Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. The ditch will carry more water than 6.4 cubic feet; have seen about half that carried

Ques. 6. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Irrigation and domestic. NE $\frac{1}{4}$ NE $\frac{1}{4}$ 30; NW $\frac{1}{4}$ NE $\frac{1}{4}$ 15; SE $\frac{1}{4}$ NE $\frac{1}{4}$ 20; SW $\frac{1}{4}$ NE $\frac{1}{4}$ 25; NE $\frac{1}{4}$ NW $\frac{1}{4}$ 20; SE $\frac{1}{4}$ NW $\frac{1}{4}$ 20. 20 acres in NW $\frac{1}{4}$ NW $\frac{1}{4}$ and 40 acres in SW $\frac{1}{4}$ NW $\frac{1}{4}$ will be irrigated as soon as permanent flumes over Blue creek can be installed

Ques. 7. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. For irrigation and domestic use only

Ques. 8. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. Sandy loam. A miner's inch at least for each acre

Ques. 9. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. No

Ques. 10. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. In July and August annually for four years past: I should say about 125
miners' inches have been applied to the land now irrigated. Of course, more than this
will be required when the condition mentioned above has been cared for.

INSTRUCTIONS
PROOF OF COMPLETION OF WORKS

Boise, Idaho,
March 17, 1919.

Se K. Imel,
Riddle, Idaho.

Dear Sir:—

Under the terms of your permit No 11264, you are required to complete your diversion works on or before June 3, 1919. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

W. G. SWENDSEN,

State Engineer.
