7. Right No. 61-07060 is limited to the irrigation of 320 acres in the place of use described above in a single irrigation season.
8. Right No. 61-07222 is limited to the irrigation of 160 acres in the place of use described above in a single irrigation season.
9. The total diversion rate under Right Nos. 61-02186/02220/07060/07222 shall not exceed 16.0 cfs.
10. The total number of acres irrigated under these rights in each and every irrigation season shall not exceed 800 acres.
11. On or before June 10 of every year in which the 800 acres to be irrigated are different from those identified in the previous year, the water right holder shall specify for the Department of Water Resources the particular 800 acres that will be irrigated during the current irrigation season. Failure to submit such certification, or irrigation in excess of the 800 acres specified, shall be cause for voiding of the transfer.
12. The transfer shall be retained under the jurisdiction of the Director for as long as the place of use exceeds 800 acres.

If approved, this permit authorizes the construction or modification of a well subject to the following conditions. READ CAREFULLY!

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from the above approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
3. This permit does not constitute an approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well. All wells must be drilled a minimum distance of 100 feet from a drain field. Domestic and Public Water Supply wells must be drilled a minimum distance of 50 feet and 100 feet respectively from a septic tank.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Approval of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
7. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
8. If a bottom hole temperature of 85° or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.
9. If this permit is for a replacement well, the well being replaced must be abandoned in accordance with Department Rules and Regulations

RE: Application for Transfer No. T-3031

Dear Sherl:

This office is currently reviewing the above-referenced Application for Transfer. We note three concerns for which additional documentation and follow-up is required.

First, as you are aware, this Department has the responsibility to insure that the proposed change "does not constitute an enlargement in use of the original rights". Therefore, we are always extremely concerned about an Application for Transfer that shows 800 acres as a place of use before the change and a total of 921 acres as a place of use after the change.

I have carefully reviewed "Attachment A" to the application, which indicates, in part, that "irrigation in excess of 800 acres is grounds for possible forfeiture of that portion of the water right being used in excess". This indicates that the applicant is aware of the limitation of the water right to 800 acres. However, this does not indicate an acceptance of the principle that only 800 acres can be irrigated in any given year under these water rights.

As a means of insuring that enlargement of the place of use does not occur should the transfer be approved, the Department must be advised on an annual basis regarding the acres to be irrigated, and those to remain unirrigated. This information would be verified on occasion by the Department, using U-2 photos. Some possible conditions of approval for the transfer are as follows:

1. The total diversion rate from water rights 61-7222, 61-7060, 61-2220 and 61-2186 shall not exceed 16.0 cfs.
2. The total number of acres irrigated under these water rights in each and every irrigation season shall not exceed 800 acres.

3. On or before June 10 of every year in which the 800 acres to be irrigated are different from those identified in the previous year, the water right holder shall specify for the Department of Water Resources the particular 800 acres that will be irrigated by these four water rights combined, during the current irrigation season. Failure to submit such certification, or irrigation in excess of the 800 acres specified, shall be cause for voiding of the transfer.

4. The transfer shall be retained under the jurisdiction of the Director for as long as the total place of use for the water rights exceeds 800 acres.

Please note that these conditions are neither totally inclusive nor final, but they do represent the type of restriction contemplated for the proposed transfer.

The second concern regarding the proposed transfer relates to License No. 61-2186. As shown on the enclosed copy, the place of use of this licensed water right is included in the place of use of License No. 61-7222. Generally when one water right is transferred from a place of use, all water rights should be transferred at the same time. Note that in the sample conditions of approval above, we have included License No. 61-2186. Would you please provide either justification for not including this right, or a statement signed by the applicant which allows the water right to be transferred with the others? Unless sufficient justification is received, the statement is required from the applicant prior to further action being taken by the Department. Because re-advertisement is mandatory, a fee of \$20.00 is required if License No. 61-2186 is to be added to the transfer.

The third concern relates to the determination that a total of "approximately 30 acres of land will be and has been permanently retired from irrigation". In reviewing proposed modifications to the original land list, it appears that the applicant desires to receive credit for portions of acreages that are now under roadways. What the applicant is indicating in the proposed transfer is that the lands that are now under roadways, the lands in the rock pile and waste areas, and the lands in the homestead and shop areas were in fact at one time irrigated, and now are to be unirrigated. If this is the case, then the proposed transfer need not be modified in this regard. If this is not the case, and if only a portion of the 30 acres was at one time irrigated, the amount of land from which irrigation has been removed needs to be identified. One would expect that not all of the 30 acres were originally irrigated since some of the farm roads and the homestead have existed since prior to 1978, as shown on the USGS map of the area.

RE: Permit No. 61-7222

Broken Arrow Farms Inc.
849 Sherman Way
Nampa, ID 83651

Dear Sir:

Enclosed is an amended application for licensing amendment of Permit No. 61-7222. On February 24, 1982, the Department sent you a letter and an amendment of permit form which contained information that identified the extent that your permit could be licensed. The letter explained that the amendment of permit was needed in order to correspond with the findings of the field examiner. You complied and we received the signed amendment and the \$20.00 filing fee on March 23, 1982.

A further review of existing water rights already issued to you found that License No. 61-2220 and License 61-7060 overlapped a portion of the land covered by Permit No. 61-7222, and they used the same well identified in Permit No. 61-7222. The two licenses were issued at a rate of diversion of 0.02 cfs per acre which is the maximum rate that can be issued per acre; therefore, the overlapping lands covered under Permit No. 61-7222 should be removed from this permit before it is licensed.

You will find that the amended application for licensing amendment of Permit No. 61-7222 contains only the lands not already overlapped by the existing licenses. The 160 acres in the SE $\frac{1}{4}$, Section 6, Twp. 5S, Rge. 6E will be licensed at 0.02 cfs per acre which when combined with your other rights will allow a diversion of 0.02 cfs per acre on all the lands covered by your water rights. Since you have already paid the \$20.00 filing fee for the first amendment you are not required to pay again for the amended application. Just sign the amendment form and return it to the Department within ten (10) days if you concur with our findings.

Nampa, ID 83651

Gentlemen:

A representative of this Department made an examination of the works covered by your Permit No. 61-7222 and has found the following:

Amount of water that can be recognized as beneficially used under
Idaho law: 5.00 cfs Source: groundwater

The maximum quantity diverted shall not exceed 2429.8 acre feet
per year.

Point of diversion: NE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 6, Twp. 5S, Rge. 6E, Elmore County

Beneficial use: Irrigation of 800 acres within the S $\frac{1}{2}$, Sec. 6; NE $\frac{1}{4}$, Sec. 7;
N $\frac{1}{2}$, Sec. 8; Twp. 5S, Rge. 6E

Priority date established: April 14, 1975

In order for the Department to issue the above license, it will be necessary for you to amend the permit to correspond with the findings of the field examiner. We are enclosing a partially completed amendment form for your use in this matter.

Please sign the amendment application and return it to this office along with a \$20.00 filing fee within 30 days in order that we might issue your license as set forth above. If you do not concur with these findings or have any questions, please contact us within the 30-day period.

Nampa, Idaho 83651

Gentlemen:

One of the conditions of approval of your water Permit No. 61-7222 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before October 1, 1976. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Gentlemen:

Enclosed is a copy of your approved Application for Permit No. 61-7222. We direct your attention to the conditions of approval as listed on the fourth page.

Be sure to note that a special condition requiring you to install and maintain a measuring device at your point of diversion has been placed upon your permit. We are enclosing a letter describing different types of measuring devices accepted by this office.

Sincerely,

BOBBY D. FLEENOR

Re: Application for Water Permit No. 61-7222, Broken Arrow Farms, Inc.

Gentlemen:

Enclosed you will find a legal notice which we wish to have published once a week for two consecutive weekly issues of your newspaper. We have inserted the publication dates allowing ample time for you to submit us a galley proof for review before publication.

After sending us a galley proof, proceed with the publication on the dates we have inserted, assuming the notice is correct. If we have any corrections, we will notify you before the first publication. If you cannot publish the notice on the proposed dates, please contact us immediately.

An affidavit of publication must be submitted to the Department along with the publication bill. In order to receive payment, the following certification must appear in the bill:

"I hereby certify that the foregoing account is just and correct, that the amount claimed is legally due, after allowing all just credits, and that no part of the same has been paid."

(Signature of Claimant)

Sincerely,

Dear Mr. Blanksma:

We are returning your application for permit and fee check in the amount of \$10.00. The application form is correctly filled out, however, the fee amount is incorrect.

Application fees are based on the amount of water to be diverted. The fee for a 5 c.f.s. diversion is \$65.00.

Please return your application with this appropriate fee and we will then be able to continue processing.

Sincerely,
