RE: Water Rights 57-02292/57-02335/57-07047/57-10669

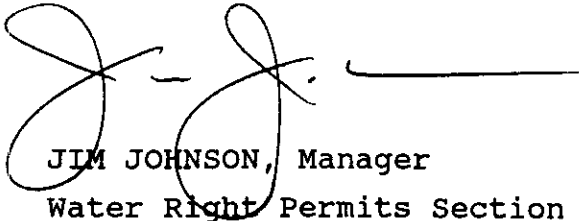

Dear Mr. & Mrs. DeRuyter:

The Department is in receipt of the correspondence changing ownership of the above referenced water rights to you. We have modified our records to reflect this change in ownership and computer generated reports are enclosed.

Just a reminder, because of a law that went into effect July 1, 1996, all water right owners are required to report change of address or ownership to the department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee to the water right owner. If you have other water rights that haven't had the ownership updated please contact the department as soon as possible.

If you have any questions regarding this matter, please feel free to contact me at (208) 327-7947.

TO: Files 57-02292, 57-02335 & 57-07047

FROM: Pam Skaggs^{PS}/State Office

SUBJECT: Transfer 5007

DATE: June 19, 1998

ok [signature]

Transfer 5007 adds points of diversion, changes the place of use under Rights 57-02992, 57-02335 and 57-07047, and changes the nature and season of use under Right 57-02292. The applicant is building a dairy ✓

These three rights have been used together to irrigate 361.0 acres. Region review provided detailed information describing the use of surface water from Gem Irrigation District. The transfer removes 60 acres from irrigation that did not receive supplemental surface water. ✓

All of Right 57-02292 has been identified to provide the commercial and stockwater needs of the proposed dairy facility. Right 57-07047 already provides for a portion of the total stockwater use requirement. The remaining 301 acres will continue to be irrigated under a combined system and permissible place of use as described under Rights 57-02335 and 57-07047. Irrigated acres have been rearranged to allow for the construction of the dairy. ✓

All wells are existing irrigation wells. No expansion occurs through this change in nature of use. Recommended conditions include water quality, multiple points of diversion measuring devices, future annual reporting, combined limits, permissible place of use limit, irrigation overlap and standard transfer conditions. ✓
