INSTRUCTIONS

This form has been prepared to assist new owners of property to comply with the requirements of Sections 42-248 and 42-1409(6), Idaho Code. Section 42-248 requires certain property holders to notify the Department of Water Resources (IDWR) of any change in mailing address or ownership of all or part of a water right record on file with IDWR. Section 42-1409(6) provides that new property owners must notify IDWR of any change in ownership of a water right during an adjudication of water rights. Required claims may be filed by a new owner.

Separate brochures are available from IDWR describing the adjudication of water rights and the requirement to notify IDWR of changes in ownership. Please contact your nearest IDWR office, or call 1-800-451-4129, if you would like more information or need help completing this form. Please attach additional sheets to the form if you require additional space to describe or explain any of the items on the form.

1. If there are water rights associated with the property, the seller should be able to provide you with the water right or adjudication claim number(s). Please enter these number(s) at Item 1. If you or the seller believes there are water rights for the property but the numbers are unknown, you may wish to contact IDWR for assistance in identifying the water rights for the property in question. If claims for the rights are required, and have not been filed, IDWR will so advise you.
2. The information described at Item 2 is required, since IDWR cannot process the requested change without documentation of ownership. The preferred types of documentation are shown; contact IDWR if you have difficulty obtaining this information. Do not obtain a new survey for purposes of this form before contacting IDWR.
3. Please provide the name and address of the former owner of the water right and/or adjudication claim at Item 3.
4. The name, mailing address, and telephone number of the new owner(s) is entered at Item 4. Please indicate the relationship between multiple owners by using the connector 'and', 'or', or 'and/or'. If an 'and' is used, all parties must sign this form. If an 'and/or' or 'or' is used, all parties may sign. However, only one of the named parties is required to sign.
5. At Item 5, please provide the date the property in question was acquired. This may be the date of "closing" in the case of a real estate transaction or the date of court order for other types of ownership changes.
6. You may be purchasing only a portion of the total water right held by the seller. This means the water right held by the seller may be "split" to provide your share of the right in question. Be sure to include a description of the portion of the water right you have purchased at Item 6.

Please provide as much detail as possible concerning your water right: include the number of homes, irrigated acreage if more than 1/2 acre is irrigated, type and number of stock if your right is for stockwater, etc. In the absence of information to the contrary, IDWR will assume the intent is to split the rights *proportionately*.

7. The new owner(s) must sign the form in the space(s) provided at Item 7. Corporations and other organizations must submit a list of directors or officers demonstrating the authority of the director or officer to sign the form.
8. There is no filing fee. When complete, you should retain a copy and return the original of the form to the IDWR office nearest you:

RE: WATER RIGHT 72-07184

Dear Mr. & Mrs. Hoggan:

The Department is in receipt of the correspondence changing ownership of the above referenced water right to you. We have modified our records to reflect this change in ownership and a computer generated report is enclosed.

Just a reminder, because of a law that went into effect July 1, 1996, all water right owners are required to report change of address or ownership to the department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee to the water right owner. If you have other water rights that haven't had the ownership updated please contact the department as soon as possible.

If you have any questions regarding this matter, please feel free to contact me at (208) 327-7947.

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. The issuance of this right in no way grants any right-of-way or easement across the land of another.
6. Domestic use is for 1 home.

H. REMARKS AND OVERLAP REVIEW ANALYSIS

Unable to locate diversion on my own-impossible to see line from spring to ~~the~~ home, as it is deeply buried & overgrown with natural vegetation. There is no question that the system exists, however.

Domestic use for home without lawn, and watering of a few horses.

Mr. Searles stated that he has not used the pond, & will probably fill it in. He also stated that pasture along the road was irrigated in the past via a buried pipeline. But the system was not visible during my visit, and the ground showed no visible signs of irrigation. It has obviously been some time since this ground was watered, since it was in a completely natural state. I therefore cannot recommend licensing for irrigation use.

Mr. Searles stated that the water supply has been substantially reduced due to several years of drought conditions in the drainage.

Gentlemen:

Enclosed is the examination fee information you requested. On the reverse of your form, I note that for single family use or stock water use, there is no fee. We are using the water for one household and a few head of stock. If this does in fact require a fee, please let me know and I will remit immediately.

I have a problem on the field examination portion, however. My husband and I have temporary jobs in Nevada at this time and there is no one available to show the field examiner the water system. Since we have piped the spring a total distance of 6,000 feet to the house, it might be hard for the examiner to find and look over the system without our being there. We expect to return to Idaho sometime in December, but this might also be inconvenient for the examiner (depending on the snow conditions).

Please let me know how we might be able to resolve this problem so that you can get up there and make your field examination.

Thank you,

RE: Permit 72-7184

Dear Mrs. Searles:

We are returning your examination fee information form for signature and payment of the examination fee.

A review of your permit and the information form indicates that a fee of \$50.00 is due based on a quantity of .2 cfs of water.

Once the fee is paid, the water right remains in the permit stage with no changes until an examination can be made and a license issued.

Since you are not on the property at present and it may not be possible to operate the system for examination in December when you return, we will plan to make the examination during the summer of 1987.

Please let us know if you have any questions.

Very truly yours,

Loren O. Holmes, P.E.

CERTIFIED MAIL

EXAMINATION FEE NOTICE

Dear Permit Holder:

Department records show that proof of beneficial use has been submitted for the above-referenced permit, but that a field examination has not yet been conducted to determine the extent of beneficial use of the water for licensing purposes.

House Bill 671 (effective April 4, 1986) enacted by the 1986 Idaho Legislature requires the payment of a fee before this department can conduct the field examination needed to issue a license confirming use of water under the permit. This letter is notification that the license examination fee is due within sixty (60) days of the date of this letter. The examination fee information sheet (enclosed) must be returned with the fee.

As an alternative to submitting the fee, the department will accept a field examination report completed by a certified water right examiner from the private sector. If you choose to have the examination done by a certified water right examiner, you need not submit the license examination fee to the department, but you must within sixty (60) days of the date of this letter return to the department, the examination fee information sheet showing appropriate information together with a statement from the certified examiner to verify that you have retained a certified examiner to conduct the field examination. If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot later change your decision to use this alternative and submit the fee needed for the department to conduct the field examination, but you may change to another certified examiner.

Certified water right examiners are licensed engineers or geologists certified by the department to conduct water right examinations. The procedure for certifying examiners results from the recently enacted HB 671 and is being developed at this time. A listing of certified water

AUG 21 1992

right examiners will be available from this department when examiners have been certified.

If your permitted use, in fact, has already been examined by the department and you have not asked to have the examination repeated, the fee requirement is not applicable to your permit. If you believe this is the case, please contact the department.

The license examination fee is to be based on the amount of water you indicate you have developed, as listed in item 6 on the examination fee information sheet. The amount of water on which the examination fee is based can be less than the permitted amount, if less water has been diverted and beneficially used. The licensed amount of water, however, will not exceed the amount you claim on the examination fee information sheet. The enclosed license examination fee schedule shows a listing of applicable fees.

FAILURE TO SUBMIT WITHIN THE SIXTY (60) DAY PERIOD, THE FEE OR THE STATEMENT THAT A CERTIFIED EXAMINER HAS BEEN RETAINED TO MAKE THE FIELD EXAMINATION, WILL BE CAUSE TO ADVANCE THE PRIORITY OF THE PERMIT ONE DAY FOR EACH DAY THAT THE FEE SUBMITTAL IS LATE.

FAILURE TO SUBMIT THE FEE OR THE COMPLETED FIELD EXAMINATION REPORT WITHIN A YEAR WILL BE CAUSE TO CONSIDER THE PROOF OF BENEFICIAL USE TO BE INCOMPLETE AND TO LAPSE THE PERMIT.

The attached examination fee information sheet and the fee may be submitted to the following department office.

Dear Mr. Searles:

Re: Permit No. 72-7184

This office acknowledges receipt of the Commencement of Works postcard and your letter dated July 23, 1984 in which you ask what steps need to be taken to license your permit.

The next is to submit the statement of beneficial use. Since your project is completed, simply fill out and return the enclosed postcard. Upon receipt of it, I will notify our regional office that a field examination of the system is needed. Based upon the field examiner's findings and recommendations, a water right license will be issued.

If you have any more questions concerning this matter, please feel free to contact the department.

Gentlemen:

I recently completed construction and development of a water system for which I obtained the above referenced permit. Upon reviewing my permit I found the enclosed "blue card". I am sending you the information now as to commencement and completion dates.

What else must I do to convert my permit to a water license?

Thank you for your attention to this matter.
