E. NARRATIVE/REMARKS/COMMENTS

Typical springbox, pipeline to tire-type stock tank.

This is a separate development from nearby BLM
springbox (pipe & metal stock tank per BIR
SNAPP.)

Both Rights list Rose Cr. Spring as source but are
2 separate developments. Probably same spring but
it occurs in a generalized area instead of a
pin-pointed spot.

This is all on State land.

P/D barely within NENESE & possibly occurs in
SESENE so listed 2 AQQ with single pld
Remark. This is a clarification instead of an
amendment. Same is true for p/u.

Stock use is 250 range cattle. Use includes
wildlife per Application item 8b.

No development was built from Rose Creek.

Have conditions of permit approval been met? ☒ yes ☐ no

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 55-07416

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

I note that the permit issued to you by the department requires the installation of a lockable device to allow the department to determine the rate of diversion. The proof which you submitted does not show that you have installed this equipment.

The installation of the lockable device must be complete by the time the department representative conducts the examination of your system unless the department has rescinded the requirement prior to the field examination. In some cases, the equipment requirement can be rescinded because the equipment cannot be physically installed, is not appropriate or can be accommodated with other measuring methods.

If you have questions concerning this matter, please feel free to contact the WESTERN Regional Office in Boise at (208)334-2190.

Sincerely,

Rita Fleck
