

MEMORANDUM

Date: June 14, 2005
To: Transfer 72033 File
From: Corey Skinner
Re: Evaluation of Sufficiency of Information Submitted

Transfer proposes adding points of diversion and changing the service area boundary for the City of Hansen municipal water system. Currently the city has three groundwater rights (47-4465, 47-7530, and 47-7650) each listing a separate well as an authorized point of diversion. The application proposes identifying each of the three existing wells, and a fourth new well to be drilled, as authorized points of diversion for each of the rights and increasing the service area to include additional tracts of land around the city limit boundary.

- **Authority to File:**
IDWR records show the applicant as the current owner of the rights involved with the transfer. Application was signed by George Urie, the mayor of the City of Hansen.
- **Water Right Validity:**
The rights involved in the transfer are based on preliminary SRBA recommendations (not yet reported to the court).
- **Injury to Other Water Rights:**
None anticipated.
- **Enlargement of Use:**
None anticipated.
- **Local Public Interest:**
No negative impacts anticipated.
- **Beneficial Use/Conservation of Water Resources:**
Proposed use is recognized as a beneficial use of water.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
