Remarks**Mirada Farms – Add a Point of Diversion to Water Right No. 57-2341**

The applicant wishes to add a second point of diversion to water right 57-2341 to improve the reliability of the water supply system. A second well will be drilled and completed to meet the specifications of Idaho Department of Water Resources (IDWR). All appropriate permits will be coordinated through IDWR.

Idaho Code 42-222 requires IDWR to address the following components. The applicant's response follows each component.

Will there be injury to other water users: the actions under this Application for Transfer will not change the amount or rate of water diverted from the aquifer and therefore pose no injury or impact to nearby water users.

Will there be an enlargement of the original water right: the actions under this Application for Transfer will not change the amount or rate of water diverted from the aquifer, nor will it change the place of use or the portions of irrigation, stockwater or commercial uses. This action will not expand the water right.

Is this in the local public interest: No operational changes of the dairy will result from this action. This effort is to improve the reliability of the water supply system for in the event that one well requires maintenance, a backup system is available to supply water. By having a back up system, the operator of the facility then has the ability to shut down one well for maintenance while supplying the dairy with water from the other well. Good maintenance and operations of the dairy should be of local public interest.

This action requires the use of local well drilling services, which is good for the companies involved with the project.

Is this consistent with conservation of water resources in Idaho: This action does not change or expand the use of water, but only adds a point of diversion and therefore is consistent with the conservation of water resources in Idaho. Furthermore, by having the

6/1/01
6/1/01

ATTACH A - 1

increased flexibility to supply the dairy with water, the operator can conduct proper maintenance of the wells and therefore even improve the conditions of the local aquifer.

Will this affect the local agricultural base: This action will not affect the agricultural base positively or negatively. No affect is anticipated.

MEMORANDUM

TO: FILE
FROM: DANIEL A. NELSON
DATE: 5/30/02

RE: MIRADA FARMS TRANSFER, RIGHT 57-2341

The transfer proposes to add a point of diversion in the NWNW S32 T3N R4W. This well will be used as a backup well to the existing dairy well. No changes have been proposed for the irrigation, commercial, or stockwater use. Transfer 68053 (old # 4341) was filed on this water right in 1994 and amended and approved in 2001 for 2200 dairy cattle and 1200 range cattle.

DOCUMENTS AND APPLICATION PREPARATION

The application consists of 6 pages and 2 attachments. Note the location of the following application items

Attach. A – Remarks and comments supplying information for additional information letter (A-1 to A-2).

Attach. B – Tax Notices showing ownership (B-1 to B-2).

Steve Hannula of ERO prepared the application.

Other information used in this review includes Place of Use Comparison Sheets and Point of Diversion comparison Sheet attached to this memo.

NARRATIVE

The applicant proposes to add a point of diversion to this water right to supply a backup well to the Mirada Dairy. Transfer 69053 was approved on 5/25/2001 for the dairy site and all of the dairy information was attained during that process. This application is just for a second well and will not change the diversion rates and volumes approved through transfer 69053.

This water right has been decreed in the Snake River Basin Adjudication (SRBA) and the recent transfer in 5/25/2001 answers any questions of forfeiture and adjudication issue.
