Dear Mr. Brandt:

You have the right to pick up your waste water and use it on the land outside the district as long as all the other water users of the waste water that have a water right earlier than December 11, 1973, have sufficient water.

The South Board of Control is obligated to furnish you with the portion of water for which you have contracted with them.

One important consideration in determining who is entitled to the run-off water is, what happens to it if you do not divert it under license no. 57-7110. If it goes back into the districts delivery system, then in short water years they would be entitled to use it to fill their water right which is prior to this license. If it does not return to their system, then it appears that the use under this license would have first priority.

If you have any further questions, please contact me.

Sincerely,

BOBBY D. FLEENOR

RE: LICENSE NO. 57-7110

Dear Sir:

We thank you for your letter of May 24 concerning the water license of Marie Downing answering some of the questions which we had. As previously indicated, we realize we cannot call upon the Owyhee Project to furnish excess water, but our question deals with our right to pump the normal runoff of water used on our fields within the district on to lands outside the district. You no doubt realize, it is no doubt impossible to irrigate without some water wasting at the end of the field. Specifically, do we have the right under our license to pick up this water which would otherwise go into the drain ditch and pump it onto our lands above the canal. In case we do pump this waste water as indicated, would the South Board of Control be obligated to furnish us our normal supply of water the same as they would anyone else or would supply us were we not doing the pumping?

Very truly yours,

John H. Brandt

Dear Mr. Brandt:

Your letter of May 16 expressed some questions about the validity of your water right license no. 57-7110 in the name of Marie Downing.

The source of this water is waste water that has its origin on lands inside the boundaries of the Owyhee Project. One of the unfortunate aspects of waste water filings is that the company wasting the water does not have to continue to do so.

The value of your license, however, if the waste water is available then you would have the right to divert the water under this water right license and that right would be superior to anyone else who would attempt to divert that water and use it outside of the district boundaries at a later date.

In summary, we would say that if there is waste water available then you are entitled to it but there is no requirement that the South Board of Control continue to supply you with the water.

If you have any further questions, please do not hesitate to contact us.

Sincerely,

BOBBY D. FLEENOR

RE: LICENSE OF WATER RIGHT NO. 57-7110

Gentlemen:

Recently we received a letter from the South Board of Control, Owyhee Project. It stated that they were not permitting any land outside their district to be irrigated with water originating in their project. On December 11, 1973, we received a water right license for .60 cfs under which we are using our own waste water collected in a pond to pump onto some land above the lateral. We were given permission to do this by Tom Cotton, then manager of the Owyhee Project. Location of overpasses and underpass for waste water so that it would not run back into the canal were required. A rather expensive installation of pumps, pipe lines, etc. was completed and we have a crop growing on the land for the third year now.

Our renters were verbally informed that the fact that we had a water right license had nothing to do with it, that if they chose to not allow our waste water to be pumped to these lands outside their district, they could do so. Of course, these lands were named in the water right license. It is my understanding that this gives us the right to irrigate them with this waste water. I realize that we cannot use any live water and the district can refuse to supply any excess water. Our question is, "can the South Board of Control, Owyhee Project negate our water right license?"

P.S. We manage this property
for Marie Downing.

Very truly yours,

Nampa, ID 83651

Dear Ms. Downing:

One of the conditions of approval of your water Permit No. 57-7110 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before February 1, 1975. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Dear Ms. Downing:

Enclosed is a copy of your approved Application for Permit No. 57-7110. We direct your attention to the conditions of approval as listed on the fourth page.

Be sure to note that a special condition requiring you to install and maintain a measuring device at your point of diversion has been placed upon your permit. We are enclosing a letter describing different types of measuring devices accepted by this office.

Sincerely,

BOBBY D. FLEENOR

57-7110 - Marie Downing

Gentlemen.

Enclosed you will find a legal notice which we wish to have published once a week for two consecutive weekly issues of your newspaper. We have inserted the publication dates allowing ample time for you to submit us a galley proof for review before publication.

After sending us a galley proof, proceed with the publication on the dates we have inserted, assuming the notice is correct. If we have any corrections, we will notify you before the first publication. If you cannot publish the notice on the proposed dates, please contact us immediately.

An affidavit of publication must be submitted to the Department along with the publication bill. In order to receive payment, the following certification must appear on the bill:

"I hereby certify that the foregoing account is just and correct, that the amount claimed is legally due, after allowing all just credits, and that no part of the same has been paid."

(signature of claimant)

Sincerely,

57 7110

O Re: Application for Permit - Marie Downing

Dear Mr. Brandt:

We are returning the application for permit filed in behalf of Marie Downing by your agency and check no. 92-269 in the amount of \$25.00.

P We can allow only one inch of water per acre of irrigated ground unless it is shown to our satisfaction that more is necessary. This permit would be approved for 0.6 c.f.s. rather than 1.0 c.f.s.

We also need evidence of a power of attorney from Marie Downing to you authorizing you to sign the application in her behalf.

Y When these items have been taken care of, please return the application and check to us for processing.

Sincerely,

ROBERT W. HAMILTON
Supervisor of Water Distribution
