RE: Correcting the Licence

IDWR issued Permit 67-7531 for the irrigation of 22 acres. The field examiner reported that the permit holders irrigated 6.1 acres. For some unexplained reason, IDWR issued the license for 22 acres. It appears that the license was printed from the old permit data, not from the draft license data, by mistake. Adjudication Bureau staff identified the discrepancy when they compared the SRBA claim, which was for 6.1 acres, to the license. IDWR explained the issue to the right holders and asked them to sign a revised licensing amendment, which they did. To correct the error, IDWR will issue a corrected license. The corrected license will be a preliminary order that can be contested in accordance with IDWR's Rules of Procedure.
