RE: BLM Permits

During the field examination conference with BLM staff, it was discovered that the permits did not accurately describe the stockwater and livestock developments.

The storage ponds constructed were actually on-stream, not off-stream as the permits indicate and the animals do use the natural channels as a water supply. Therefore, the diversion to storage component is used as natural flow diversion on the field exams.

No amendment of the permits are recommended.

Gentlemen:

Enclosed are copies of your approved Applications for Permit. We direct your attention to the conditions of approval on the fourth pages.

The 1982 Idaho Legislature added a requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permits were issued, and you must proceed diligently until the projects are completed. The enclosed blue cards must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permits were approved.

We have enclosed instructions entitled "Making Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop these permits into licenses.

Sincerely,

DAVID R. TUTHILL, JR., P.E.
Supervisor, Water Allocation Section
