Dear Mr. Tyson:

On December 10, 1969, the Boise District Manager issued an initial decision classifying lots 4 and 5, Sec. 18, T. 2 S., R. 3 W., B.M., Idaho, as suitable for desert land entry. These lots are included in your desert land petition-application I-2090.

According to your plan of development, the land will be irrigated from an existing reservoir. You must submit evidence of your right to appropriate and use the water on lots 4 and 5, Sec. 18. The evidence should consist of State water permit approved by the State Reclamation Engineer. If you already have a water permit, it should be amended to show that water will also be appurtenant to the subject lots. If you do not have a permit, then you should apply to the State Department of Reclamation for one.

The attached extra copy of the letter should be submitted to the State Department of Reclamation if you apply for a permit. They may decline to issue a water permit unless they know that the land has been classified as suitable for entry. You should make arrangements with them to have a copy of the approved permit or amendment sent to this office. Please advise us when you apply for the permit.

We would appreciate receiving a copy of the approved permit or amendment to an existing permit as soon as possible.

Sincerely yours,

S' CURTIS R TAYLOR

Gentlemen:

Our office acknowledges receipt of Assignment of Permit for the above referenced water rights. However, in reviewing the files I find that the Permits have been licensed.

In Idaho, a licensed water right is considered real property and is acquired when the property to which it is appurtenant to is purchased. Proof to owning the property is proof of owning the water right license.

Therefore, I have put the Assignment of Permit into the files for future reference only and no other action will be taken. I have also enclosed copies of the licenses for your records.

If you have any questions, please feel free to contact our office.

Dear Mr. Tyson:

One of the conditions of approval of your water Permit No. 57-7040 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before April 1, 1975. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.
