CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, and applicable Idaho law.

3. Narrative: Description (As operating at time of measurement. Indicate pressure, number of sprinklers, etc.)

An expended 5" diameter culvert serves as a spring line at the very productive Sommeraug Spring. A buried 4" pipe leads 22' SW to a 2" diameter culvert (also expended) that contains a valve and reduced 1 1/4" line. 14' of 4" pipe spring from valve and provides overflow into a drainage. The 1 1/4" drainage flows to the Runs approx 300' at 230' azimuth to a valve that controls flow to the treugh 15' from valve. The treugh is 14' x 4' x 2' tall. Stockwater for 300 head of cattle for 4 months/year is provided.

During the spring runoff period, the 4" pipe runs full, according to owner. Even this late in a dry year, the spring overflow was substantial.

H. REMARKS AND OVERLAP REVIEW ANALYSIS

Note Oregon address although Mr. Farris lives in Idaho.

The other 4 troughs shown in diagram on page 1 are on BLM land. The troughs are used by stock owned by Mr. Farris and other ranchers. I can find no other WR's showing Sammarcamp Spring as a P.D. (as of 11/23/87).

Additional information obtained 12/7/87 from Kim Schultsmeier, Boise District, BLM.

After calling Kim and discussing BLM license SS-2216 & 7279 and the 4 troughs, also served by Sammarcamp Spring, he indicated that he will work with Jan on changing the license to update information and provide adequate water right protection on all 4 troughs. The troughs are in: NWNE and NWNW S. 4, NWNE (or NENW) S. 5, and SESE S. 6. SEE PROVISIONAL MPP, ATTACHED.

Re: ~~55-7050~~, 55-7052, and 55-4140

Dec. 8, 1987

Dear Mr. Ferris:

After completing your stockwater exams and doing the necessary research, I have some answers to your questions. First, your area is included in the Adjudication.

Second, the Sommercamp Spring situation consists of the spring, buried pipeline, and five troughs. Your water right, 55-7050, covers the trough near the spring. The other four troughs are on BLM land in sections 4, 5, and 6. Two of the troughs are covered by two BLM licenses, 55-2216 and 55-7279. The other two troughs will be added to these BLM rights. All four places will show Sommercamp Spring as a point of diversion. The BLM will be notified of the necessary steps to take.

The last issue concerns your Permit 55-7052 for the spring in Section 12, across the Cow Creek Road from your house. As we discussed, the claim 55-4140 includes the land (SW1/4 of NE1/4) shown on the permit. The claim has a much earlier priority date (1896) than the permit (1972). Your interests would be served by relinquishing the permit and amending the claim to include an additional point of diversion in the SW1/4 of NE1/4, which is the spring we drove to, by the trough. It is probable that this spring was inadvertently omitted from the original claim filing.

Please look over the attached amended claim to see if it is complete. A copy of the original claim is included for your benefit. If there are any other overlooked springs within the area in Section 12 that have been historically used and are still used, be sure to include them on the amended form. When you are satisfied that the information is correct, please return the signed and notarized claim to this office. No fee is involved. By giving up the Permit and changing the Claim as described, you will have a water right that has an earlier priority date, more water, more points of diversion, and a greater area of use than allowed under the Permit. This should be of great benefit during the Adjudication.

Also, the enclosed Relinquishment form for 55-7052 needs to be completed and returned. If you have any questions or need additional help, please contact this office.

Dear Mr. Ferris:

One of the conditions of approval of your water Permit No. 55-7050 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before November 1, 1977. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.
