RE: SMALL STORAGE RIGHTS FOR STOCKWATER

DATE: 21-MAR-1990

=====

This Permit was written for a small stockwater storage facility. The examiner found a pond so small as to be considered negligible and recommends licensing as a natural flow right.

No rate of flow is documented by the examiner. The Department commonly uses diversion rates shown on Table No. 6 of the Field Examiner's Handbook to estimate diversions for stockwater and this is recommended here: 0.03 cfs. In addition, the volume is calculated as shown on Table No. 6: 1.1 afa.

PERMIT NO. 55-7371

STOCKWATER STORAGE WHERE STORAGE POND IS VERY SMALL

SUMMARY: This form is used to organize data used in converting a series of BLM permits that were filed as a storage right for stock and wildlife water to a direct flow right. The basis for the conversion is, the volume that the ponds found can hold is less than or nearly equal to the daily volume that the recommended flow rate can produce. The intentions of the permit holder ~~is~~^{are} for the pond to store any available water on a year round basis for the use of the livestock. This use will be better reflected as a direct flow right with the small pond considered as a detail of the system.

This form identifies the pond size and compares it's volume to the volume that the recommended diversion rate for the found range cattle can produce.

THE PERMIT IS FOR:

storage for stockwater 1.4 af
storage for wildlife water .4 af
stockwater from storage 1.4 af
wildlife water from storage .4 af
total 1.8 af

FOUND DATA:

Pond size 15' by 15' by 5' deep/43,560 = 0.026 af

NO OF LIVESTOCK:

head 80

PERIOD OF USE:

from 1-1 to 12-31

LEGAL LIMITS BASED UPON FOUND DATA:

for 80 head the recommended flow rate is 0.03 cfs and 1.4 afa
for wildlife assume the same rate as livestock 0.03 cfs and 1.4 afa
total 0.03 cfs and 1.4 afa

NOTE: At the diversion rate recommended for the livestock found, the volume that can be produced in one day is;

0.03 cfs * 1.9835 = 0.059 af/day
therefore, as the pond can fill in approximately 24 hours, it becomes a detail of the direct flow and should not be considered as storage.

RECOMMENDATIONS: This requires an amendment to change the nature of use from storage to a direct flow right which more accurately reflects the intentions of the permit holder to license the partial or year round watering of livestock from this source.

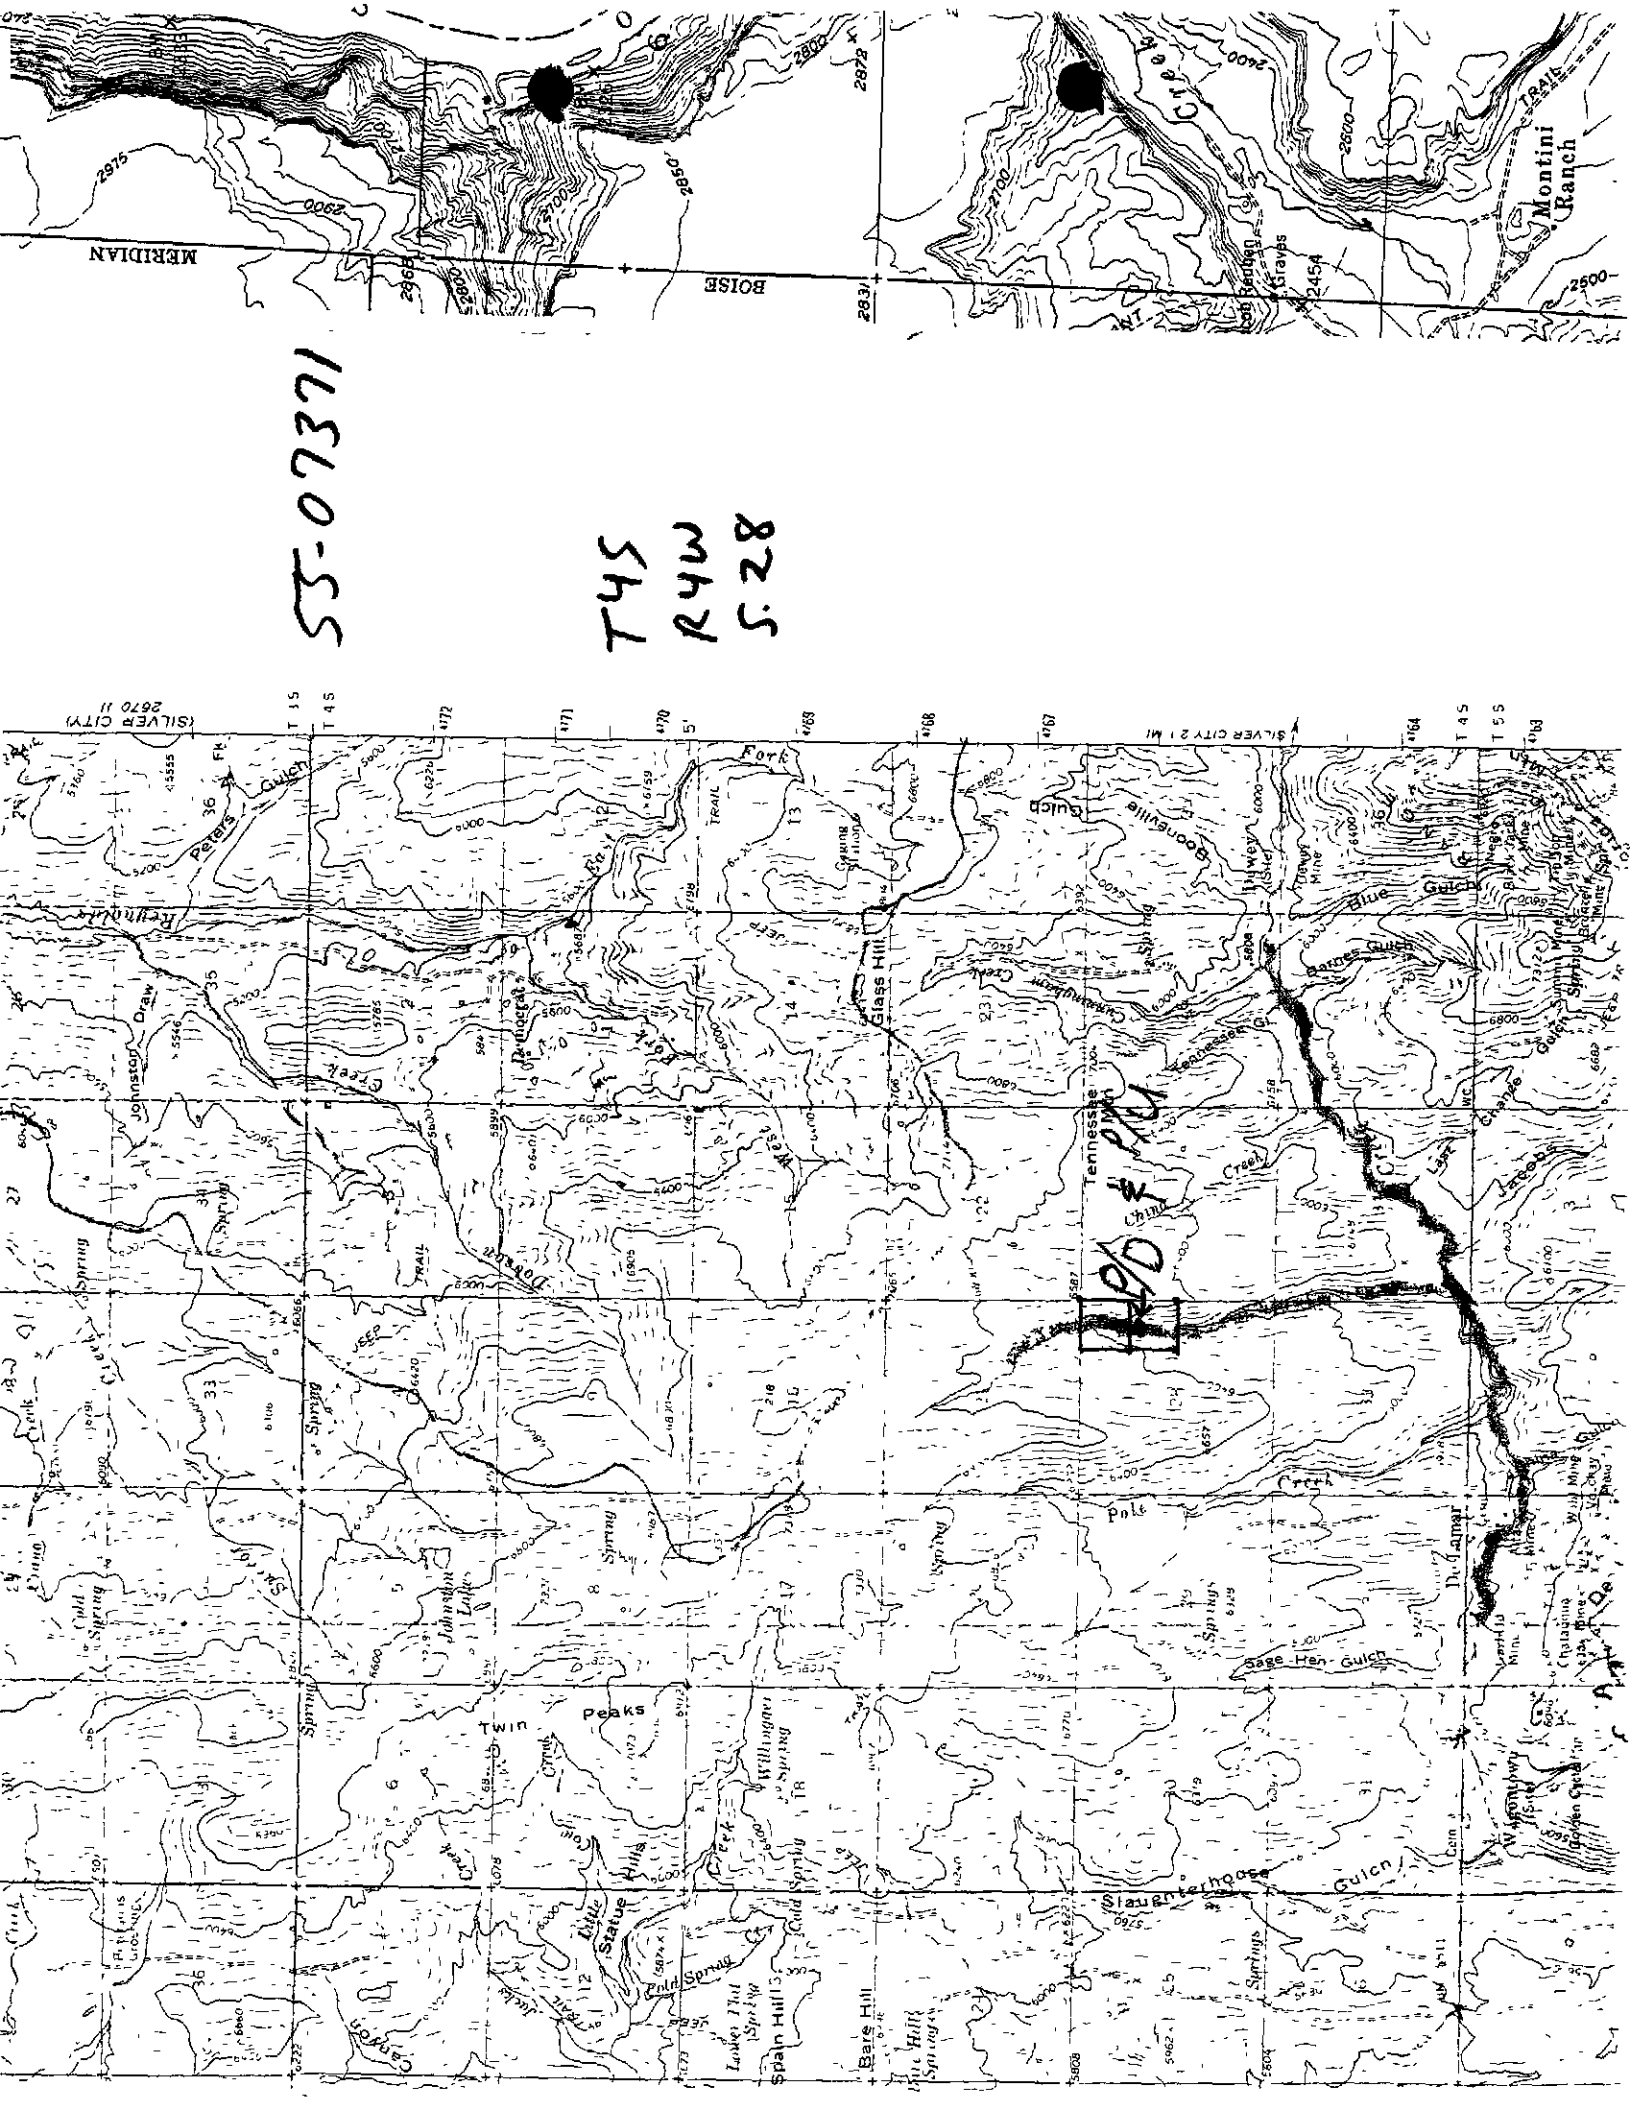

VOLUME COMPARISON FOR THE DIRECT FLOW LICENSING RECOMMENDATION:

80 head * 0.0134 = 1.07 afa **
vs .03 cfs * 365 * 1.9835 = 21.7 afa

RECOMMENDED AMOUNTS:

	RATE		VOLUME
Stockwater	<u>0.03</u> CFS		<u>1.1</u> AFA **
Wildlife	<u>0.03</u> CFS		<u>1.1</u> AFA
TOTAL	<u>0.03</u> CFS		<u>1.1</u> AFA
