RECEIVED

State of Idaho
Department of Water Resources
Water Right License

WATER RIGHT NO. 57-07454

Priority: June 30, 1986

Maximum Diversion Rate: 1.00 CFS
Maximum Diversion Volume: 25.0 AF

It is hereby certified that JUNAYO RANCH LTD PARTNERSHIP
1087 RIVER ST #230
BOISE ID 83702 has complied with the terms and
conditions of the permit, issued pursuant to Application for Permit dated May 28, 1986, and has
submitted Proof of Beneficial Use on October 04, 1988. An examination indicates that the works have a
diversion capacity of 1 cfs of water from:

SOURCE

MACKS CREEK

Tributary: REYNOLDS CREEK

and a water right has been established as follows.

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>DIVERSION RATE</u>	<u>ANNUAL DIVERSION VOLUME</u>
IRRIGATION FROM STORAGE	03/15 to 11/15		25.0 AF
DIVERSION TO STORAGE	11/15 to 03/15	1.00 CFS	
IRRIGATION STORAGE	01/01 to 12/31		25.0 AF

LOCATION OF POINTS OF DIVERSION:

MICROFILMED

SEP 23 2002

BEFORE THE DEPARTMENT OF WATER RESOURCES
OF THE STATE OF IDAHO

IN THE MATTER OF PERMIT)
NO. 57-07454 IN THE NAME OF)
JUNAYO RANCH)
_____)

**ORDER CHANGING CONDITION
REQUIRING MEASURING DEVICE**

This matter having come before the Department of Water Resources (Department) as a petition to remove measuring device requirement, the Department makes the following Findings of Fact, Conclusions of Law, and Order:

FINDINGS OF FACT

1. On August 27, 1986, the Department issued Permit 57-07454 (permit) to Junayo Ranch (permit holder) with a condition of approval requiring the installation of measuring devices so the amount of water diverted, the amount of water entering the reservoir and the amount of water released from the reservoir could be measured
2. On October 4, 1988, the Department received a request from the permit holder to remove the measuring device requirement.
3. Installation of the measuring device at the point water enters and the point water is released from the reservoir is not necessary since this is an off stream reservoir. The permit holder has installed a measuring device at the point of diversion so the amount of water diverted from the source can be measured and regulated by the watermaster.

CONCLUSIONS OF LAW

1. The permit holder has complied with a portion of the measuring device requirement.
2. A measuring device at the point water enters the reservoir and the point water is released from the reservoir is not necessary.

ORDER

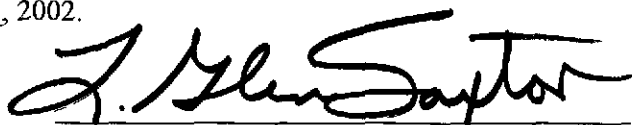

IT IS THEREFORE HEREBY ORDERED that the condition of approval requiring the installation of measuring devices so that the amount of water diverted, the amount of water entering the reservoir, and the amount of water released from the reservoir can be measured is **MODIFIED** as follows

The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion from Macks Creek.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No 57-7454, and said application is hereby APPROVED

1 Approval of said application is subject to the following limitations and conditions:

a SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before September 1, 19 88.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land

d The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

e Other: Permit holder shall commence the excavation or construction of diverting works within one year of the date this permit is issued and shall proceed diligently until the project is complete.

The storage of water under this permit is contingent upon the certification of the dam and authorization of storage per the dam safety provisions of the Idaho Code.

The issuance of this permit in no way grants any right-of-way or easement across the land of another.

Permanent measuring devices must be installed in such a manner that the amount of water diverted, the amount of water entering the reservoir, and the amount of water released from the reservoir can be measured.

Use of water under this permit is subject to control by the watermaster of State Water District No. 57R, Reynolds Creek.

Witness my hand this 27th day of August, 1986.

RE: License No. 57-7454 - Issuance of License

Dear Water Right Holder(s):

The Department of Water Resources has issued the enclosed Water Right License confirming that a water right has been established in accordance with your permit. Please be sure to thoroughly review the conditions of approval and remarks listed on your license.

The license is a PRELIMINARY ORDER issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action by the Department unless a party petitions for reconsideration or files an exception and/or brief within fourteen (14) days of the service date as described in the enclosed information sheet.

Enclosed is a copy of the approved Application for Amendment.

Please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the Department or visit the Department's homepage on the Internet to obtain the proper forms and instructions.

If you have any questions, please contact me at 208-327-7946.

Sincerely,

for Shelley W. Keen
Water Rights Supervisor

**Kari Lynn Townsend
Secretary**

MICROFILMED

- JUL - 3 2002

**EXPLANATORY INFORMATION
TO ACCOMPANY A
PRELIMINARY ORDER**

The accompanying order or approved document is a "**Preliminary Order**" issued by the department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department of Water Resources (department) unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the department or the Idaho Water Resource Board (Board) is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

MICROFILMED

APR 23 2006

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when.

- (a) the petition for reconsideration is disposed of, or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

RE: Water Right Permit Nos. 57-07400, 57-07472, 57-07532, 57-07454, 57-07525, and 57-07583

Gentlemen:

The Department of Water Resources is reviewing the above referenced permits prior to issuing water right licenses. By issuing the licenses, the Department confirms that a water right has been established in compliance with the terms of the permits. We have a request to expedite the issuance of these licenses by the Snake River Basin Adjudication (SRBA) staff so your prompt attention to this matter would be greatly appreciated

The examiner who verified your water use reported that some of the points of diversion and places of use are in a location other than what was described on the permits. Therefore, before licenses can be issued, some of these permits must be amended to depict the water rights as they were actually developed. I have identified the changes, for each permit that must be acted upon, below for your convenience.

Permit 57-07472: I found that we have never received the proof of beneficial use filing fee that should have been submitted with the proof. Could you please check your records for a check that may have been written to the Department on March 5, 1991 in the amount of \$50.00. We received the proof statement on March 6, 1991 and one of our staff acknowledged that the proof had been received but I could find no evidence of the fee being received by the Department. If you have some record of the fee being paid, such as a copy of our receipt or your check, we would be glad to update our file. If you have no records of the fee, we will require the \$50.00 filing fee be submitted prior to licensing the permit

Permit 57-07454: This permit was issued with the point of diversion and places of use different than what the examiner found during her field visit. We have also issued an "Order Changing Condition Requiring Measuring Device", based on the field examiner's findings and on the request you submitted on October 4, 1988. Enclosed is a copy of the order for your information

MICROFILMED

JUN 13 2002

Permit 57-07525: Our examiner found that the place of use is located different than what was permitted. She recommended adding the lands in Sec. 24 that she found irrigated under this permit.

Permit 57-07583: Our examiner found that we should add the lands in SWNE, Sec 13, to this permit.

Enclosed are licensing amendments for permits 57-07525, 57-07454, and 57-07583. These amendment applications depict the water use and other information, as they will appear on the licenses when issued. Please review the amendment forms carefully. If you concur with the information presented, please **sign the forms and return them with a \$50.00 filing fee, per amendment form, within 14 days**, from the date of this letter.

The remaining permits, **57-07400, 57-07532 and 57-07472** do not require amendments to be licensed. Enclosed, for your review and information, are copies of the draft licenses I have prepared for these permits. Please note that I have prepared the draft license on Permit 57-07472 based on your submittal of the proof of beneficial use filing fee or documentation to show that the proof fee was submitted in March of 1991.

If you have any questions in regard to the licensing amendments, or the draft licenses, please do not hesitate to contact me at 327-7944.

Sincerely,

KAY WALKER
Sr. Water Resource Agent

Comment Report

57-7454

1 kwalker 6/6/2002 Legal Descriptions on Exam

Comment: The examiners legal descriptions on the point of diversion and place of use are backwards. The township is actually 2S and the range is 4W - not 4S and 2W as shown on exam. See map attached to exam.

MEMORANDUM

June 26, 1998

TO: Junayo Ranch Files (see below)

FROM: Cindy Hodges *chl*

RE: *Field Exam and Review Information*

The following storage permits are all located at the Junayo Ranch on Reynolds Creek. They represent storage in four different reservoirs and should be reviewed for licensing together:

57-07400 Tyson Reservoir (Reynolds Creek Reservoir)

57-07472 Junayo #3 (Reynolds South Reservoir)
57-07532

57-07525 Macks Creek Reservoir (at old ARS gaging site)
57-07583

57-07454 Upper Macks Creek Reservoir (Junayo #2)
57-07473

For the most part, all stored flows are supplemental to decreed Reynolds Creek or Macks Creek natural flow rights, although there are a few acres developed under permits 57-07400 and 57-07583 which do not have any other appurtenant rights. As much as possible I have matched recommended acres with SRBA acres.

Areas of influence under the reservoirs may be separated into three distinct irrigation systems (my descriptions):

1. Reynolds East- Lands east of Reynolds creek, served by the Tyson and Junayo #3 reservoirs.
2. Reynolds West- Lands west of Reynolds Creek and below (east of) Macks Creek Reservoir, including areas situated both north and south of Macks Creek channel; served by Macks Creek reservoir.
3. Macks Creek- Lands above (west of) Macks Creek Reservoir, along Macks Creek both north and south of the channel; served by Upper Macks Creek reservoir.

Rough notes, overlap reviews, and original maps depicting the entire project may be found in 57-07400.

Application 57-07610 filed by Junayo Ranches is protested and still at the Region. Its place of use overlaps the Macks Creek irrigation system and is meant to legitimize an exchange of flows which is found to be going on there (stored flows in Macks Creek reservoir for natural Macks Creek flows above the reservoir). Its approval would not alter or implicate any of my recommendations. In fact, it has occurred to me that the new exchange legislation may be a better vehicle to show the actual water use than a new appropriation. I will be following up on that idea with Gary S.

D. FLOW MEASUREMENTS

1.

Measurement Equipment	Type	Make	Model No.	Serial No	Size	Calib. Date

2. Measurements: None. Diversion to Storage through existing P/D also used for Natural flow rights

E. NARRATIVE/REMARKS/COMMENTS

A single gravity diversion for irrigation and irrigation to storage. Splits a few yards from diversion with one ditch leading to off-stream reservoir and the other to fields. Div. to Storage is closed after 3-15 per. permit. (see photo)

Irrigation is via gravity from dual reservoir outlets onto lands which have decreed natural flow rights.

Only those lands below dam (located in SENW Sec 23) and above lower Macks Creek Reservoir (see 57-7525 & 7583) receive water under this permit. Lands SE of Macks Creek receive storage water which is injected to the stream channel then rediverted at the decreed P/D's. During ~~the~~ times when storage water is being delivered, ^{that reach of} upper Macks creek is usually dry so accountability for injected flows is not an issue.

There is a ^{portable} weir which may be used to measure total inflows in Macks Creek during periods when flows must be bypassed through lower Macks Creek Res, also could be used to measure diversion to storage but was not installed at time of exam.

Reservoir Name = Upper Macks Creek or Junayo #2

Overlaps: SRBA decreed rights ^(N. of creek) 57-00262 & ^(S. of creek) 57-02085

Approx 12 acres irrigation under 57-00262 was flooded during Lower Res. expansion - Does not really affect this permit.

Permit 57-7473 for expansion of Junayo #2 was not developed. Res. Capacity limited to 25 ~~ac~~ AF.

Have conditions of permit approval been met? ☒ yes ☐ no

* amount of water exiting reservoir not req'd to be measured as this is an off-stream facility

Re: Permit No. 57-07454
Request for Variance

Dear Mr. Saxton:

The purpose of this letter is to request a variance from the conditions of approval attached to the permit. Specifically Junayo Ranch requests that the condition for permanent measuring devices from Macks Creek point of diversion and from below the reservoir not be required.

The reasons for this request are as follows:

1. Junayo Ranch owns all real property in the Macks Creek drainage. The point of diversion from Macks Creek irrigates many acres of other ground not included in this permit. Without making major in-stream changes in the Macks Creek River bed, a permanent measuring device would be washed away during early spring (February-March) flows.

Junayo Ranch will, however, place a measuring device at the point of diversion to the reservoir which can accurately measure the amount of water diverted to the reservoir without measuring the waters otherwise beneficially appropriated to other ground.

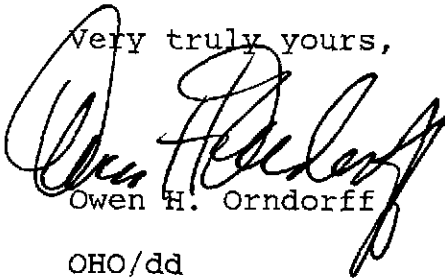

2. With respect to the measuring device below the reservoir water will come directly from the outlet to adjoining fields and will not be comingled with other waters from any other source. Waste water will be discharged into Macks Creek on which Junayo Ranch has the only water rights.

DEC 03 1988

Mr. L. Glen Saxton
September 29, 1988
Page 2

Enclosed is a Proof of Beneficial Use together with \$100.00. The reservoir measuring device will be installed prior to any water being stored in the presently empty reservoir.

Very truly yours,

Owen H. Orndorff

LAPSE NOTICE

RE: PERMIT NO. 57-07454

Dear Permit Holder:

You are hereby notified that under the provisions of Section 42-218A, Idaho Code, the above referenced water permit has lapsed. This office did not receive either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time. You were provided the proper form in our proof due notice to you dated June 30, 1988.

Your permit cannot be reinstated unless you submit proof of beneficial use or submit an extension of time request showing reasonable cause for delay. Either the completed proof of beneficial use submittal (including the examination fee or a completed field examination report) or the extension request form together with the \$15 fee must be received by this department within sixty days of the date of mailing of this lapse notice or the permit will no longer be of any force or effect.

A proof of beneficial use form and a request for extension of time form are again enclosed for your use. Please note that only one extension of time can be granted unless the project has not been completed because of lack of a necessary approval by a governmental agency or by litigation which might bring title to the water in question.

L. Glen Saxton
Chief, Operations Bureau

PROOF DUE NOTICE

RE: Permit No. 57-7454

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before September 1, 1988. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a completed field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this Department on or before the above described proof due date, or the permit will no longer be of any force nor effect.

Sincerely,

RITA FLECK
Secretary/Records Manager

Re: Permit No. 57-7454

Dear Mr. Orndorff:

We are in receipt of your letter dated September 4, 1986 in which you indicated that the height of the dam identified in item 6(b) of the above water right will be 17½ feet instead of the 10 feet originally proposed.

Please be advised that this modification will be noted in the file but does not change the water right. The purpose of item 6(b) on the application form is to provide an indication of whether the dam will be subject to the Dam Safety Act. A dam of either 10 feet or 17½ feet is classified as a "small dam" so the recording requirements are the same in either case.

Sincerely,

DAVID R. TUTHILL, JR., P.E.
Manager, Western Regional Office

RE: Permit No. 57-7454

Junayo Ranch
Idaho First Plaza, Suite 1405
Boise, ID 83702

Dear Permit Holder:

Enclosed is a copy of your approved Application for Permit. We direct your attention to the conditions of approval on the fourth page.

If the diversion dam is 10 feet or more in height, or has an impounding capacity of 50 acre-feet or more, certain dam safety requirements must be met. Please contact the regional office nearest you for details.

Please note the requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.

Sincerely,

JIM JOHNSON
Water Rights Supervisor

CONVERSATION MEMORANDUM

DATE 8/26/86FILE 57-7454NAME OF PARTY Orin Orendorff (son of Owner of Junayo Ranch)EMPLOYEE Dave TutthillRE: Diversion to Storage

I called to explain that because this is an off-stream storage reservoir, a diversion to storage parameter must be shown. I explained that the choices include, but are not limited to:

- a) 2.26 cfs, the rate of flow of direct flow diversion water rights in the diversion ditch. Selection of this option would require payment of an addl \$40⁰⁰, or
- b) 1.0 cfs, the rate of flow(max), allowed without increasing the filing fee.

Because the applicant

- (1) Is in a hurry to begin construction,
 - and (2) Feels that 1.0 cfs is a realistic flow amount,
- he opted for option (b) above.

I explained that readvertising would not be required in this case since the flow fill season is so limited and because the primary quantity factor for this right is storage volume.
