Dear Mr. Thatcher:

Our field examiner's report on his inspection of proof of completion of works and application of water to beneficial use under the terms of Permit No. 29999 shows the pump and pipe capable of conveying 47 miner's inches, or 94.0 c.f.s. However, due to the limitations of your permit, we can only allow the amount of water originally requested, the amount of water actually used beneficially, or 1 (one) miner's inch per irrigated acre.

Upon receipt of the statutory fees, totaling \$9.00, we will issue the Certificate of Completion of Works for 94.0 c.f.s. and the License and Certificate of Water Right for 94.0 c.f.s. confirming the right, with priority of July 26, 1961, to the use of surface water from Frye Drain with the point of diversion in NE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 22, for irrigation of 58 acres in E $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 22, T. 3 N, R. 5 W, B.M.

Your record does not include an amendment to the
point of diversion which was approved, which changed the points to

Dear Sir:

We are writing you regarding the J. Gerhard Kohring, Permit No. 21542 and application for beneficial use on 6-14-61. There is some question in the U. S. It is our desire to take as security this well dug in Section 36 and the lands which it waters as security for a loan.

Would you please review this permit and other related materials which we have enclosed and return same with a letter of explanation of same so that we may proceed with our loan. Time is of the essence in this matter.
