### ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 72-7388, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before January 1, 1988.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

e. Other: Permit holder shall commence the excavation or construction of diverting works within one year of the date this permit is issued and shall proceed diligently until the project is complete.

The issuance of this permit in no way grants any right-of-way or easement across the land of another.

Use of water under this permit shall be non-consumptive.

Witness my hand this 27<sup>th</sup> day of December, 1985.

## H. REMARKS AND OVERLAP REVIEW ANALYSIS

Purpose of diversion is to raise water level in pond. Due to gravelly nature of substrate, however, pond leaks quite a bit. Water is supposed to float the gold dredge, a 988-ton tourist attraction.

Land is unsurveyed. Legal descriptions are based on projected survey lines.

Use is non-consumptive, so no annual volume is shown.

## I. RECOMMENDATIONS

RE: Permit No. 72-7388

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before January 1, 1988. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a completed field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this Department on or before the above described proof due date, or the permit will no longer be of any force nor effect.

Sincerely,

RITA FLECK  
Secretary/Records Manager

Dear Mr. Lindburg:

Re: Permit No. 72-7388

In answer to your letter of August 15, 1987, yes there is one more requirement you will need to fulfill prior to licensing.

The Idaho statutes requires that every permit holder submit a proof of beneficial use form. This form is a signal to the department that a project has been completed and is ready for an on-site inspection. For your convenience, I've enclosed a proof of beneficial use form along with an instruction sheet/fee schedule. Read the instruction sheet carefully.

Note that proof is not due on this permit until January 1, 1988 at which time the department will send you notice sixty days prior to that date. You can, however, submit proof.

If you have any questions concerning this matter, please feel free to contact this office.

Total number of acres to be irrigated \_\_\_\_\_

10. Describe any other water rights used for the same purposes as described above. N/A

11. a. Who owns the property at the point of diversion? U.S. Forest Service, Challis Nat'l Forest
- b. Who owns the land to be irrigated or place of use? U.S. Forest Service Challis Nat'l Forest
- c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing. The Yankee Fork Gold Dredge Association has a special use permit with the U.S. Forest Service - Challis Nat'l Forest

12. Remarks: The Yankee Fork Gold Dredge is a boat and is supposed to float. However, the last few years, the water in the Dredge Pond has been disappearing and now is almost dry and the Dredge is sitting on the bottom. More water is needed to level the dredge as the front end is settling. The Dredge used to float before Jordan Creek was diverted from it.

Dear Mr. Lindburg:

Your application for permit for water from Jordan Creek was received in our office October 9, 1985.

However, before we can continue processing we need additional information.

Item 3 - Point of Diversion, needs to be described down to the 10 acre tract. According to the map you drew, this would be the NESWSE, Sec. 8. Your application only shows this down to the 40-acre tract SWSE.

Item 4 - Rate of Diversion, needs to be shown. You show diversion volume, but not the rate at which this volume will be diverted from Jordan Creek.

Item 9 - Place of Use, does not agree with your map. You show the N1/2NE1/4, Sec. 17, while the map shows NWNE, Sec. 17.

Please correct these errors on the enclosed 'copy' of your application. We will then change your application accordingly.

If you have questions concerning this matter, please feel free to contact this office.

Very truly yours,

James E. Stanton  
Sr. Water Resource Agent
