Marving, Idaho

Dear Mr and Mrs Stevenson:

This acknowledges receipt of the depositions of Holder and two witnesses and the affidavit of publication in The Owyhee Chronicle in proof of beneficial use under Permit No. 20037.

Before a permit can be licensed, the law requires that a field examination be made by an engineer from this department. At this time we cannot tell just when this will be made but our field engineer will contact you prior to the time he is to make the inspection so that you can arrange to accompany him.

Very truly yours,

Re: Permit No. 20037

Mr. J. D. Stevenson
Rt. 1, Box 52
Marsing, Idaho

Dear Mr. Stevenson:

We wish to acknowledge receipt of the Depositions of the two witnesses in connection with the above permit for Proof of Application of Water to Beneficial Use.

Evidently you overlooked sending in your own deposition with the depositions of the witnesses. We note on the deposition of one of the witnesses that one of the points of diversion is not in accordance with the points of diversion described in the permit. Your witness stated that the points of diversion are in the NW $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 16 and the SW $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 16.

Providing you have changed one of the points of diversion, it will now be necessary for you to file an amendment with this department, changing the point of diversion from the NW $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 16 to the SW $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 16.

We also note under the land description of Question (6) of the witnesses depositions that they included the SW $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 16 as being irrigated. We wish to state that the SW $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 16 is not included in the original permit. Therefore if this 40 is included, it will be necessary for you to amend the land description which will include the SW $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 16. We are also sending a form of amendment for that purpose.

We are returning the depositions of the two witnesses in case you wish to correct same if the same are in error, and if not, send in the amendments as requested and return the depositions of the witnesses together with the deposition of the holder, which you overlooked sending to this office.

Very truly yours,

RE: Permit No. 20037

Mr. and Mrs. J. D. Stevenson
Route #1, Box 52
Marsing, Idaho

Dear Mr. and Mrs. Stevenson:

When you were in our office February 11, making arrangements for the publication and final proofs on Permit No. 20037 you authorized us to have the Notice published in The Owyhee Chronicle and named Mrs. Everett A. Colley, the Notary Public before whom the Proofs were to be made.

After you left our office I checked with the Secretary of States' office and was told they did not have a listing for Mrs. Everett A. Colley as a Notary but did learn that Mrs. Leona A. Hawes was a Notary Public, so we took the liberty to insert her name in place of Mrs. Colley, since she was not a Notary.

Yesterday Mr. Hawes called us and it seemed under the circumstances it would be necessary for you to either have the Notice published in the Homedale News or if run in the Owyhee Chronicle it would be necessary to name another Notary Public.

After several unsuccessful attempts to contact you by phone, both yesterday and today, the only alternative we had was to call the Owyhee Chronicle and name a new Notary Public, Mr. Homer Henry, as the date for the first publication was February 20, (tomorrow).

Since you authorized us to have the Notice published in the Owyhee Chronicle we could not change the paper without your consent and if Mrs. Colley had been a Notary Public we would, under no circumstances, have changed Notarys without your authorization to do so.

If the above arrangements do not meet with your approval, it is your privilege to make any changes you care to.

APPLICATION FOR AMENDMENT
TO PERMIT TO APPROPRIATE THE PUBLIC WATERS
OF THE STATE OF IDAHO, NO. 20037

RECEIVED
FEB 11 1958
Department of Reclamation

Comes now J. D. and Mable E. Stevenson and represents to the State Reclamation Engineer of the State of Idaho:

That they ~~are~~ the owners and holders of Permit to appropriate the Public Waters of the State of Idaho, No. 20037.

That the point of diversion is described in said permit as being located NW 1/4 of Sec. 16., Twp. 2 N., Rge. 5 W., B. M.

That he now requests that the point of diversion be changed to ^{include} a point located SW 1/4 of Sec. 16., Twp. 2 N., Rge. 5 W., B. M.

That his reasons for desiring to make such change are as follows:

By diverting the water from a higher point of diversion we are able to cover at least 15 acres more of land.

That no one will be injured by such change, and that such change will be made at Permit Holder's own risk.

APPROVAL OF STATE RECLAMATION ENGINEER

I, Mark R. Kulp, State Reclamation Engineer of the State of Idaho, hereby approve the above and foregoing application for amendment to Permit to appropriate the Public Waters of the State of Idaho, No. 20037. This approval constitutes a new permit and is issued as an amendment to the original permit, to which it refers and of which it becomes a part, and said application is approved only insofar as the rights of others will not be adversely affected thereby.

RE: Permit No. 20037

Date January 1, 1958

J. D. and Mable E. Stevenson
Rt. #1, Box 52
Marving, Idaho

Dear Sir:

The date for proof of application of water to beneficial use, as set out under the terms of Permit No. 20037 is due not later than March 31, 1958. If by this date you are not prepared to make this proof, you may make it at a later date, however, your priority will be advanced the same length of time for which the proof is late.

Before this proof can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county.

We enclosed Form 10, in duplicate, which is to be filled out and returned to this department at least forty (40) days before the above mentioned date or before the time you intend to make proof. This form, filled out in duplicate, is to include the time of day, the date (allowing for four weeks publication), the name of the town, the address of the place where the depositions will be executed, and, the name of the notary public before whom you will appear to make the depositions of proof (this may be at any place that is convenient for you and your two witnesses), the quantity of water filed on, for what purpose it is used, the point or points of diversion and the location of use or lands which are irrigated--all by legal land description.

Also enclosed is Form 11, which is the authorization for us to have the notice published in the designated county newspaper, at your expense. This is to be returned with Forms 10.

At the time we send the notice to the newspaper, we will also send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, at the place named and before the notary public, as advertised in the publication notice.

Very truly yours,

MARK R. KULP
State Reclamation Engineer

January 2, 1952

Dear Sir:-

Under the terms of your permit No. ~~20037~~-----you are required to complete your diversion works on or before-----~~March 31, 1952~~---. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

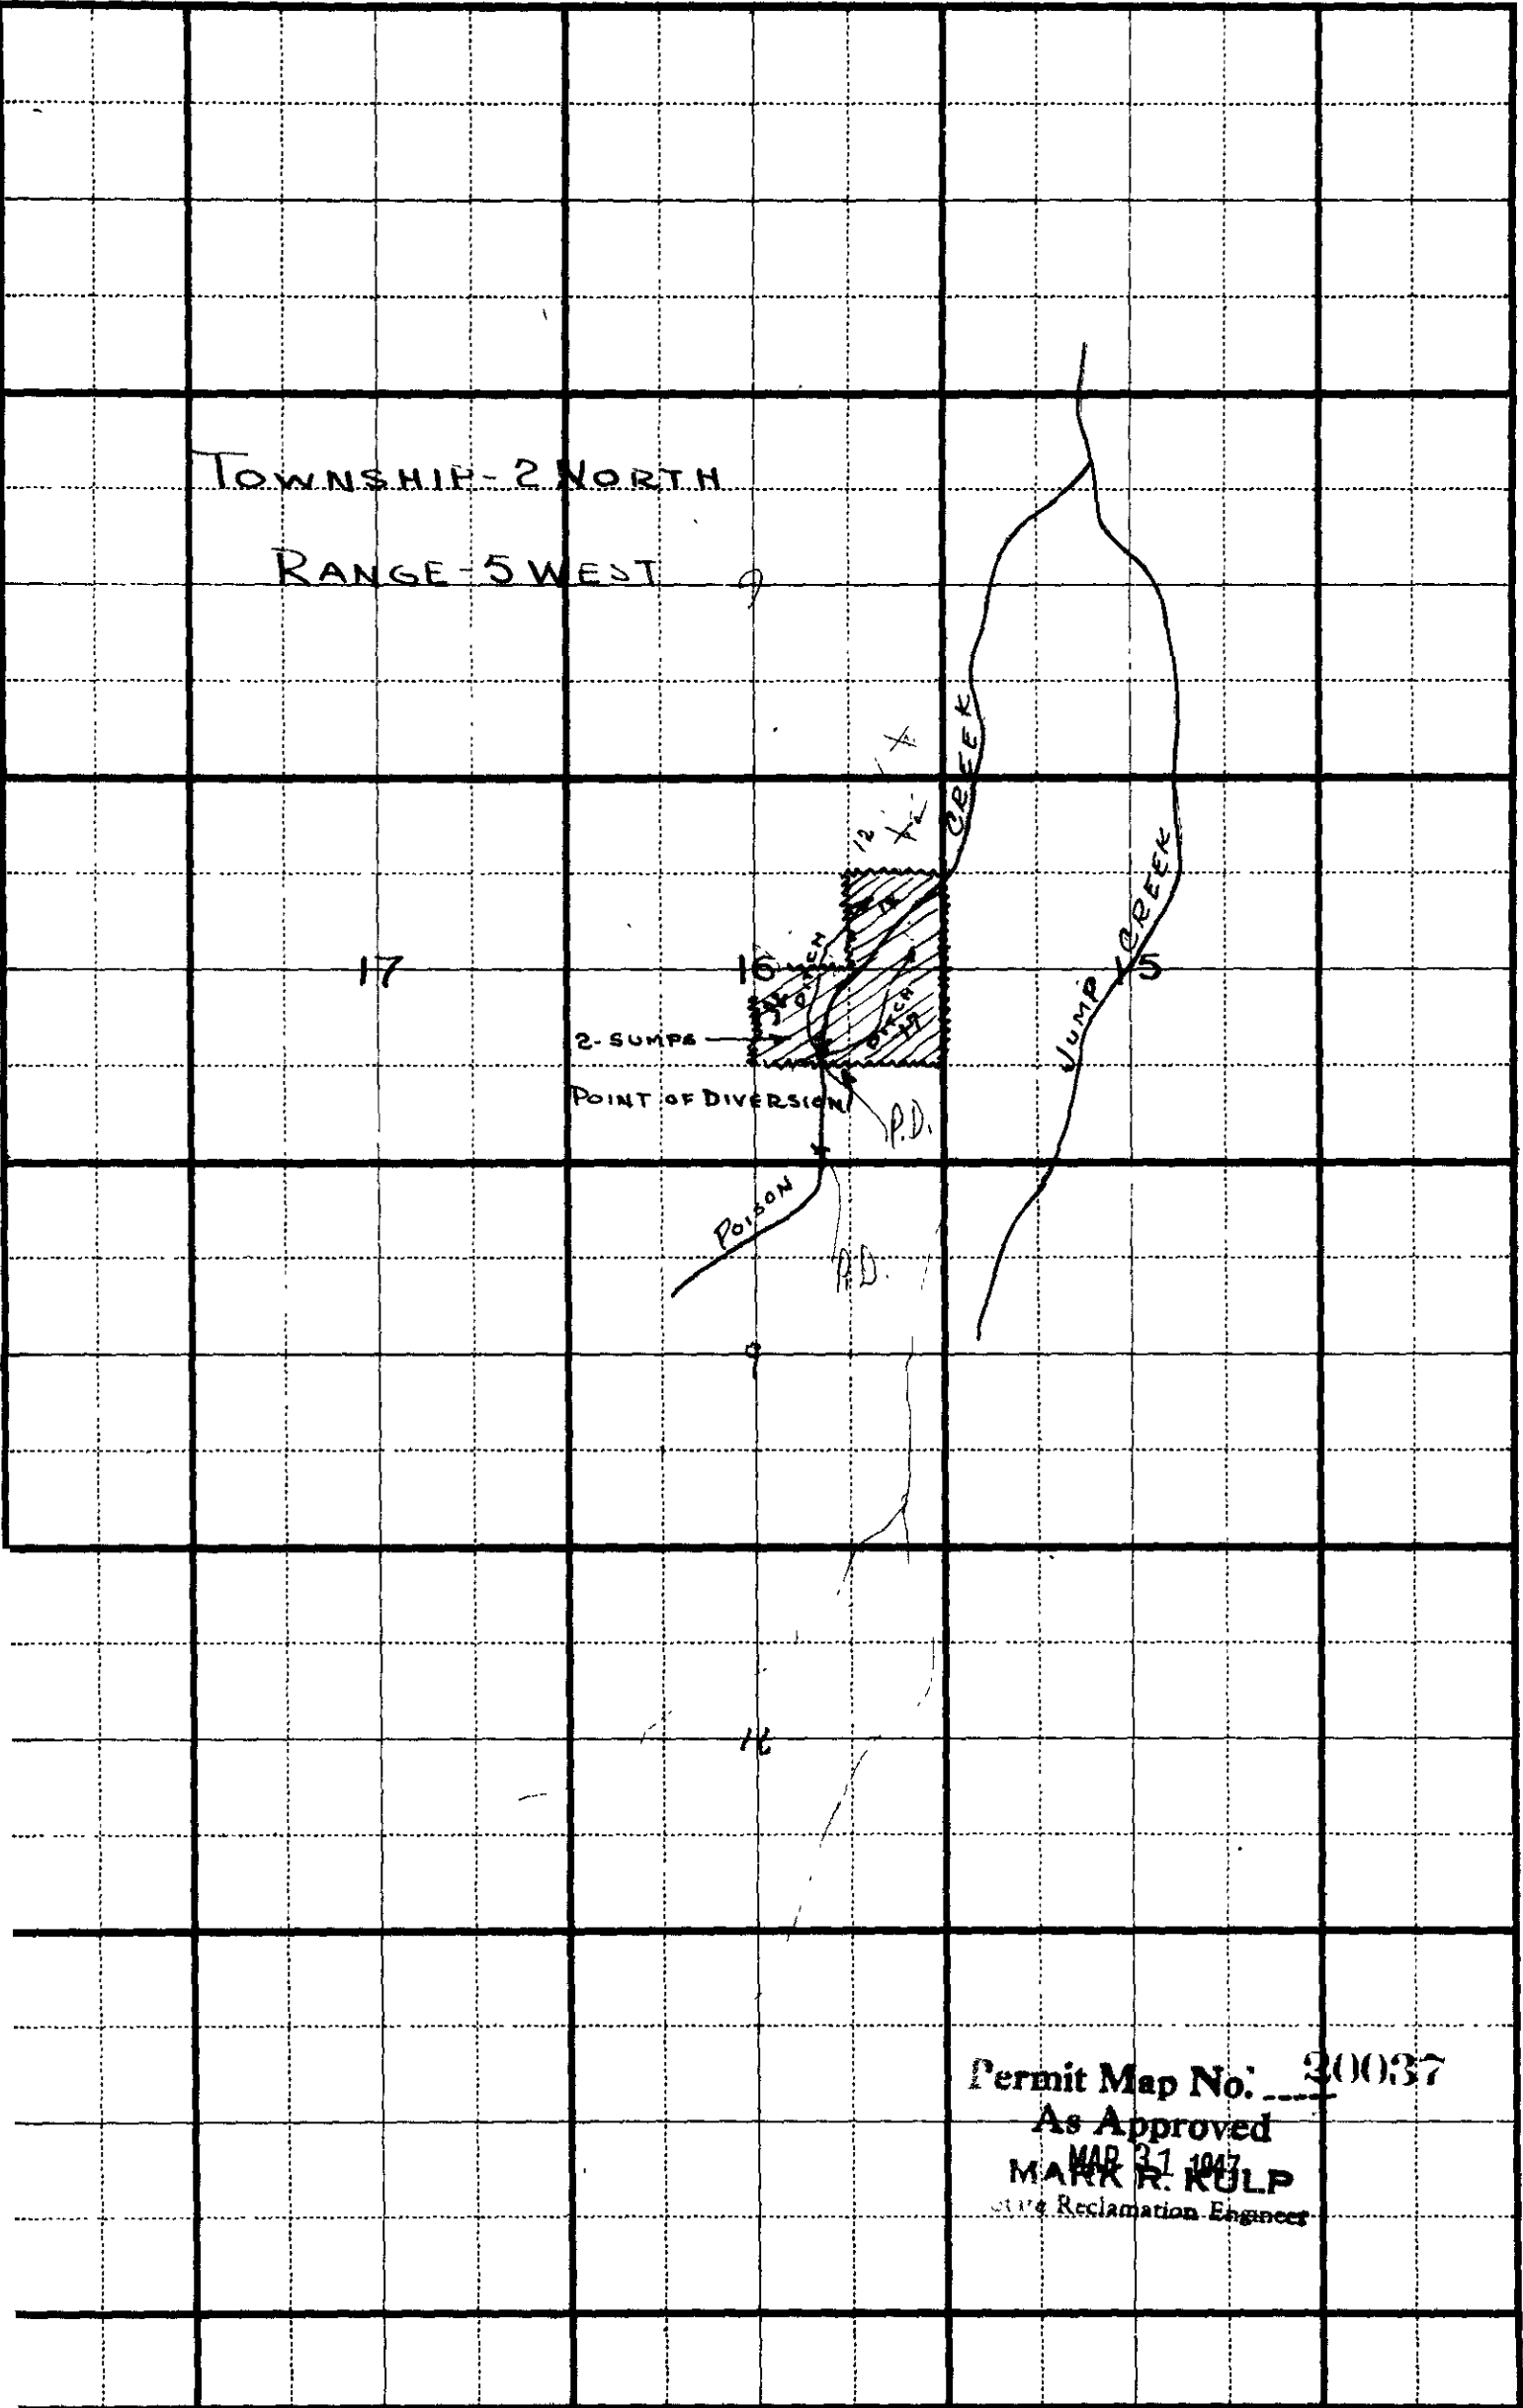

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

MARK R. KULP

State Reclamation Engineer
