RE: Water Right Permit Nos. 57-07400, 57-07472, 57-07532, 57-07454, 57-07525, and 57-07583

Gentlemen:

The Department of Water Resources is reviewing the above referenced permits prior to issuing water right licenses. By issuing the licenses, the Department confirms that a water right has been established in compliance with the terms of the permits. We have a request to expedite the issuance of these licenses by the Snake River Basin Adjudication (SRBA) staff so your prompt attention to this matter would be greatly appreciated.

The examiner who verified your water use reported that some of the points of diversion and places of use are in a location other than what was described on the permits. Therefore, before licenses can be issued, some of these permits must be amended to depict the water rights as they were actually developed I have identified the changes, for each permit that must be acted upon, below for your convenience.

Permit 57-07472: I found that we have never received the proof of beneficial use filing fee that should have been submitted with the proof Could you please check your records for a check that may have been written to the Department on March 5, 1991 in the amount of $50.00. We received the proof statement on March 6, 1991 and one of our staff acknowledged that the proof had been received but I could find no evidence of the fee being received by the Department. If you have some record of the fee being paid, such as a copy of our receipt or your check, we would be glad to update our file. If you have no records of the fee, we will require the $50.00 filing fee be submitted prior to licensing the permit.

Permit 57-07454: This permit was issued with the point of diversion and places of use different than what the examiner found during her field visit. We have also issued an "Order Changing Condition Requiring Measuring Device", based on the field examiner's findings and on the request you submitted on October 4, 1988 Enclosed is a copy of the order for your information

MICROFILMED

Permit 57-07525: Our examiner found that the place of use is located different than what was permitted. She recommended adding the lands in Sec. 24 that she found irrigated under this permit.

Permit 57-07583: Our examiner found that we should add the lands in SWNE, Sec. 13, to this permit.

Enclosed are licensing amendments for permits 57-07525, 57-07454, and 57-07583. These amendment applications depict the water use and other information, as they will appear on the licenses when issued. Please review the amendment forms carefully. If you concur with the information presented, please **sign the forms and return them with a $50.00 filing fee, per amendment form, within 14 days,** from the date of this letter.

The remaining permits, **57-07400, 57-07532 and 57-07472** do not require amendments to be licensed. Enclosed, for your review and information, are copies of the draft licenses I have prepared for these permits. Please note that I have prepared the draft license on Permit 57-07472 based on your submittal of the proof of beneficial use filing fee or documentation to show that the proof fee was submitted in March of 1991.

If you have any questions in regard to the licensing amendments, or the draft licenses, please do not hesitate to contact me at 327-7944.

Kay Walker

Comment: In review of this permit for licensing, I found the entire place of use under decreed Reynolds Creek rights and this new permit to total 160 acres. This new storage right only covers 71 acres since prior decreed storage rights cover some of the place of use. We are also licensing permits 57-07472 and 57-07532 which are for another little reservoir developed by permit holder. See the overlap review I prepared in file 57-07400

FROM: Cindy Hodges cjl

RE: Field Exam and Review Information

The following storage permits are all located at the Junayo Ranch on Reynolds Creek. They represent storage in four different reservoirs and should be reviewed for licensing together:

57-07400	Tyson Reservoir (Reynolds Creek Reservoir)
57-07472 57-07532	Junayo #3 (Reynolds South Reservoir)
57-07525 57-07583	Macks Creek Reservoir (at old ARS gaging site)
57-07454 57-07473	Upper Macks Creek Reservoir (Junayo #2)

For the most part, all stored flows are supplemental to decreed Reynolds Creek or Macks Creek natural flow rights, although there are a few acres developed under permits 57-07400 and 57-07583 which do not have any other appurtenant rights. As much as possible I have matched recommended acres with SRBA acres.

Areas of influence under the reservoirs may be separated into three distinct irrigation systems (my descriptions):

1. Reynolds East- Lands east of Reynolds creek, served by the Tyson and Junayo #3 reservoirs.

2. Reynolds West- Lands west of Reynolds Creek and below (east of) Macks Creek Reservoir, including areas situated both north and south of Macks Creek channel; served by Macks Creek reservoir.

3. Macks Creek- Lands above (west of) Macks Creek Reservoir, along Macks Creek both north and south of the channel; served by Upper Macks Creek reservoir.

Rough notes, overlap reviews, and original maps depicting the entire project may be found in 57-07400.

Application 57-07610 filed by Junayo Ranches is protested and still at the Region. Its place of use overlaps the Macks Creek irrigation system and is meant to legitimatize an exchange of flows which is found to be going on there (stored flows in Macks Creek reservoir for natural Macks Creek flows above the reservoir). Its approval would not alter or implicate any of my recommendations. In fact, it has occurred to me that the new exchange legislation may be a better vehicle to show the actual water use than a new appropriation. I will be following up on that idea with Gary S.

E. NARRATIVE/REMARKS/COMMENTS Overlapping storage rights: 57-2325 & 7040
~~Black~~ Reservoir aka Tyson West or Reynolds Creek; off stream facility which uses some east-side Reynolds Creek diversion as decreed rights. Stored water used to supplement lands having decreed natural flow rights from Reynolds Creek under listed rights (front page). All use is east of Reynolds Creek. Lands N of reservoir are irrigated with pressurized handline system; all others via gravity ditch.
Acres in Section 18 have no other appurtenant rights besides stored water.
Diversion (to storage) rate is the same as for decreed rights and has been verified. There is a measuring device at the PD, under control of Watermaster. Flows only diverted to storage during off-season.

Capacity of Reservoir (active capacity) = 150 AF per most recent dam inspection. Unfortunately, both previous storage rights to this res. were decreed in SRBA as exceeding that amount. Actual capacity corresponding with earlier rights is only 85-100 AF per dam files, before the current expansion. Since previous rights cannot be changed, this right will have to be conditioned as limited to 150 AF (or 160 depending on where you reference) when used with prior rights.

Acres from storage on this right are unique from those listed under 2325 & 7040, but overlap partially with 7472/7532. (Storage in Junaya 3)

PROOF DUE NOTICE

RE: PERMIT NO. 57-07400

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before March 1, 1989. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully compeleted your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Rita Fleck
Secretary/Records Manager
