NOTICE OF PENDING ORDER VOIDING PERMIT

Dear Permit Holder(s):

The development proposed in Permit to Appropriate Water No. 55-07228 was examined in 1989 by Department of Water Resources personnel. At the time of the examination, the Department personnel discovered that the actual point of diversion differed from the point of diversion proposed in the permit.

We have attempted on several occasions to persuade you to file an application for amendment of Permit No. 55-07228 with the Department. To date, the application for amendment of the permit has not been filed with the Department.

Enclosed is a completed application for amendment of your permit which reflects the correct point of diversion. You should sign the application for amendment, and return it to this Department accompanied by a \$20 filing fee within thirty (30) days of the date of this letter.

Should you fail or refuse to submit the application for amendment within thirty (30) days, the Department will act to void your permit. The grounds for voiding the permit are set forth in Section 42-219, Idaho Code, where it states that if the Department finds "that the applicant has not fully complied with the law and the conditions of the permit . . . [it] may refuse issuance of a license and void the permit." One of the conditions of the permit was that the point of diversion and/or place of use would be located as indicated on the permit.

RE: Permit No. 55-7228

Donald J. & Grace H. Ferris
Star Route
Jordan Valley, OR 97910

Dear Mr. and Mrs. Ferris:

Enclosed is a copy of your approved Application for Permit. We direct your attention to the conditions of approval on the fourth page.

The exercise of this permit may also be affected by the outcome of a case that has recently been decided by the Idaho Supreme Court entitled Idaho Power Company vs. State of Idaho, et al., Idaho Supreme Court Case No. 13794. The decision, filed on November 19, 1982, indicates that flows of water through the power plant at Swan Falls are entitled to protection from uncompensated depletion of flows upstream of Swan Falls. The court found that such flows in the Hells Canyon reach of the Snake River are not similarly protected, but rather are subordinated to future upstream depletions for consumptive uses. The full impacts of this decision are not yet clear, and the case has been partly remanded to the District Court so further litigation on the matter is forthcoming. The Department of Water Resources has been advised that Idaho Power Company is not waiving any rights to contest or limit the exercise of your permit or subsequent license.

Be sure to note the special condition requiring you to install a measuring device, or an access port to provide for the installation of measuring equipment by the Department. Enclosed please find a list of measuring device options, and specifications for the installation of the access port.

The 1982 Idaho Legislature added a requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.
