MEMORANDUM

TO: FILE NO. 72-04054

FROM: PAM SKAGGS²⁸/STATE OFFICE

SUBJECT: TRANSFER NO. 4566

DATE: May 1, 1995

=====

Transfer No. 4566 was filed to change the point of diversion, place of use and source under Statutory Claim No. 72-04054. The beneficial use under this right has been confirmed by the Snake River Basin Adjudication review. The claim is for use of surface water from the Salmon River, delivered through a ditch with a fish screen, for irrigation of seven (7) acres.

In cooperation with the Idaho Department of Fish and Game, a well will be drilled on the irrigated land to eliminate the need for the ditch system and maintenance of the fish screen. Fish and Game has SRBA Beneficial Use Claim No. 72-10499 for Fish Propagation that is also delivered through the original point of diversion. When the irrigation diversion from the river ceases, it appears that the Fish and Game right will no longer be required.

The irrigation season and diversion volume have been adjusted to reflect current standards. The diversion rate reduced to 0.02 cfs per acre or 0.14 cfs. The point of diversion and place of use have been changed to reflect the location of the proposed well and more accurately describe the existing place of use within the SW quarter of Section 22, T11N, R18E.

Use of Groundwater is limited to those times water is available under this right from the original source, the Salmon River. Other recommended conditions include well drilling permit requirements, irrigation overlap, future measuring device and reporting requirements, nonconfirmation of claim and standard transfer conditions.
