Dear Mr. Buley:

In answer to your letter of August 5, 1936, in which you request to know the capacity of the Big Blue Reservoir, Little Blue Reservoir and Alder Reservoir located in Owyhee County.

The capacity of the Big Blue Reservoir is 1,131 acre feet, the capacity of the Little Blue Reservoir is 2,000 acre feet, and the capacity of the Alder Reservoir is 1,240 acre feet.

When license was issued on this water right for storage water the right was given for the filling of the Reservoir only once, however, there is a note in the Alder Creek Reservoir file stating that this Reservoir fills two to three times during the summer months. This note was signed by our home examiner from this office.

You also wish to know the amount of fillings on Shoofly Creek, Payne Creek, Hit Creek, Squaw Creek, and Big and Little Blue Creeks. The information as well as other information will be found on the attached sheets.

Very truly yours,

Attention: Roy Thompson

Dear Mr. Thompson:

We are in the process of making a appraisal on a large cattle ranch in the southern part of Owyhee County which presently belongs to a Mr. C. A. Sewell of Elko Nevada.

I would like to know the capacity of the three following reservoirs:

Big Blue, located in the SW corner of section 12 Township 13 S. Range 2 E. 1131 AF.

Little Blue, in the SW 1/4 of section 16 T13 S, R 3 E. - 2000 AF.

Alder, in section 32 T 14 S R 4 E. 1240 AF. fills 2 1/2 times during season.

Also any information which you might be able to furnish in regards to the water rights served by these 3 reservoirs and water from Shoofly Creek, Payne Creek, Nit Creek, Squaw Creek, and Big and Little Blue Creeks. If possible I would like your opinion on how often these reservoirs could be expected to fill.

I would like to thank you in advance and greatly appreciate any help that you are able to give me on the above questions.

Sincerely Yours,

Linn N. Buley

Dear Sir:

Will you kindly send us a copy of water license No. 5512. From information at hand it appears that this license was issued November 15, 1915, by J. H. Smith. It has to do with twenty feet of the waters of Blue Creek, an independent stream in Owyhee County.

Very sincerely yours,

BISSELL & BIRD

RE: PERMITS NOS. 5512, 8905, 1173, 16723

December 12, 1932

Blue Creek Land & Livestock Co.
Elko, Nevada

Attention: Mr. Gedney

Dear Mr. Gedney:

Acting upon your request to check up on the status of your water rights upon Big Blue Creek, Little Blue Creek, Indian Creek, and Elder Spring and Marys Creek, I find as follows:

Permit No. 5512 has license bearing the same number for 12.7 second feet of the waters of Blue Creek with date of priority of November 30, 1909. Permit No. 8905 has a license for 12.5 second feet of the waters of Blue Creek with priority of November 15, 1912. Neither of these filings give the location of any dam. The former, however, does describe the structure, but names the point of diversion several miles below the point where the dam is situated.

Permit No. 8905, also for the waters of Blue Creek, makes no mention of any reservoir, and names the same point of diversion as Permit No. 5512, with license for 12.5 second feet. There are, however, approved plans of these dams which do give the location of the reservoirs and dams. The plans for the Big Blue Creek dam were approved October 5, 1905, and those for the dam on Little Blue Creek were approved May 22, 1905.

Plans for the Duck Valley Irrigation dam were approved November 27, 1904.

Permit No. 1173 for the waters of Elder Spring and Marys Creek received a license for 26.2 second feet, with a priority date of March 11, 1913. Permit No. 16723 for the waters of Indian Creek has been given field examination, and will receive later the license to which it is entitled.

Trusting this information may be of value to you, I am,

Very truly yours,

Field Engineer

Dear Sir:

We have your letter of the 5th inst., in which you request sketches of the reservoirs of the BLUE CREEK LAND AND LIVESTOCK COMPANY. This company has only one filing, and that is for three cubic feet per second of the waters of INDIAN CREEK. Joseph A. Sewell has two licensed water rights; one for 18.7 sec. ft., and the other for 19.5 sec. ft. of the waters of BLUE CREEK. Since Mr. J. A. Sewell is President of the BLUE CREEK LAND AND LIVESTOCK COMPANY, it is quite probable that his filings are the ones you refer to.

If you desire a copy of the plats which accompanied Mr. Sewell's filings, we will furnish same upon request.

Dear Sir:

I enclose herewith the following forms to be used in connection with proof of completion of works under your permit No.

Deposition of Permit Holder, **5512.**

Depositions of Two Witnesses.

In submitting this proof the following instructions should be CAREFULLY followed out, since failure to do so may result in the loss of your rights:

1. On November 20th the date set for proof of completion of works, the enclosed deposition forms (one for permit holder and one each for two witnesses) should be filled out and sworn to, at Grassmere,

before Geo. W. Irons, N.P.
2. When the depositions have been taken they should be mailed to this office, together with affidavit of publication of notice and fee of \$5.00, where amount claimed does not exceed 10 second feet. Where more than 10 second feet is claimed, the fee required is 30 cents per second foot. When these have been received, together with report of the examining engineer, if everything is properly executed, Certificate of Completion of Works will issue.

Boise, Idaho, Aug. 12, 1913.

Dear Sir:

I enclose herewith blank form upon which to give notice that you are prepared and desire to submit proof of completion of works under your permit No. 5512

This form should be filled out and mailed to the State Engineer at least 60 days before the date upon which it is to be submitted, which proof MUST be on or before **Nov. 30,**

Upon receipt of this blank properly filled out, notice must be published a period of four weeks prior to the date of proof.

The proof may be submitted at any place convenient to you and two witnesses, where there is a Notary Public or other officer authorized to administer oaths.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.
