Dear Mr. Carothers:

On May 20, 1968, an "Initial Decision" approving your desert land petition Idaho 017182 for all but 40 acres was issued by the State Director.

According to your plan of development, water for irrigation is to be obtained from a well to be drilled. You must submit evidence of your right to appropriate and use the water. The evidence should consist of a copy of a State water permit approved by the State Reclamation Engineer. Attached is an extra copy of this letter. The copy should be submitted to the State Department of Reclamation at the time you apply for a permit. Unless they have knowledge that the land of the desert land application has been classified as suitable for entry, they may decline to issue the water permit. You should make arrangements with the State Reclamation Engineer to have a copy of the permit sent to this office.

We would appreciate receiving a copy of the permit as soon as possible. Also, please advise us when you apply for the permit.

Sincerely yours,

Orval G. Hadley
Manager, Land Office

RE: Transfer Review (No. 3938)

The above referenced transfer application proposes to add a point of diversion (well) under this right. Since this filing is for the addition of a point of diversion only, the standard conditions requiring the change to be accomplished within one year will not be added.

Advertising was completed correctly. Proof of ownership is not required. A remark on the application states that the additional point of diversion is the same well used in Permit 57-7287. A drilling permit was obtained for the well (57-90-Z-014); therefore, the standard condition regarding drilling permit requirements will not be added.

The transfer can be approved with the following condition:

T09 Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.

H. REMARKS AND OVERLAP REVIEW ANALYSIS

Water Right No. 57-7287 is still under development. A separate well is used to supply domestic and stockwater (up to 280 head of cattle). The following sprinklers have been used to irrigate the land. Approx. 330 heads with "8" nozzles } Rain Bird Model
Approx. 150 heads with "1/64" nozzles } 30 or similar type
2 Nelson Model 100 Big Guns with 0.40" nozzles
1 Nelson Model 100 Big Gun with 0.50" nozzle
All the land was planted to hay, however not all of the land is irrigated ~~in~~ each year.

EXAMINATION FEE NOTICE

Dear Permit Holder:

Department records show that proof of beneficial use has been submitted for the above-referenced permit, but that a field examination has not yet been conducted to determine the extent of beneficial use of the water for licensing purposes.

House Bill 671 (effective April 4, 1986) enacted by the 1986 Idaho Legislature requires the payment of a fee before this department can conduct the field examination needed to issue a license confirming use of water under the permit. This letter is notification that the license examination fee is due within sixty (60) days of the date of this letter. The examination fee information sheet (enclosed) must be returned with the fee.

As an alternative to submitting the fee, the department will accept a field examination report completed by a certified water right examiner from the private sector. If you choose to have the examination done by a certified water right examiner, you need not submit the license examination fee to the department, but you must within sixty (60) days of the date of this letter return to the department, the examination fee information set showing appropriate information together with a statement from the certified examiner to verify that you have retained a certified examiner to conduct the field examination. If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot later change your decision to use this alternative and submit the fee needed for the department to conduct the field examination, but you may change to another certified examiner.

Dear Mr. Carothers:

One of the conditions of approval of your water Permit No. 57-7021 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before October 1, 1973.
