Description of required amendments. Comments.

Mr. Pershall accompanied me on the insp. showing the locations of the stock ponds. It took the whole day to cover ground. Trip was made by 4x4 and on foot. This being a dry year only 3 ponds still had water in them. There would be no possible way to measure the runoff water the pond was estimated by J. St. Marguerite and constructed according to their recommendations. All the dams are in and have been used since 1963
