G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 4 \times 3.5 = 14$

$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = 0.28 \times 184 \times 1.9835 = 102.2$

$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 14 \text{ AFA}$

2. Volume Calculations for Other Uses:

Domestic - 53 units x 0.6 AFA/unit = 31.8 AFA

H. REMARKS AND OVERLAP REVIEW ANALYSIS

Use is for "Old Sawmill ~~Tram~~ Station" RV + Trailer Park. There are 47 numbered spaces, & 5 additional spaces with water lines but without power meters. Only 3 mobile homes & a couple RVs were present during exam - occupancy is down from previous levels. One house foundation was built for Mr. Hurless, but no home was built - he is working in Alaska for several years. Allow 53 domestic uses.

Property is not shown on aerial photo, but appears to cover a little under 6 acres. About 4 acres of grass are irrigated.

Pump capacity appears to be much greater than permitted, so recommend standard rates be licensed (up to permit limits). Well log not available.

Irrigation use of 4 acres allows 0.03 cfs/acre to be licensed - permit allowed 0.02 cfs/acre for 7 acres.

Exam is not part of SARA - no claim filed or required.

RE: Recommendation Adjustment(s)

=====

The final licensing recommendations for the above referenced water right are based on the information below:

F. FLOW CALCULATIONS

The recommended capacity has been reduced based on an adjustment to the theoretical calculation. The pumping level has been increased to 20' rather than 10'. The attached well log is an example of the average static water level for that $\frac{1}{4}$.

$$\frac{8.8 \times .7 \times 7.5 \text{ hp}}{20' + (2.31 \times 40 \text{ psi})} = .41 \text{ cfs}$$

RE: PERMIT NO. 72-07461

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. Enclosed is an order advancing the priority of the permit since the proof was received after the proof due date. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the SOUTHERN Regional Office in Twin Falls at (208)736-3033.

Sincerely,

Rita Fleck

LAPSE NOTICE

RE: PERMIT NO. 72-07461

Dear Permit Holder:

You are hereby notified that under the provisions of Section 42-218A, Idaho Code, the above referenced permit has lapsed and is of no further force nor effect. The department provided the proper forms to you in our proof due notice dated March 31, 1991. No further construction or additional development is authorized under this permit unless it is reinstated.

The permit can only be reinstated if you submit an acceptable proof of beneficial use or an acceptable request for extension of time to the department within sixty (60) days of the mailing of this lapse notice. An acceptable proof of beneficial use submittal must include the examination fee or a completed field examination report. A request for extension of time must be accompanied by a fifteen dollar (\$15) fee.

Enclosed again for your use are a proof of beneficial use form and a request for extension of time form. Please note that only one extension of time can be granted unless the project has not been completed because of lack of a necessary approval by a government agency or by litigation which may bring title to the water in question.

PROOF DUE NOTICE

RE: PERMIT NO. 72-07461

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before June 1, 1991. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Rita Fleck

PERMIT APPROVAL NOTICE

RE: PERMIT NO. P72-07461

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

Please be advised that water quality is subject to regulations of the Idaho Department of Health and Welfare. We suggest that you check with them before starting construction.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of

MAILED

Re: Application for Permit No. 72-07461

Dear Applicant (s):

The Department of Water Resources acknowledges receipt of your water right application for permit. The application has been assigned the above referenced identification number. Please refer to this number in all further correspondence.

This office will be advertising the application in the Challis Messenger on 2/1 & 2/8/90. A period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our State Office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Very truly yours,

James E. Stanton
Sr. Water Resource Agent

Dear Mr Hurless,

Returned herewith is your application for a water permit and any fees submitted. Also enclosed are instructions and a partially filled out application blank with a map attached.

Preliminary review of the application indicates that some of the information required to make the application acceptable for receipt by the Department needs to be completed or clarified. I have tried to reach you by phone several times to address these items, but have been unable to contact you. The following items need your attention.

Item 4. You indicated that you would use 0.28 cfs for irrigation of 7 acres. The appropriate diversion rate for 7 acres is 0.14 cfs. The partially filled out form has made this correction. Also, you indicate that the component of use is commercial. If the whole park is for R.V.'s this designation is appropriate. If the whole park is for installed trailer (mobile) homes then a multiple domestic use would be appropriate. If there are both then both uses would be indicated on the form in addition to the irrigation use.

Item 5. Information provided on the form indicates that your pump delivers 125 gallons per minute, which is the same as 0.28 cfs. If you have plans to enlarge your pump you may wish to indicate a larger pumping rate, up to the total of the individual uses. The value you indicate is perfectly all right, but I thought I'd let you know about the possibilities.

Item 7. If the development is already completed indicate 1 year. If you plan to upgrade the pump within 2 years, for instance, indicate 2 years. Check the instructions for further details.

Item 12. Please fill in the blank on when the well was developed. If you have a copy of the well log please submit a copy with the application, the Department does not have a record of the well being drilled. Providing as much information as possible will reduce the need for additional communications, delays and so forth.

Item 13. Draw the outline of your property on the attached map and label the well location. If you have a more detailed map of the park enclose a copy with the application.
