MEMORANDUM

TO: File 57-07505 / Blenda Lewis
FROM: Brenda Chapman
DATE: March 15, 1996
RE: Recommendation Adjustment(s)

=====

The final licensing recommendations for Right 57-07505 are based on the information below:

F. FLOW CALCULATIONS

The recommended capacity has been reduced based on new information from the 7/31/94 Well Driller's Report (when the well was deepened). The well test pumped at 150 gpm or .33 cfs. Also, the irrigation rate is limited to the sprinkler output of .29 cfs. See below.

[29 sprinklers x 4.50 gpm = 130.5 gpm or .29 cfs]

H. RECOMMENDATIONS

1. Recommended Amounts

Beneficial Use	Period of Use	Rate of Div	Annual Vol
Irrigation	3-15 to 11-15	.29	90.0
Stockwater	1-01 to 12-31	.02	.1

The stockwater volume recommendation has been adjusted to the minimum standard. Per the May 8, 1980 Administrative Memorandum No. 6, volume should be shown with no more precision than tenths.

E. NARRATIVE/REMARKS/COMMENTS

OVERLAPS: P/U Same QG, different places of use.

Well water, diverted by a 20 h.p. pump, is used to supply stockwater to two horses, and for irrigation of ~~a 20 acre field~~ of a 20 acre field.

Irrigation is by 3" hand line, and has a measured flow of 0.30 cfs. The permit indicates that 30 acres are to be irrigated, but only 20 acres is presently watered by system. An allocation of 0.02 cfs/acre has been requested, and since only 20 acres is being irrigated, this would be an allocation of 0.40 cfs.

The systems capacity is 0.40 cfs, but to allow 0.02 cfs for stockwater, recommend licensing for 0.38 cfs for irrigation, and 0.02 cfs for stockwater.

(No Adjudication claim filed)

Also, recommend well casing be properly sealed prior to licensing.

ACTION OF DEPARTMENT OF WATER RESOURCES

This Permit is Approved.

If approved, this permit authorizes the construction of a well subject to the following conditions:

GENERAL CONDITIONS

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from its date of issuance for the start of construction and is valid for one (1) year from the date of issuance for completion of the well unless an extension has been granted.
3. This permit does not constitute the approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Issuance of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
7. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
8. If a bottom hole temperature of 85°F or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.

SPECIFIC CONDITIONS

Dated this 5 day of September, 1989.

PROOF DUE NOTICE

RE: PERMIT NO. 57-07505

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before February 1, 1992. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Karen L. Gustafson

PERMIT APPROVAL NOTICE

RE: PERMIT NO. P57-07505

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

Please note the requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.

We have enclosed a form entitled "Instructions for Proof of

MICROFILMED
MAR 13 1990

Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.

Sincerely,

GARY SPACKMAN, Supervisor
