COMES NOW Double Anchor Ranches, Inc., an Idaho corporation,
and protests and objects to the above-designated Application
No. 61-7273 and objects to the granting of said application and
to the issuance of a water permit thereunder, for reasons as
follows:

I

For more than fifty years prior hereto Double Anchor
Ranches, Inc., and its predecessors in interest, and
other water users, have appropriated and put to
beneficial use all of the water produced by Bennett
Creek, a tributary of Snake River, and have appropriated
and put to beneficial use the flood waters of said creek
during the spring runoff season, for the purposes of
watering livestock and for the purpose of irrigating
real property owned by the protestant.

II

By reason of the appropriation and continuous use of said waters, the protestant has become and is now the owner of and has a prior right to the use of all of said waters of Bennett Creek and that the use of said waters for the purpose proposed by the applicant will deprive protestant of its right to the use of said water.

III

The name and address of protestant is as follows:

Double Anchor Ranches, Inc.
c/o Goldie Henley
P. O. Box 160
Glenns Ferry, Idaho 83623

WHEREFORE, protestant respectfully requests that said application be denied.

DOUBLE ANCHOR RANCHES, INC.,
a corporation

Goldie E. Henley
Its President

July 27, 1976

Re: Application for Permit No. 61-7273 - Frank Galay, Jr.

Double Anchor Ranches, Inc.
c/o Goldie Henley
P. O. Box 160
Glenns Ferry, ID 83623

Gentlemen:

This office acknowledges receipt of your protest to issuance of a permit pursuant to the above referenced application. The following are the principle items we can consider at a conference and/or hearing in either approving or denying an application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing existing water rights?
2. Is the proposed water supply insufficient for the purposes intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?

The Department may reject an application and refuse issuance of a permit, partially approve the permit, approve the permit for a quantity of water less than applied for, or approve the permit subject to special conditions.

A permit issued by this office is subject to all prior water rights and does not in any way convey or establish a right-of-way over private or governmental lands. Any right-of-way or easement must be obtained by the individuals concerned through action outside of the water right proceedings.

You will be notified at a later date as to the time and place set for conference and/or hearing to discuss the matters of protest. If we may be of further assistance, please contact us.

Sincerely,

L. GLEN SAXTON, P.E.
Western Regional Supervisor

Gentlemen:

Enclosed you will find a legal notice which we wish to have published once a week for two consecutive weekly issues of your newspaper. We have inserted the publication dates allowing ample time for you to submit us a galley proof for review before publication.

After sending us a galley proof, proceed with the publication on the dates we have inserted, assuming the notice is correct. If we have any corrections, we will notify you before the first publication. If you cannot publish the notice on the proposed dates, please contact us immediately.

An affidavit of publication must be submitted to the Department along with the publication bill. In order to receive payment, the following certification must appear in the bill:

"I hereby certify that the foregoing account is just and correct, that the amount claimed is legally due, after allowing all just credits, and that no part of the same has been paid."

Sincerely,

(Signature of Claimant)
