IN THE MATTER OF LICENSE)

JAMES K. PENINGER)
_____)

**ORDER GRANTING PETITION
FOR RECONSIDERATION**

This matter having come before the Department of Water Resources (Department) as a petition to reconsider the issuance of a water right license, the Department makes the following Findings of Fact, Conclusions of Law, and Order:

FINDINGS OF FACT

1. On May 9, 1990, the Department of Water Resources issued Permit No. 72-07466 (permit) to James K. Peninger (right holder) authorizing him to appropriate 0.20 cubic feet per second from groundwater to be used for irrigation, stockwater, and domestic purposes within the SW¼NW¼, Section 12, Township 13 North, Range 19 East, B.M., Custer County.
2. On April 28, 1993, the Department received Proof of Beneficial Use for the permit.
3. On July 24, 1998, the Department conducted a field examination and found that the right holder had developed a portion of his water use at a different legal description than authorized by the permit.
4. On January 12, 1999, the Department sent notice to the right holder stating that the permit has to be amended before the Department can issue a water right license including the portion of use developed at a different legal description than authorized by the permit. An Application for Amendment form was enclosed with the notice.
5. On February 2, 1999, the Department sent a second notice to the right holder stating that the permit has to be amended before the Department can issue a water right license.
6. The Department did not receive the Application for Amendment of the permit by March 2, 1999.
7. The provisions of Section 42-219, *Idaho Code*, authorize the Department to issue a license for the portion of the water use that is in accordance with the permit.

MICROFILMED

APR 14 1999

8. On March 3, 1999, the Department mailed the right holder a preliminary order (order) granting Water Right License No. 72-07466 (license) in the name of the right holder.
9. On March 17, 1999, the right holder filed a Petition for Reconsideration (petition) with the Department in connection with the order. In the petition, the right holder asks for additional time to submit the Application for Amendment of the permit.

CONCLUSIONS OF LAW

1. Section 67-5243(3), *Idaho Code*, provides in pertinent part as follows:

Unless otherwise provided by statute or rule, any party may file a motion for reconsideration of a recommended order or a preliminary order within fourteen (14) days of the issuance of that order. The presiding officer shall render a written order disposing of the petition.

2. The petition was filed with fourteen days of the service date of the order.
3. The Department should conditionally grant the petition for reconsideration of the order pursuant to Section 67-5243(3), *Idaho Code*, to give the right holder an opportunity to submit the Application for Amendment of the permit.

ORDER

IT IS HEREBY ORDERED that the petition is **GRANTED** pursuant to Section 67-5243(3), *Idaho Code*, to allow the right holder 30 days to submit the Application for Amendment of the permit.

Dated this 29TH day of MARCH, 1999.

The amended preliminary order can and will become a final order without further action of the Department unless a party petitions for reconsideration or files an exception and/or brief as described in the enclosed information sheet.

I have also enclosed a copy of the order granting your petition for reconsideration and a copy of your application for amendment, which was approved.

If you have questions, please contact me at (208) 327-7946.

Responding to Preliminary Orders Issued by the Idaho Department of Water Resources

The Idaho Department of Water Resources (Department) issues water right permits, licenses, and transfers as preliminary orders pursuant to section 67-5243, Idaho Code. A preliminary order can and will become a final order without further action of the department unless a party petitions for reconsideration or files an exception and/or brief as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the Department within fourteen (14) days of the service date of the order. The Department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See section 67-5243(3), Idaho Code.

EXCEPTIONS AND BRIEFS

Within twenty-one (21) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from a preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding. Otherwise, a preliminary order will become a final order of the Department.

If any party appeals or takes exceptions to a preliminary order, opposing parties shall have twenty-one (21) days to respond to any party's appeal. Written briefs in support of or taking exceptions to the preliminary order shall be filed with the Department. The Department retains the right to review the preliminary order on its own motion.

ORAL ARGUMENT

If the Department grants a petition to review a preliminary order, the Department shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Department will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Department orders otherwise, all oral arguments will be heard in Boise, Idaho.

APR 14 1997
APR 14 1997

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Department in connection with a preliminary order shall be served on all other parties to the proceedings in accordance with Rules of Procedure 302 and 303.

FINAL ORDER

The Department will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Department may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

RE: WATER RIGHT NO. 72-07466

Dear Permit Holder(s):

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms that a water right has been established in compliance with the terms of the permit. The examiner who verified your water use reported that your place(s) of use is in a location other than what was described on your permit. Therefore, before a license can be issued, the permit must be amended to depict your water right as it was actually developed.

The enclosed Application for Amendment form depicts the place(s) of use and other information as it will appear on the license when it is issued. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it with the \$50.00 filing fee within 14 days.

Also, please note that some of the proposed conditions of approval and remarks may be modified upon further administrative review.

If you do not concur, or if you have any questions about this information, please contact me as soon as possible. My telephone number is (208)327-7946.

E. NARRATIVE/REMARKS/COMMENTS

FROM: Georgia Satterlee
DATE: 19 August 1998
RE: 72-07466

On 24 July 1998, I met with Mr. & Mrs. Peninger to conduct a field examination. The permit calls to a well for domestic, stockwater, and irrigation use. The well is located in Lot 1 of Block 2 of the Blue Bird Subdivision (aka NESWNW $\frac{1}{4}$ Section 12, T13N, R19E).

The well diverts water on Lots 1, 2, 11, and 12. All the lots are in Block 2. Mr. Peninger owns Lot 2 in Block 1 (across the road from their home) but water is not applied to this property from the point of diversion.

According to Charlene Miller, who is the district secretary for the Challis Irrigation Company, the Peninger's pay for 1 share of water.

While conducting examination, I viewed the pasture to the east with standing water. Mr. Peninger said he uses the surface water (in addition to the sprinklers) from the Challis Irrigation Company. The rest of the property is irrigated with (4) sprinklers that have an output of approximately 3 gpm.

The field examination verified that the well serves one home with a yard. The well also supplies stockwater to 5-7 horses and mules, and is used to irrigate approximately 3.5 acres.

The Well Driller's Report shows the proposed use as domestic. Perhaps the Peninger's need to pay the additional non-domestic fee?

The place of use is separated by the 1/16th section line. There are 2.4 irrigated acres in the SENW $\frac{1}{4}$ of Section 12, T13N, R19E. The 1.6 acres are irrigated in the SWNW $\frac{1}{4}$ of Section 12, T13N, R19E.

The recommendation for domestic is for one home only, stockwater, and the irrigation use will include the yard, for a total of 4.0 acres of irrigation.

Have conditions of permit approval been met? ☒ yes ☐ no

PROOF DUE NOTICE

RE: PERMIT NO. 72-07466

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before June 1, 1993. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Karen L. Gustafson

PERMIT APPROVAL NOTICE

RE: PERMIT NO. P72-07466

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

Please note the requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.

We have enclosed a form entitled "Instructions for Proof of

MICROFILMED

Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.
