1. Proof of construction of works and application of water to beneficial use shall be submitted on or before **September 1, 1992**.
2. Subject to all prior water rights.
3. Use of water under this permit is subject to control by the watermaster of State Water District No. 57J.
4. Permit holder shall commence the excavation or construction of diverting works within one year of the date this permit is issued and shall proceed diligently until the project is complete.
5. Permanent measuring devices must be installed in such a manner that the amount of water entering the reservoir and the amount of water released from the reservoir can be measured.
6. The storage of water under this permit is contingent upon the certification of the dam and authorization of storage per the dam safety provisions of the Idaho Code.

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
APPLICATION FOR PERMIT

To appropriate the public waters of the State of Idaho

1. Name of applicant Lunayo Ranch Limited Partnership Phone 343-8880
Post office address 1087 River St, Ste 230, Boise, ID 83702
2. Source of water supply Macks Creek which is a tributary of Reynolds Creek
3. Location of point of diversion is NE $\frac{1}{4}$ of SE $\frac{1}{4}$ of SW $\frac{1}{4}$, Govt Lot —
Sec. 13 Township 25 Range 4W B.M. Owyhee County; additional
points of diversion if any. —
4. Water will be used for the following purposes:
Amount 250 for stor. for irrigation purposes from 11-15 to 3-15 (both dates inclusive)
(acre-feet per annum)
Amount 250 for irr. from stor. purposes from 3-15 to 11-15 (both dates inclusive)
(acre-feet per annum)
Amount — for — purposes from — to — (both dates inclusive)
(cfs or acre-feet per annum)
Amount — for — purposes from — to — (both dates inclusive)
(cfs or acre-feet per annum)
5. Total quantity to be appropriated is (a) — cubic feet per second and/or (b) 250 acre feet per annum
6. Proposed diverting works:
a. Description of ditches, flumes, pumps, headgates, etc Converted ARS concrete
weir into a dam, ditches
—
—
b. Height of storage dam 19 feet; active reservoir capacity 250 acre-feet, total
reservoir capacity 250 acre-feet, period of year when water will be diverted to storage:
11-15 to 3-15 inclusive
c. Proposed well diameter is — inches; proposed depth of well is — feet
d. Is ground water with a temperature of greater than 90°F being sought? —
7. Time required for the completion of the works and application of the water to the proposed beneficial use is
5 years (minimum 1 year).

MICROFILMED

RE: License No. 57-7525 - Issuance of License

Dear Water Right Holder(s):

The Department of Water Resources has issued the enclosed Water Right License confirming that a water right has been established in accordance with your permit. Please be sure to thoroughly review the conditions of approval and remarks listed on your license.

The license is a PRELIMINARY ORDER issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action by the Department unless a party petitions for reconsideration or files an exception and/or brief within fourteen (14) days of the service date as described in the enclosed information sheet.

Enclosed is a copy of the approved Application for Amendment.

Please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the Department or visit the Department's homepage on the Internet to obtain the proper forms and instructions.

If you have any questions, please contact me at 208-327-7946.

Sincerely,

for Shelley W. Keen

Water Rights Supervisor

**Kari Lynn Townsend
Secretary**

MICROFILMED

SEP 24 2004

**EXPLANATORY INFORMATION
TO ACCOMPANY A
PRELIMINARY ORDER**

The accompanying order or approved document is a "Preliminary Order" issued by the department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department of Water Resources (department) unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the department or the Idaho Water Resource Board (Board) is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the department and who has not previously been *afforded an opportunity for a hearing on the matter* may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303)

MICROFILMED

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- I. A hearing was held,
- II. The final agency action was taken,
- III. The party seeking review of the order resides, or
- IV. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

Re: Water Right Permit Nos. 57-07472, 57-07454, 57-07525, and 57-07583

Dear Ms. Walker:

Pursuant to your letter dated June 13, 2002, I have enclosed the following.

1. Signed Application for Amendment Water Right No. 57-07583 dated June 26, 2002, and accompanying \$50.00 filing fee;
2. Signed Application for Amendment Water Right No. 57-07454 dated June 26, 2002, and accompanying \$50.00 filing fee; and
3. Signed Application for Amendment Water Right No. 57-07525 dated June 26, 2002, and accompanying \$50.00 filing fee.

Also enclosed is a check for the proof of beneficial use filing fee for permit no. 57-07472 payable to the Idaho Department of Water Resources in the amount of fifty dollars (\$50.00) (206-5-990)

I appreciate your efforts in getting these water rights finalized.

Very truly yours,

Owen H. Orndorff

RE: Water Right Permit Nos. 57-07400, 57-07472, 57-07532, 57-07454, 57-07525, and 57-07583

Gentlemen:

The Department of Water Resources is reviewing the above referenced permits prior to issuing water right licenses. By issuing the licenses, the Department confirms that a water right has been established in compliance with the terms of the permits. We have a request to expedite the issuance of these licenses by the Snake River Basin Adjudication (SRBA) staff so your prompt attention to this matter would be greatly appreciated.

The examiner who verified your water use reported that some of the points of diversion and places of use are in a location other than what was described on the permits. Therefore, before licenses can be issued, some of these permits must be amended to depict the water rights as they were actually developed. I have identified the changes, for each permit that must be acted upon, below for your convenience.

Permit 57-07472: I found that we have never received the proof of beneficial use filing fee that should have been submitted with the proof. Could you please check your records for a check that may have been written to the Department on March 5, 1991 in the amount of \$50.00. We received the proof statement on March 6, 1991 and one of our staff acknowledged that the proof had been received but I could find no evidence of the fee being received by the Department. If you have some record of the fee being paid, such as a copy of our receipt or your check, we would be glad to update our file. If you have no records of the fee, we will require the \$50.00 filing fee be submitted prior to licensing the permit.

Permit 57-07454: This permit was issued with the point of diversion and places of use different than what the examiner found during her field visit. We have also issued an "Order Changing Condition Requiring Measuring Device", based on the field examiner's findings and on the request you submitted on October 4, 1988. Enclosed is a copy of the order for your information.

MICROFILMED

JUN 13 2002

Permit 57-07525: Our examiner found that the place of use is located different than what was permitted. She recommended adding the lands in Sec. 24 that she found irrigated under this permit.

Permit 57-07583: Our examiner found that we should add the lands in SWNE, Sec. 13, to this permit.

Enclosed are licensing amendments for permits 57-07525, 57-07454, and 57-07583. These amendment applications depict the water use and other information, as they will appear on the licenses when issued. Please review the amendment forms carefully. If you concur with the information presented, please **sign the forms and return them with a \$50.00 filing fee, per amendment form, within 14 days**, from the date of this letter.

The remaining permits, **57-07400, 57-07532 and 57-07472** do not require amendments to be licensed. Enclosed, for your review and information, are copies of the draft licenses I have prepared for these permits. Please note that I have prepared the draft license on Permit 57-07472 based on your submittal of the proof of beneficial use filing fee or documentation to show that the proof fee was submitted in March of 1991.

If you have any questions in regard to the licensing amendments, or the draft licenses, please do not hesitate to contact me at 327-7944.

Sincerely,

KAY WALKER

MEMORANDUM

June 26, 1998

TO: Junayo Ranch Files (see below)
FROM: Cindy Hodges *chl*
RE: Field Exam and Review Information

The following storage permits are all located at the Junayo Ranch on Reynolds Creek. They represent storage in four different reservoirs and should be reviewed for licensing together:

57-07400 Tyson Reservoir (Reynolds Creek Reservoir)
57-07472 Junayo #3 (Reynolds South Reservoir)
57-07532
57-07525 Macks Creek Reservoir (at old ARS gaging site)
57-07583
57-07454 Upper Macks Creek Reservoir (Junayo #2)
57-07473

For the most part, all stored flows are supplemental to decreed Reynolds Creek or Macks Creek natural flow rights, although there are a few acres developed under permits 57-07400 and 57-07583 which do not have any other appurtenant rights. As much as possible I have matched recommended acres with SRBA acres.

Areas of influence under the reservoirs may be separated into three distinct irrigation systems (my descriptions):

1. Reynolds East- Lands east of Reynolds creek, served by the Tyson and Junayo #3 reservoirs.
2. Reynolds West- Lands west of Reynolds Creek and below (east of) Macks Creek Reservoir, including areas situated both north and south of Macks Creek channel; served by Macks Creek reservoir.
3. Macks Creek- Lands above (west of) Macks Creek Reservoir, along Macks Creek both north and south of the channel; served by Upper Macks Creek reservoir.

Rough notes, overlap reviews, and original maps depicting the entire project may be found in 57-07400.

Application 57-07610 filed by Junayo Ranches is protested and still at the Region. Its place of use overlaps the Macks Creek irrigation system and is meant to legitimatize an exchange of flows which is found to be going on there (stored flows in Macks Creek reservoir for natural Macks Creek flows above the reservoir). Its approval would not alter or implicate any of my recommendations. In fact, it has occurred to me that the new exchange legislation may be a better vehicle to show the actual water use than a new appropriation. I will be following up on that idea with Gary S.

E. NARRATIVE/REMARKS/COMMENTS

aka Macks Creek Dam - Total capacity 469 AF. 250 AF developed under this permit, dam raised under 57-7583, and some acres added under the later permit.

All irrigation is gravity flow from on-stream reservoir.

~~lands~~ Flows are supplemental on all lands to

Reynolds Creek Decreed rights 57-00248, 1074 & 1068

All irrigated area under this right is west of Reynolds Creek and South of Macks Creek, below reservoir.

Two ~~at~~ outlets from Reservoir - one is low ditch which serves northern portion of acres and 2nd is a higher pipe which travels to South end of property.

During times of water shortage in Macks Creek there is a measuring device above the reservoir (see 57-7454) which may be used to measure flows for bypass through reservoir. A portable weir is also installed in the lower Macks Creek channel to measure the released flows to Reynolds Creek. This arrangement was approved by Reynolds Creek Watermaster.

Have conditions of permit approval been met? ☒ yes ☐ no

MEMORANDUM

DATE: March 3, 1997
TO: File No. 57-07525
FROM: Cindy Zimmerman
THRU: Shelley Keen *SK*
RE: Database Correction

During a routine database search, it was discovered that the water use identified on the place of use screen was incorrectly included stockwater storage. Stockwater storage was not a water use identified on the application.

Today I corrected the database to eliminate stockwater storage and to reflect the original water uses, irrigation storage and irrigation from storage, on the place of use screen.

RE: PERMIT NO. 57-07525

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

Please be advised that Section 42-248, Idaho Code, which became affective on July 1, 1996, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Please contact any office of the department for the proper form to file a change of ownership of a water right and/or a change in the address of the owner. Failure to maintain current records with the department could result in the assessment of a monetary penalty.

If you have questions concerning the field examination, contact the WESTERN Regional Office in Boise, at (208)334-2190.

Sincerely,

JULIE L. YARBROUGH
Senior Secretary

PROOF DUE NOTICE

RE: PERMIT NO. 57-07525

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before September 1, 1996. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

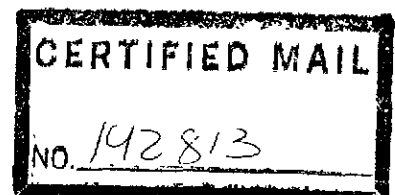

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

JULIE L. YARBROUGH
Senior Secretary

RE: Permit No. 57-07525

Dear Permit Holder:

Enclosed is a copy of the approved request for extension of time. The time within which to submit proof of beneficial use is extended to **September 1, 1996**. Please note that the department has granted this extension based on **due diligence**. It is important that you work diligently toward the completion of this project during the construction period allowed since the department **will not** be able to grant additional extensions based on due diligence.

If you have any questions or if I can be of any assistance, please feel free to contact me at (208)327-7900.

Sincerely,

JULIE L. YARBROUGH

Re: Extension for Permit No. 57-07525

Dear Ms. Yarbrough.

Enclosed is an extension form. Essentially everything has been done but water will not flow through the top ditch to approximately 40 acres until the ditch is lower one to two feet.

I anticipate everything will be working by next spring.

Very truly yours,

Owen H. Orndorff

MEMORANDUM

TO: File No. 57-7525

FROM: TIM LUKE

DATE: December 14, 1993

RE: Measuring Device Requirements

=====

Mike Stubblefield had asked Water Allocations to review Mr. Meyers correspondence of December 2, 1993 regarding the need for measuring devices for the Macks Creek reservoir authorized by permit no. 57-7525. Mr. Meyers' letter had posed some specific questions regarding water right deliveries and watermaster functions in the Reynolds Creek Water District.

In response to Meyers' letter, I contacted Connie Brandeau, District 57-R watermaster, on December 7, 1993. Ms. Brandeau claims that flows in the Macks Creek drainage are critical to delivery of downstream irrigation rights on Reynolds Creek. She stated that even though flows in Macks Creek are very low during periods of regulation, she believes that Macks Creek is always tributary to Reynolds Creek and that such tributary flow during periods of regulation include return flows from irrigation in the Macks drainage. When asked, Brandeau said that Reynolds Creek does not at any point or time become segregated between the lower reach and the confluence of Macks Creek and that there would not be any grounds for futile calls. Ms. Brandeau stated that she presently does not regulate diversions on Macks Creek because there are no measuring devices but indicated that she does intend to make some regular visits and will regulate flows on Macks Creek when the new reservoir is completed and measuring devices installed.

Ms. Brandeau also stated that the Water District members felt very strongly about measuring device requirements on all storage reservoirs and that a resolution to that effect had been adopted at the 1993 Annual Water District Meeting. Review of the minutes of the meeting and Adopted Budget for 1993 does confirm that the users adopted a resolution whereby the District was to prepare a letter to IDWR asking IDWR not to waive the measuring device requirements for permit 57-7525, and urging "that measuring devices be placed above and below all reservoirs so water masters are clear on water diversions for those (reservoirs) according to their rights." Although this resolution was adopted, the letter was never received by the Department.

Following the discussion with Ms. Brandeau and review of the water rights and dam safety files etc., Mike Stubblefield and I decided to conduct a meeting with Mr. Meyers to discuss the items raised in his letter. This meeting was held on December 9, 1993. Mr.

JUL 19 1995

Meyers was informed of my discussion with the watermaster. We informed Meyers that the objective of the measuring devices was to provide for some means to measure and bypass the natural flow of Macks and Cottle Creeks through the new reservoir and downstream to Reynolds Creek so that senior rights would not be injured. Mike confirmed with Meyers that the reservoir does back up the channel of Cottle Creek and that as a result, a measuring device would also be needed to measure inflow on Cottle Creek. I informed Meyers that some type of temporary devices would be acceptable whereby the devices could be installed and removed each year to avoid wash outs and siltation etc. We also suggested that recorders would not be necessary and that the watermaster would only be visiting the sites on perhaps a weekly basis or as often as needed. The devices would be used by the watermaster only to guarantee that the inflows are being bypassed through the reservoir. We also indicated that separate storage diversions from the reservoir may not require measuring devices as long as this water is not comingled with other natural flow rights and/or the reservoir inflow/natural flow which needs to be bypassed below the reservoir in Macks Creek.

At Mr. Meyers' request, a complete listing of all water rights on Macks, Cottle and Reynolds Creeks as been forwarded to Meyers' office.

Re: Macks Creek

Dear Mike:

This refers to your letter of November 29, 1993. We need some more definition from you or John Westra regarding the flow measuring procedure for Macks Creek.

- 1) We can measure the water released from the reservoir through the two outlet pipes - one 8" and one 12" by use of Parshall flumes or equivalent devices, but these are not planned to include recording gages. How then does the water master function? Does he (or she) visit each gage periodically and record the reading?
- 2) What is the function of the gages on Macks Creek and Cottle Creek above the Macks Creek dam? These will not be recording types either, so how often will they be read and of what use are the readings? Both streams are intermittent; are they critical in meeting any downstream prior rights out of Reynolds Creek? Are there filings on Macks Creek or Cottle Creek?
- 3) The two outlets from the dam have a combined discharge capacity at full head of about 33 cfs and this is the total controllable outflow. Inflows above this rate can only fill the reservoir and then spill. Where does this scenario fit into the overall management plan for the Reynolds Creek basin? As far as we see flood flows are of no particular interest in water right administration.

Re: Permit No. 57-07525

Dear Mr. Orndorff:

The Department is in receipt of your request to remove the measuring device condition on the above referenced permit.

The water that flows in and out of your reservoir is from Macks Creek which is tributary to Reynolds Creek. Use of water from Reynolds Creek and its tributaries is subject to control by the watermaster of State Water District No. 57J. In order for the watermaster to measure and/or regulate the flow, measuring devices must be installed in such a manner that the amount of water entering the reservoir and the amount of water being released from the reservoir can be measured.

Therefore, the Department is denying your request to remove this condition. The measuring devices must be in place prior to the field examination.

In the mean time, if you have any questions or if I can be of any further assistance, please feel free to contact the Department.

Sincerely,

Karen L. Gustafson
Secretary/Records Manager

PROOF DUE NOTICE

RE: PERMIT NO. 57-07525

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before September 1, 1992. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

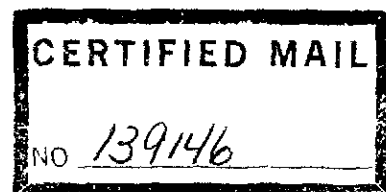

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 57-07525

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

If the diversion dam is 10 feet or more in height, or has an impounding capacity of 50 acre-feet or more, certain dam safety requirements must be met. Please contact the regional office nearest you for details.

Please note the requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.

ADDITIONAL INFORMATION

OverviewOutside SF area - Dave Hollingshead is aware of this filing

Plu 57-07473 Mack's Cr, recent permit for off-stream storage with old upstream from proposed project in application. Appears that similar permit is intended for 8 of same acres in appl (S13 SENE 3 ac, NESE 2 ac, NWSE 3 ac).

57-00249, 02296, 02325, 01073, 09400, are Reynolds Cr. rights for some of same acres as in application.

NOTE: Application numbers 57-00248 & 57-01074. Query in WRS on 5/17/90 showed no W.R. # found. Query in AJS showed 57-00248 & 57-01074 as Reynolds Cr. rights.

MEMO

TO : FILE 57-07525

FROM : STEVE LESTER

DATE : 5/24/90

SUBJECT : ALLOWABLE ACRE FEET OF STORAGE

- 1) Permit 57-07473 $\frac{50 \text{ a.f.}}{45 \text{ ac}} = 1.11 \text{ a.f./ac.}$ from Macks Creek
- 2) 8 of the acres in appl. 57-07525 are overlap with land in 57-07473.
- 3) Revised total acres in application = 56 (41 + 15)
- 4) of the 56 acres, 8 already have 1.11 a.f./ac under earlier right. These 8 acres are entitled to 3.89 a.f./ac from same source to reach max. allowable 5 a.f./ac. from Macks Creek.
 $(8)(3.89) = 31.12 \text{ a.f.}$
- 5) Remaining 48 acres are entitled to max. 5 a.f./ac. from the source.
 $(48)(5) = 240 \text{ a.f.}$
- 6) Total in 4 & 5 above:
 $240 + 31.12 = 271.12$
- 7) However, reservoir size = 250 a.f., limit application to this size.

RE: Application for Permit 57-07525

Dear Sir:

Your recent application in the name of Junayo Ranch Limited Partnership to irrigate 41 acres via a reservoir on Macks Creek was received at this office on 4/18/90. Before this office can advertise and process the application, the following items need attention.

1) Partners - the names and addresses of the other partners are needed.

2) Allowable storage - it appears that eight (8) acres in the application may also be found in Permit 57-07473, which is an earlier right for a different storage project using Macks Creek water. Two possibilities exist and are outlined below in items 3 and 4.

yes
3) Same acres - refer to the enclosed copy of the map from permit 57-07473. The eight (8) acres in question are shown in Sec. 13, SENE (3 ac.), NESE (2 ac.), and NWSE (3 ac.). Now refer to the map for 57-07525 that I prepared based on information in your application. The 57-07473 map indicates acres north of Macks Creek just before the confluence with Reynolds Creek. The same land appears in the application. If the preceeding is correct, the allowable storage volume per acre for the common acres cannot exceed five (5) acre feet per acre (af/ac) from Macks Creek. An adjustment in the application volume of water should be made. An adjustment would be based on the number of common acres in the permit and application and the af/ac provided by the permit.

4) Different acres - use the same maps to arrive at this answer. Perhaps an error occurred in either mapping situation and different acres are intended. In this case, the water provided in 57-07473 will be unrelated to the water in the application.

5) Allowable storage revised - whichever of the above two correctly describes the situation, the amount of water in application 57-07525 must be adjusted. The application includes 41 acres and up to 250 acre feet (af). However, no more than five (5) af/ac from a source may be obtained. Up to 205 af for irrigation from storage may be allowed in 57-07525 (41×5) if no common acres are found (item 4 above). The reservoir capacity of 250 af for irrigation for storage will remain unchanged to provide carry-over water from year to year. In other words, a right to store more than 5 af/ac might be obtained (still subject to reduction depending on administrative review), but the right to use water from storage must be limited to 5 af/ac from a source.

Mr. Owen H. Orndorff
1087 River Street
Suite 230
Boise, ID 83703

Dear Mr Orndorff:

In your conversation with Ross Wight last week, you indicated that you were interested in trading approximately 18 acres of land for the ARS weir located on Macks Creek. This letter documents that we are interested in such a trade. However, any negotiations and approval for a trade will have to be made with Mr. Robert S. Serrano, property management specialist, of our Area Office (USDA-ARS, 800 Buchanan Street, Albany, CA 94710).

We will begin searching our records for information on the design and construction of the weir. The construction engineer still lives in Boise and can be contacted for information if needed.

Best Regards,

W. H. Blackburn

Dear Legal Dept.:

Enclosed you will find a legal notice which we wish to have published on the dates indicated (once a week for two consecutive weekly issues) in your newspaper. If you cannot publish the notice on the proposed dates, please contact us immediately.

An affidavit of publication must be submitted to the Department along with the publication bill. Your cooperation is appreciated.

Please send the affidavit of publication and publication billing to this office before JUNE 25, 1990.

Yours truly,

GAIL GARRETT
Secretary
