Subject: MISC INFO

57-07457 is a license for the same system for irrigation use. At the time of the exam, the concrete pond existed but fish propagation had not been developed. Domestic use existed but had not been included as a use on the application for 57-07457. The spring flow was measured at .33 cfs. 57-07457 was licensed at .22 cfs for 11 acres.

The applicant only uses the spring for internal domestic use in the winter when opaline irrigation is not running. Otherwise the applicant hauls water in barrels from a neighbor's well. Fish propagation is for personal consumption only, not for profit. The pond can fill in less than 24 hours. No other water rights are used (per 4/22/96 telecon with applicant).

CONDITIONS OF APPROVAL AND REMARKS

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount that can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 4.5 afa per acre for the lands above.

E. NARRATIVE/REMARKS/COMMENTS

A 300' buried drain trench collects spring water, which then flows through a 4" PVC pipe. The spring water is open discharged onto a 1 acre hillside and drains into a .1 af pond. From the pond, the spring water is pumped with a 5 HP booster into a buried mainline to a 10 acre field. Total irrigation, counting the 1 acre hillside, was planimetered at 11 acres. To explain the high spring flow, the owner thought that the spring area was actually an emerging underground streambed, fed by Opaline Tropic Dist water, since the flow in the spring seemed dependent and directly related to canal flows. The clay loam soil with high alkali content makes irrigation difficult. The 10 acres are irrigated with handline sprinklers. The 1 acre hillside is flood irrigated. Fish propagation was not a developed use. Opaline Tropic Dist water can also be used on the 10 acre field. No other uses are used.

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 57-07627

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit.

Enclosed is an order reinstating your permit since proof was submitted after the proof due date of June 1, 1997. Please note that the priority date has been advanced to April 18, 1996.

Section 42-248, Idaho Code, which became affective on July 1, 1996, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Please contact any office of the department for the proper form to file a change of ownership of a water right and/or a change in the address of the owner. Failure to maintain current records with the department could result in the assessment of a monetary penalty.

The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water. If you have questions concerning the field examination, contact the **WESTERN** Regional Office in Boise at (208)334-2190.

Sincerely,

JULIE L. YARBROUGH

PROOF DUE NOTICE

RE: PERMIT NO. 57-07627

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before June 1, 1997.

(See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

JULIE L. YARBROUGH
Senior Secretary

RE: PERMIT NO. 57-07627

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. Please be sure to thoroughly review the "Conditions of Approval and Remarks" listing on the permit.

Enclosed is a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a licensed water right. Also enclosed is a form entitled "Proof of Beneficial Use". If your project is already completed, you should complete and submit this form immediately.

Please be advised that water quality is subject to regulations of the Idaho Department of Health and Welfare. We suggest that you check with them before starting construction.
