Gentlemen:

This office has received the assignments of permit submitted in connection with the above referenced permit and licenses.

The assignment for Permit No. 61-2236 has been recorded, however, we wish to advise you that the Department has no procedure for changing the records of ownership once a permit has been licensed. When a license is issued, it becomes appurtenant to the land and ownership is automatically conveyed with the land unless it is specifically withheld in the sales transaction.

We will place the executed assignments in our files for future reference as to present ownership under Licenses 61-2092 and 61-2225.

We also acknowledge receipt of the proof affidavit submitted for Permit No. 61-2236. Before a license can be issued, it will be necessary for a field examination to be made by a representative of the Department. We cannot tell just when this examination will be made, but our examiner will try to contact you at the time the exam is conducted so that you may show him the system.

Should you have questions regarding the above matters, please feel free to contact us.

Dear Mrs. Hall:

This acknowledges the depositions of Holder and two Witnesses, and the affidavit of publication in the Mountain Home News in proof of beneficial use under Permit No. 22786.

Before a permit can be licensed, the law requires that a field examination be made by an engineer from this department. At this time we cannot say just when this will be made but our field engineer will contact you prior to the time he is to make the inspection so that you can arrange for someone to accompany him.

Very truly yours,

Bennett Creek.

Ques. 5. Describe your works of diversion, and state amount of water they are capable of conveying from point of diversion to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use. If a well, state depth of well, depth and size of casing and depth to water. If pump is used, state discharge of pump and tell how it was measured or determined. If sprinkler irrigation, give number and size of nozzles and operating pressure.

Ans. Earth diversion dam, 8' high, 50' top and 25' bottom. I have installed 260" capacity pump to lift out of channel into my private ditch, 6' bottom, 8' top, 2' deep.
Also an earth dam 5' high, 10' at top and 15' bottom. This is to divert water from
the channel of Warm Springs Creek into my ditch. They are capable of conveying 6 second
feet. This is a private canal and all the points of diversion and all the land to be

conducting the water to the places of use.

Ques. 6. State for what purpose water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have actually been irrigated with said water.) it irrigates Lot 2, 35 acres, Lot 3, 40 acres and Lot 4, 30 acres. This is in Section 3.
Total irrigation of 245 acres. As a result of this irrigation I have made an improvement
here and spent on this approximately \$5,000.00. There is no natural meadow land here. All
this land had to be cultivated and developed and all the water here has been applied for
beneficial use as a direct result of this agricultural improvement.

22786

Ques. 7. If for other than irrigation purposes; state how applied, amount of horse power generated, etc.

Ans. Irrigation only.

Ques. 8. What is the minimum amount of water required for the purpose specified above?

Ans. I need at least 1" to the acre here. As a matter of fact this is early season water and to have a good head and irrigate I actually need more than this.

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. I am the same person who applied for this originally.

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. I started to work on this just as soon as my desert entry was allowed in March, 1953 and work has been continuous until the fall of 1957, and all the water has been diverted on this land during the irrigation season of 1957. I put water on this in 1955, and 1956 also.

Ques. 11. State when, how, in what amount and to what extent waters other than those diverted under the above mentioned permit have been diverted and applied to beneficial use upon the lands herein described. Give full particulars regarding such other appropriations and rights claimed thereunder.

Ans. There is no other water under any permit diverted on this land, except the one applied for here.

Dear Sir:-

Under the terms of your permit No. 22786 you are required to complete your diversion works on or before March 12, 1958. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

Dear Sir:

With regard to the above water permit, please be advised that this was applied for in connection with my desert entry, Idaho Serial #02910 which was not allowed in the Land Office until March 12, 1953.

I hereby respectfully request that an extension of time be granted allowing five years from the date of allowance or until March 12, 1958.

INSTRUCTIONS
PROOF OF COMPLETION OF WORKS

Boise, Idaho

Ruby Hall
Glenns Ferry, Idaho

Dear Sir:-

Under the terms of your permit No. 22786 you are required to complete your diversion works on or before May 23, 1957. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

MARK R. KULP

State Reclamation Engineer
