MEMORANDUM

April 28, 1980

SUBJECT: Request for Research and Interpretation of Water Rights Identified on Lands for Mr. Jim Hollister

Researched by: Roberta Garrett

The waters of Castle Creek are decreed in the case of William D. Evans, et al., vs. William Toy, et al., May 18, 1914, and amended and redecreed in the case of James L. Davey vs. George F. Brown, et al., May 15, 1923, which fixes the irrigation season from the 1st day of April to and until the 15th day of October of each year. The average amount of water required each year during such season is one inch of water to the acre.

Where more than one right has the same date, they will all take equal rank as to priority. Whenever the amount of water flowing is insufficient in quantity to supply all of said parties, they will share in the available supply in the proportion of the several quantities awarded as of the same date subject to prior rights.

The intent of the decree recognizes the premise of "first in time is first in right." Thus, the individual who first appropriates water and puts it to a beneficial use has a right superior to someone who later appropriates water from the same source for a beneficial use. In addition, the decree did not intend to interfere with or prevent the acquiring of licenses under the permits issued by the state of Idaho cited in the decree. The permitted rights issued by the state of Idaho were recognized as established rights under the requirements of law relating to the acquiring of licenses.

Decreed rights, licenses, and claims are considered appurtenant to the land and passes with the sale of the land unless specifically reserved in the deed. Permits are considered personal property and belongs to the permit holder. In order for a permit to change ownership, it would be necessary for the permit holder to assign all or a portion of his permit over to a new owner(s).

Water is delivered by a watermaster in compliance with decreed rights, licenses, and permits. Mr. Kenneth Neavill, Melba, Idaho, is watermaster for Castle Creek as well as for Pickett, Harts, Brown, Catherine, Bates, and Alder creeks.

April 28, 1980

The lands identified for research of water rights are as follows:

T. 4 S., R. 1 E.

Section 13: SWNE (40 acres)
 SENE (40 acres)
 NWSE (40 acres)
 SWSE (40 acres)
 NESW (40 acres)
 SESW (40 acres)

Section 24: NWNE (40 acres)
 NENE (40 acres)
 SENE (40 acres)
 NESW (40 acres)
 SWSW (portion lying east of Castle Creek) rights shown will be
 a 40-acre tract or a portion thereof.

Section 25: NWNW (40 acres)

The underscored 40-acre tracts are tracts specifically identified for research of water rights. If a water right includes only a portion of the lands, the water allotted would be a proportionate share of total water to total acres irrigated. The following water rights are on record with this department for lands identified above or a portion thereof:

57-0097 -- priority date of 1885 for 20 inches of the waters of Castle Creek decreed to Thomas D. and Donald Henderson;

57-0106 -- priority date of 1887 for 35 inches of the waters of Castle Creek decreed to Thomas D. and Donald Henderson;

lands identified - 160 acres:

Where the sum of the total inches per acre for each 40-acre tract is in excess of the allotted one inch per acre, only one inch is allowed from all sources combined.

* Permits 02-7281 and 02-7274 are the personal property of the permit holders. Prior to licensing, proof to beneficial use must be submitted on or before the proof due date and a field examination conducted by an agent of the department. The agent determines the amount of acres being irrigated within each 40-acre tract with licensing dependent upon his findings.

Re: Permit No. 57-2259

William E. &/or Gladys J. Cox

Dear Mr. and Mrs. Cox:

In a note from Jim Johnson of our office it was stated you wish to change the place of use in the S $\frac{1}{2}$ NW $\frac{1}{4}$, Sec. 24, Twp. 4S, Rge. 1E, to the SW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 24, Twp. 4S, Rge. 1E. If we were to delete the 40 acres in the SE $\frac{1}{4}$ NW $\frac{1}{4}$ this would reduce the cfs amount to 5.8 cubic feet per second, which would be an inch per acre for 290 acres.

In order to remove James Blaine's name from this permit we would require an assignment with Mr. Blaine's signature assigning his portion of this permit to you. A partially completed assignment form is enclosed. However, after the license is issued the water right becomes appurtenant to the land and whoever owns the land owns the water right.

We propose to now issue the license as follows:

Amount of water that can be recognized as beneficially used under
Idaho law: 5.80 cfs Source: Catherine Creek

The maximum quantity diverted shall not exceed 1,450 acre feet per year.

Point of diversion: NW $\frac{1}{4}$ NW $\frac{1}{4}$, SW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 26, NE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 23, Twp. 4S, Rge. 1E, B. M.

Beneficial use: Irrigation of 290 acres within the SE $\frac{1}{4}$ NE $\frac{1}{4}$, NE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 23; SW $\frac{1}{4}$ NW $\frac{1}{4}$, W $\frac{1}{2}$ SW $\frac{1}{4}$, Sec. 24; NW $\frac{1}{4}$ NE $\frac{1}{4}$, NE $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 26; Twp. 4S, Rge. 1E, B. Dear Mr. and Mrs. Cox:

A representative of this Department made an examination of the works covered by your Permit No. 57-2259 on May 23, 1975, and has found the following:

Amount of water that can be recognized as beneficially used under
Idaho law: 6.60 cfs Source: Catherine Creek

The maximum quantity diverted shall not exceed 1,650 acre feet per
year.

Point of diversion: NW $\frac{1}{4}$ NW $\frac{1}{4}$, SW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 26, NE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 23, Twp. 4S,
Rge. 1E, B. M.

Beneficial use: Irrigation of 330 acres within the SE $\frac{1}{4}$ NE $\frac{1}{4}$, NE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec.
23; SW $\frac{1}{4}$ NW $\frac{1}{4}$, NW $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 24; NW $\frac{1}{4}$ NE $\frac{1}{4}$, NE $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 26, Twp. 4S, Rge. 1E, B. M.

Priority date established: January 9, 1963

If you do not concur with these findings please contact us within 10 days, otherwise a
water license will be issued as set forth above.

Dear Mr. & Mrs. Cox:

This office acknowledges receipt of the proof affidavits submitted as proof of beneficial use for the above referenced permits.

We have caused the legal notice for Permit 30892/57-2260 to be published in the Owyhee Nugget at Marsing, Idaho, on January 16th and 23rd, 1975. You will be required to submit an affidavit of publication to this office. The affidavit may be obtained from the newspaper upon payment of the publication fee. We have asked that the newspaper bill you direct.

Upon receipt of the affidavit of publication, the Department will schedule a field examination during the 1975 irrigation season for both of the above referenced permits.

If we may be of assistance at any time, please do not hesitate to contact us.

Sincerely,

SUBJECT Field exams for 57-2259 & 57-2260

Herewith forwarding the above subj exams for Wm. E. & Gladys Cox covering water from Castle Creek & Catherine Creek in Owyee County. If at all possible, would like to wrap these up during the 1978 irrigation season.

The permit holders also have permit 57-2334 which is for water from "tiled drains" and covers some of the land described under the above subj permits. Have attached a rough map which indicates lands covered by each source. Proof is not due under 57-2334 until 8/15/77, however, if you find the works completed, we will urge the holders to go ahead and make proof so that all the three permits can be licensed at the same time.

Gentlemen:

One of the conditions of approval of your water Permit No. 57-2259 & 57-2260 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before January 14, 1975. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Gentlemen:

During the 1967 session of the Idaho Legislature, certain amendments were made in the law pertaining to the procedures for making proof of beneficial use of water. In order for the Department to comply with these changes, Rules of Practice and Procedure were adopted on August 1, 1968. Generally, these procedures and the amended law make it simpler for a permit holder to make proof of beneficial use of water.

The enclosed orders modify your above referenced permits to comply with these rules and regulations. As a part of the new procedure, you will be required to publish a notice at your expense for two consecutive weeks in a newspaper as prescribed by the Department in connection with Permit 30892/57-2260. If you will complete and return the enclosed advertising authorization, we will cause the notice to be published.

Also enclosed are proof due notices for these permits along with the Department's proof of beneficial use forms. You will note that proof of beneficial use is due under both permits on or before January 14, 1973.

If you have any questions regarding the above matters, please do not hesitate to contact this office.

Sincerely,

BOBBY D. FLEENOR
Assistant Director

Dear Mr. Nettleton:

Please be advised that the Department of Reclamation has forwarded a copy of your February 8, 1968 letter of opposition to Permit No. 30891 to applicants William E. Cox and James W. Blaine.

In order to consolidate the issues and review the matter at hand, the department has scheduled a conference to review your letter of concern. The conference is scheduled for the Owyhee County Courthouse at Murphy, Idaho at 3:00 p.m. on Tuesday, March 26, 1968. You or your representatives are requested to attend.

Please contact us if we may be of further assistance.

Dear Mr. Nettleton:

At our meeting on March 26, 1968, at the county courthouse in Murphy, we discussed your protest of completion of works proof for Permit 30891 held by William E. Cox and James W. Blaine. It appeared at that time that your wish was to protest final licensing rather than completion of works proof.

If you have no further protests on completion of works, we shall proceed with the proof of completion of works procedure. This requires that an examination be made in the near future.

If we do not hear from you before April 10, 1968, we will assume that you have no further protest and that you do not wish to go to formal hearing on the matter. Thank you for your cooperation.

Gentlemen:

We are returning the affidavit of holders submitted as proof of completion of works on the above referenced permit. Please be advised that under the terms and conditions of Permit No. 30891, the proof of completion of works must be submitted in the form of a notice of an application which is to be advertised four consecutive weeks in the county newspaper in which the point of diversion is located.

Following the advertisement, the holder and two disinterested witnesses must appear before a notary public to fill out depositions. Once the depositions have been completed, they must be forwarded to the Department of Reclamation along with an affidavit of publication obtained from the newspaper. Following the receipt of these documents, the Department of Reclamation will conduct a field examination of the system described in the proof of completion of works.

If you have any questions on this matter please contact us.

Gentlemen

Please be advised that since your permit is for water in excess of 6.4 c.f.s., you are required under the conditions of your permit to advertise the proof of completion of works as indicated in the enclosed form letter.

You should be aware that if you have applied all of the water under this permit to beneficial use you can at this time file proof of beneficial use also. If you so desire please advise us. If you intend to submit proof of completion of works only, then at a later date you will be required to advertise the proof of beneficial use also.

Please contact us if you have any further questions.

Re: Permit #30891

Dear Sir:

Enclosed you will find a traced map I took off of an ASC aerial photo of the Jim Blaine and Bill Cox farm on Catherine - Castle Creek. This is all the land irrigated by Catherine Creek. The acres marked are the ones used by the ASC to compute farm allotments.

On the enclosed sheet you will find that I have listed the use of all fields on this part of the farm. This was compiled from my personal knowledge and knowledge of past tenants of this farm.

The total farmed acres is 137.0 acres at this time. Thirty-five inches of Catherine Creek water has been decreed to this farm in 1907 and 1908. I believe that this farm is eligible for only 102" of additional Catherine Creek water.

The pump that they use to deliver part of this water is a 4" intake 3" discharge Berkley. It has been placed in the creek south of #8 and run on a sprinkler system most of the time. In this use it will deliver about 50" of water. I would like to have you consider this in allowing that part of this permit.

30891

This farm also has rights to about 300 inches of Castle Creek water that can be used on all ground south and east of Catherine Creek. At one time there was a flume across Catherine Creek but it has not been in service in several years. I would like to object to allowing more land brought into production at a later date and combining these two rights on this new land. This would put my permit at a great and unfair disadvantage.

I am unsure of the complete policy in a case of this type but would be glad to work out any problem now to prevent trouble and hard feelings at a later time.

Sincerely,

Timothy J. Nettleton

Gentlemen:

Proof of completion of works ~~and application of water to the State of Idaho~~ for the above referenced permit is due not later than January 14, 1968.

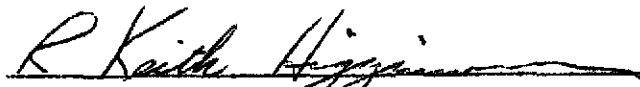

Under the terms of your permit, it is required that a notice be published once a week for four consecutive weeks in a local newspaper showing your intent to submit proof. The proof will consist of depositions which the permit holder and two disinterested witnesses must complete before the listed notary public, and must be accompanied by an affidavit of publication of the legal notice.

We have prepared the enclosed notice from the information on your permit. The complete name and address of a notary public of the State of Idaho must be entered together with a date for you to appear before the notary. Allow at least 40 days from the date the notice is mailed to this department for your appearance before the notary.

If you find any discrepancy in the notice or have made any changes, please advise this department and we will assist you in doing whatever may be necessary to assure correct publication.

If the enclosed notice is correct, complete the blank spaces and sign the form authorizing us to publish the notice at your expense and return all forms. At the time we send the notice to the newspaper, you will be supplied with further instructions.

If you do not desire to complete the proofs and obtain a license of water right, you are requested to complete the relinquishment portion of this form below and return it to the Department of Reclamation.

Dear Mr. McDowell:

Returned herewith are the two applications for permit, one for 10 c.f.s. from Katherine Green, and one for 10 c.f.s. from Castle Creek to irrigate the same land, with attached check for \$15.50. The fee for 10.0 c.f.s. is \$7.25.

Catherine Creek appears to be the correct name for the one stream. It is shown as such in the decree of the water, and also on the State Highway maps.

Kindly show the location of the ditches, from the proposed points of diversion. It appears that half of the land list is above the level of the upper diversions.

Return the applications after completion of the maps and additional information.
