CLAIM TO A WATER RIGHT

Department of Water Resources

Under the provisions of Section 42-225a, Idaho Code, a person may file a claim to a right to use water which has been established by diversion and application to beneficial use. The filing of this claim does not confirm the water right but will serve for information purposes only. It may, however, become the basis for future adjudication of the water right by the Court

Notice is hereby given that DOUBLE ANCHOR RANCHES, INC., a corporation,
(name of claimant)
of P.O. Box 160, Glens Ferry, Idaho, claims a right to the diversion and beneficial use of
(mailing address) 83623
the public water of the State of Idaho

The extent and nature of said claim is as follows:

- (1) Describe source of water. (name of stream, lake, spring, etc , or ground water) Flood Waters from Cold Springs Creek, tributary to, Snake River
- (2) Describe the purpose for which the water has been used and the time during the year when you have used the right claimed

Amount 10 cfs Use Irrigation Period of Use. From 2/1 To 5/1
Amount _____ Use _____ Period of Use: From _____ To _____
Amount _____ Use _____ Period of Use: From _____ To _____
(cfs, gpm or a/f) (dom., irri., stock, etc.) (both dates inclusive)

- (3) Total quantity of water claimed 10 cfs cubic feet per second, or _____ acre feet per annum, and/or _____ gallons per minute.
- (4) Priority claimed: (the date water was first applied to beneficial use) May 10, 1971

A claim is not acceptable on a ground-water source with a priority later than March 25, 1963 or on a surface-water source with a priority later than May 20, 1971. An exception to this rule is that a claim may be filed on domestic use from a ground-water source

- (5) A) Point of diversion: (give location of point where water is diverted from its source)
SE ¼ SE ¼, Sec. 16 Twp 4 S Rge 9 E B. M. County of Elmore
Additional points of diversion: _____

B) Describe means of diversion of water. (pump and pipeline, well, diversion dam, reservoir, length of ditch and field, etc.) Give sizes and capacities; be as specific as possible. An earth dam is located in the creek, with cement headgate, and the water is conveyed from the dam through one main ditch to the place of use.

- (6) A) Describe location of use by listing number of irrigated acres within each 40-acre tract in appropriate box If use is not for irrigation, place an "X" in appropriate box to show location

ELSIE MAE RIGGS, being first duly sworn, deposes and
says:

That she is a citizen of the United States of America, of
the age of forty-nine years; that she is a daughter of John
H. Henley and Goldie E. Henley, husband and wife, who owned
the real property hereinafter described for more than forty
years before it was conveyed by them to Double Anchor Ranches,
Inc., an Idaho corporation formed by them, which corporation
still owns and uses said real property in connection with its
farming and ranching operations; that affiant and her husband
Lynn Riggs are now the owners and principal stockholders of
Double Anchor Ranches, Inc.

From the time she was a small child, affiant assisted her
father in the farming and ranching operations, including the
irrigation of meadow land and crop land; that each spring
during the runoff period commencing approximately February 1
of each year, they always used whatever water runoff or flood
water was available from Cold Springs Creek, a tributary of
Snake River, to flood the real property located in the County
of Elmore, State of Idaho, and described as follows:

The Northwest Quarter of the Southeast Quarter, the
Southwest Quarter of the Southeast Quarter and the
Southeast Quarter of the Southeast Quarter of
Section Twenty-eight; the Southeast Quarter of the

Southeast Quarter of Section Twenty-nine; the Southeast Quarter of the Southwest Quarter, the Northeast Quarter of the Northwest Quarter and all of the East Half of Section Thirty-two; the Northwest Quarter, the North Half of the Southwest Quarter and the West Half of the Northeast Quarter of Section Thirty-three, all in Township Four South, Range Nine East, Boise Meridian.

Unless the underground water aquifer and subsurface strata was recharged by the application of flooding or runoff water during the spring, it was impossible to grow a crop, either of wild hay or other crop, using only the water constituting the normal flow of cold springs creek after the irrigation season started on or about April 1 of each year. Without the use of the runoff or flood waters to first recharge the underground strata, the water from the normal flow of the creek would sink into the ground as fast as it was applied, making it impossible to cover the land with such water from the normal flow, which water constituted their adjudicated rights.

Because of this situation, the use of flood water or runoff to recharge the underground strata in early spring prior to the normal irrigation season is absolutely necessary to the production of any crops on the land during the summer months.
