SRBA DECREED RIGHT GIVEN PERMIT NUMBER

Original permit 72-07230 was filed for stockwater use by means of stock troughs. In the SRBA process, the Forest Service filed a beneficial use claim matching the point of diversion description and the claim was thus assigned the permit number. The claim, however, is a reflection of instream stockwatering, while stockwater use via the troughs has been confirmed by permit examination and still requires a license to be issued. Rather than re-numbering the SRBA claim, it was decided to re-number the permit. The new number assigned for the stock troughs is 72-07576 and all the original permit documentation can be found in the newly numbered file.
