Subject: Applications for Transfer No. 71865 and 71794

Corey:

We have reviewed the applications for transfer from Del Signore (Transfer No. 71865) and Roger Blass (Transfer No. 71794). It is our understanding Mr. Signore's application involves transferring his portion of water right 37-20802 (0.15 cfs irrigation and stock water from Broadford Slough) into his name and adding a downstream point of diversion for use of an existing ditch that crosses his property. Approval of this transfer should have minimal negative impacts on fish and wildlife resources in the area.

The Blass application involves formally adding a POD for water rights 47-4464 and 47-17182 from the LS2 drain that was installed in 1993 when the applicant changed his irrigation system from gravity to sprinkler. Approval of this transfer should have minimal negative impacts on fish and wildlife resources in the area.

Thanks for the opportunity to comment. Please call if you have any questions.
