RE: Permit No. 25827

Mr. R. D. Long
P. O. Box 171
Filer, Idaho

Dear Mr. Long:

In regard to your letter of August 10, 1957, in which you state that the point of diversion was erroneously given in filing the application for permit.

You also state that your works are completed as to pipe line, ditches and pump. Providing you have this work completed as described in the permit, you can make completion of works proof on form #6 enclosed herewith which will keep your permit in good standing.

Relative to the change in point of diversion, that is your location which is the place you take the water from the creek. Providing you have changed the location or wish to change the location of the point of diversion, you can use the amendment enclosed, for making such change. Sign and return to this department and that will straighten out your diversion problem.

We are also enclosing a form for extension of time for beneficial use. We wish you would also give your reasons why you are unable to put to beneficial use the water within the required time as stated in the permit. This form should be signed before a notary and returned to this department, which will give you an extension of time for putting your water to beneficial use.

We are explaining all of this for the reason you have been misinformed by someone telling you that you had to file a new application. You will note that the enclosed form is partly filled out.

Very truly yours,
