WATER RIGHT LICENSE

WATER RIGHT NO. 71-07121

Priority: October 28, 1988

Maximum Diversion Rate:

0.04 CFS

Maximum Diversion Volume:

1.7 AF

This is to certify, that CHURCH OF JESUS CHRIST OF LATTER DAY SAINTS

REAL ESTATE DIVISION

12TH FLOOR

50 E NORTH TEMPLE ST

SALT LAKE CITY UT 84150

has complied with the terms and conditions of the permit, issued pursuant to Application for Permit dated October 28, 1988; and has submitted Proof of Beneficial Use on May 25, 1990. An examination indicates that the works have a diversion capacity of 0.040 cfs of water from a GROUNDWATER source, and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>ANNUAL VOLUME</u>
DOMESTIC	01/01 to 12/31	0.04 CFS	1.7 AF

LOCATION OF POINT(S) OF DIVERSION:

SENE , Sec. 18, Township 07N, Range 14E
BLAINE County

PLACE OF USE: DOMESTIC

TWN RGE SEC

07N 14E 18

SENE

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Domestic use is for seven cabins, four RV spaces, and a lodge.
6. Place of use is known as the Cabin Creek Organization Camp.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code. Witness the seal and signature of the Director, affixed at Boise, this 29TH day of April, 1995.

MEMORANDUM

TO: File 71-07121 / LDS Church
FROM: Brenda Chapman
DATE: April 11, 1995
RE: Recommendation

=====

The final licensing recommendation for the above referenced water included an extension of the original season of use from 5 months to a full year.

There is a considerable reduction in the recommended rate of flow from the permitted .36 cfs. It is evident that, in comparing the permitted rate of .36 cfs for a 162 day season with the reduced rate of .04 cfs for a full year, there is not an expansion of the original permit.

$$.36 \text{ cfs} \times 162 \text{ days} \times 1.9835 = 115.7 \text{ af}$$

$$.04 \text{ cfs} \times 365 \text{ days} \times 1.9835 = 28.9 \text{ af}$$

MURPHY
 JUN 08 1995

From: Allen Mervitt

(71-07121)

To: SRBA USFS Recreation Claims in Basin 71

Date: 12/15/93

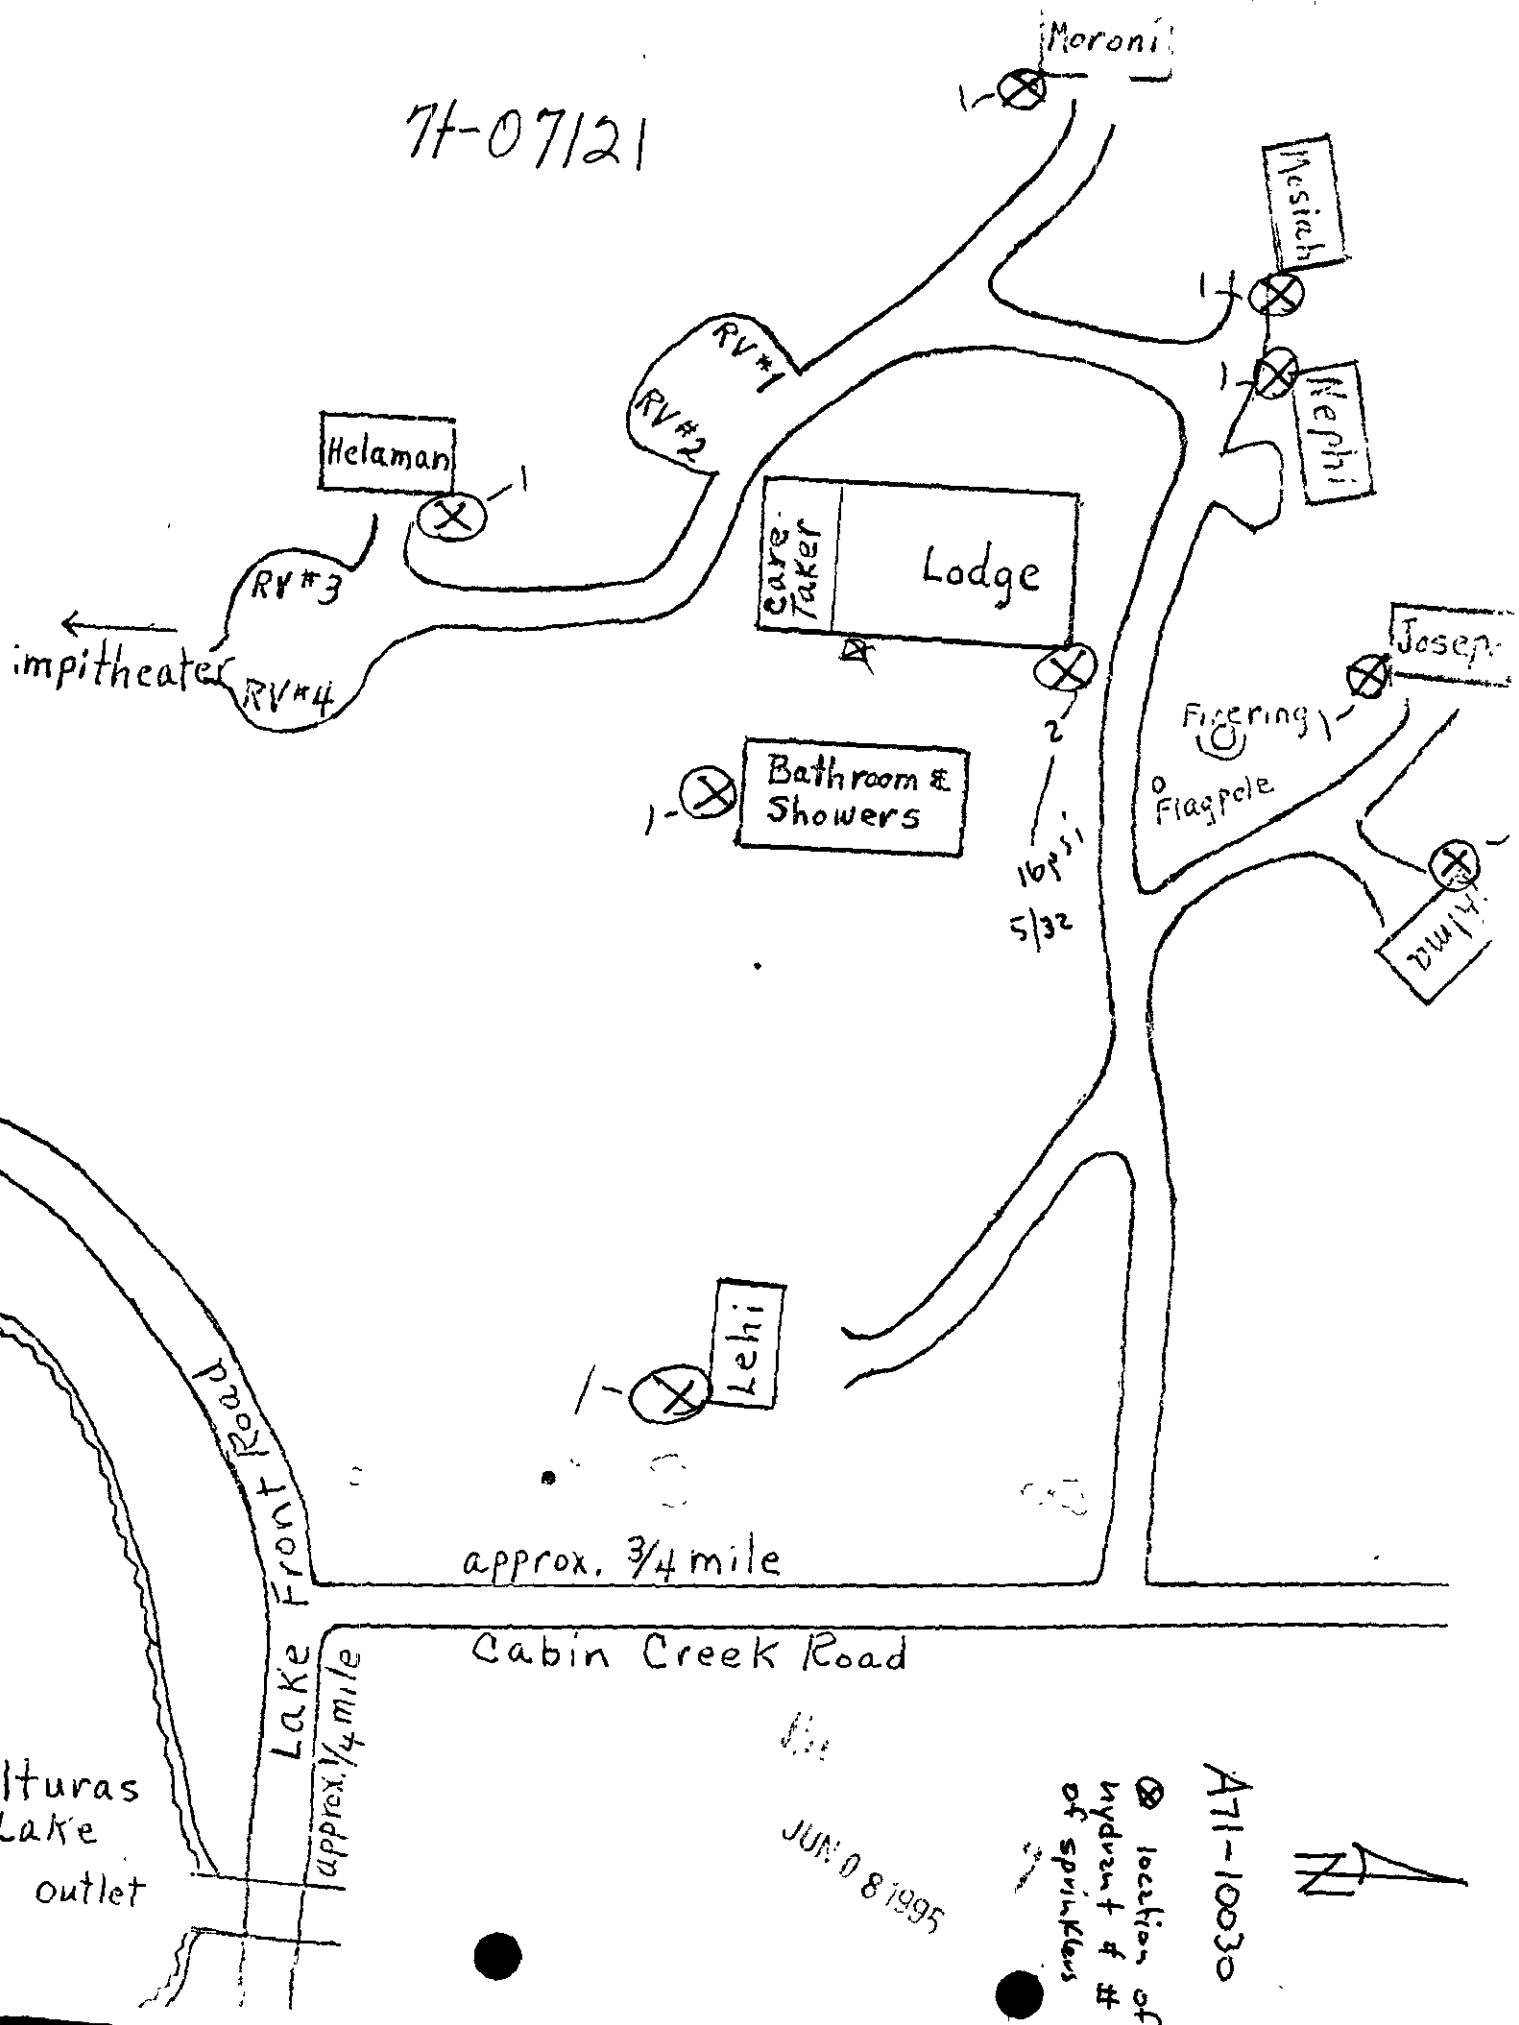

Subject: Season of Use

Review of the claims & licenses finds there is a large variation in the season of use for this area with little reason. In an effort to standardize I contacted Mark Moulton, USFS, to provide insight. We discussed the "Sawtooth Nat'l Forest" Map which provides a season of use for the campgrounds generally 6/15 to 9/15 which is more restrictive than the water rights. Mark indicated the use of the campgrounds is dictated more by weather & budget of the USFS. He indicated that the Map's season would be more of an indicator that the campgrounds would be open. From our conversation and review of the licenses it appears three situations exist: 1. Handpumps; 2. Pipelines; 3. Organization camps. Generally Organization camps can be year-round - Allow 1/1 - 12/31. Generally Pipelines are shut off early to prevent damage and handpumps are used until weather prevents access. Mark indicated that the license appears to support that use starts around 5/1 and pipelines generally shut off after Labor Day (9/30) reasonable and handpumps used into hunting season until snow limits access, (10/31) reasonable.

Organization camps	1/1 to 12/31
Hand pumps	5/1 to 10/31
Pipelines	5/1 to 9/30

AFFIDAVIT TO ESTABLISH PRIORITY FOR WATER CLAIM NUMBER A71-10030

AFFIDAVIT OF JACK M. STANGER

STATE OF IDAHO)
) ss.
County of Twin Falls)

I, Jack M. Stanger, being first duly sworn, deposes and states the following:

1. My name is Jack M. Stanger. I reside at Twin Falls, Idaho. I make this Affidavit of my own knowledge.

2. For many years I have been involved with my church's cabins at Cabin Creek, near Alturas Lake, in the State of Idaho.

3. I know that our well was drilled on August 10, 1956, when we first began building cabins at that location.

4. We used the water for domestic purposes such as drinking, washing, etc.

5. In 1970, we established water at each cabin for fire protection. At that time we also began using creek water upon the site where our cabins sat. We have approximately four (4) acres of wooded property at that location.

6. Our use of the water has been continuous since we first built cabins at that location.

7. We have several cabins on that property together with a nice lodge which is used heavily during the summer months. We need to keep what water we have.

Dated this 30 day of March, 1992.

Jack M. Stanger

Caldwell, Idaho

Dear Bro. Nielson,

Following your recent call, I've made a number of phone calls and have done a lot of research concerning the water at our church camp at Alturas. Through conversations with the well-driller and others who were involved, I have come up with the enclosed affidavit. It has been approved by Pres. Carlson of Twin Falls Stake. I hope it is what is needed. If not, please get back to me.

Sincerely,

Jack M. Stanger

April 7, 1992

Mr. Allen Merrett P.C.
Water Rights Supervisor
Department of Water Resources
Southern Region
222 Shoshone St. East
Twin Falls ID 83301

Dear Mr. Merritt:

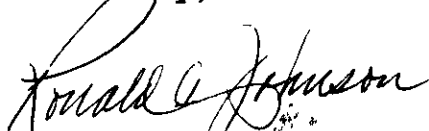

Attached is a letter and a notarized affidavit from Jack M. Stanger to help establish "Evidence of Priority" of water claim A71-10030.

As you can tell, it has taken some calling and searching of memory and couments to establish a time of drilling as this was so long ago.

I hope this will be sufficient in establishing the priority date.

Thanks for your help.

Sincerely,

Ronald C. Johnson
Water Analyst

SPECIAL USE PERMIT

Sawtooth National Forest.

Permission is hereby granted to Twin Falls L. D. S. Stake

of c/o P. L. Schenk, 1226 Birch, Puhl, Idaho 752 Addison Ave. Twin Falls, Idaho

hereinafter called the permittee, to use, subject to the conditions set out below, the following-described lands or improvements:

Organization Site No. 4, Alturas Lake

RECEIVED

DEC 9 1993
Department of Water Resources
Southern Region Office

This permit covers 10 acres and/or _____ miles for the purpose of:

Maintaining an organization site and constructing necessary buildings and other improvements in accordance with plans approved by the Forest Supervisor.

The exercise of any of the privileges granted in this permit constitutes acceptance of all the conditions of this permit.

1. In consideration for this use, the permittee shall deposit with the Regional Fiscal Agent, Forest Service, Forest Service Bldg., Ogden, Utah, a check, draft, or money order made payable to the Treasurer of the United States in the sum of Twelve and 50/100 dollars (\$ 12.50) for the period from July 1, 1954, to December 31, 1954, and thereafter annually on May 1st, Twenty-five

dollars (\$ 25.00). The charges for this use may be readjusted from time to time to place this permit on a basis consistent with the charge to other permittees for like privileges.

JUN 08 1995

2. Construction or occupancy and use under this permit shall begin within 32 months, and construction, if any, shall be completed within _____ months, from the date of the permit. This use shall be actually exercised at least 60 days each year, unless otherwise authorized in writing.

3. Development plans; lay-out plans; construction, reconstruction, or alteration of improvements; or revision of lay-out or construction plans for this area must be approved in advance and in writing by the forest supervisor. Trees or shrubbery on the permitted area may be removed or destroyed only after the forest officer in charge has approved, and has marked or otherwise designated that which may be removed or destroyed. Merchantable timber cut must be paid for by the permittee. Trees, shrubs, and other plants may be planted in such manner and in such places about the premises as may be approved by the forest officer in charge.

4. The permittee shall maintain the improvements and premises to standards of repair, orderliness, neatness, sanitation, and safety acceptable to the forest officer in charge.

5. This permit is subject to all valid claims.

6. The permittee, in exercising the privileges granted by this permit, shall comply with the regulations of the Department of Agriculture and all Federal, State, county, and municipal laws, ordinances, or regulations which are applicable to the area or operations covered by this permit.

7. The permittee shall take all reasonable precautions to prevent and suppress forest fires. No material shall be disposed of by burning in open fires during the closed season established by law or regulation without a written permit from the forest officer in charge or his authorized agent.

8. The permittee shall exercise diligence in protecting from damage the land and property of the United States covered by and used in connection with this permit, and shall pay the United States for any damage resulting from negligence or from the violation of the terms of this permit or of any law or regulation applicable to the national forests by the permittee, or by any agents or employees of the permittee acting within the scope of their agency or employment.

9. The permittee shall fully repair all damage, other than ordinary wear and tear, to national forest roads and trails caused by the permittee in the exercise of the privilege granted by this permit.

10. No Member of or Delegate to Congress or Resident Commissioner shall be admitted to any share or part of this agreement or to any benefit that may arise herefrom unless it is made with a corporation for its general benefit.

11. Upon abandonment, termination, revocation, or cancellation of this permit, the permittee shall remove within a reasonable time all structures and improvements except those owned by the United States, and shall restore the site, unless otherwise agreed upon in writing or in this permit. If the permittee fails to remove all such structures or improvements within a reasonable period, they shall become the property of the United States, but that will not relieve the permittee of liability for the cost of their removal and restoration of the site.

12. This permit is not transferable. If the permittee through voluntary sale or transfer, or through enforcement of contract, foreclosure, tax sale, or other valid legal proceeding shall cease to be the owner of the physical improvements situated on the land described in this permit and is unable to furnish adequate proof of ability to redeem or otherwise reestablish title to said improvements, this permit shall be subject to cancellation. But if the person to whom title to said improvements shall have been transferred in either manner above provided is qualified as a permittee, and is willing that his future occupancy of the premises shall be subject to such new conditions and stipulations as existing or prospective circumstances may warrant, his continued occupancy of the premises may be authorized by permit to him if, in the opinion of the forest supervisor, issuance of a permit is desirable and in the public interest.

13. In case of change of address, the permittee shall immediately notify the forest supervisor.

14. The temporary use and occupancy of the premises and improvements herein described may not be sublet by the permittee to third parties without the prior written approval of the forest supervisor and the permittee shall continue to be responsible for compliance with all conditions of this permit by persons to whom such premises may be sublet.

15. This permit may be terminated upon breach of any of the conditions herein or at the discretion of the regional forester or the Chief, Forest Service.

16. In the event of any conflict between any of the preceding printed clauses or any provision thereof and any of the following clauses or any provision thereof, the preceding printed clauses will control.

17. This permit is subject to the conditions set forth above and to conditions 18 to 27 attached hereto and made a part of this permit.

Date July 16, 1951

A. J. Schow

(Signature of issuing officer)

Acting Supervisor

(Title)

JUN 08 1951

18. The lands described in this permit have been withdrawn for water power purposes under the Act of June 25, 1910 (or are embraced in an application or license under the Federal Power Act of June 10, 1920) and for reclamation purposes under the Reclamation Act of June 17, 1902, and are therefore subject at any time to use in connection with the development of water power or reclamation purposes. This permit therefore is issued with the specific understanding that its exercise shall not interfere with such water power or reclamation development and may be, if necessary, terminated upon ninety (90) days' notice that in the judgment of the Federal Power Commission or the Bureau of Reclamation, the lands occupied are needed for use in connection with the generation of hydroelectric power or other purposes contemplated by the acts under which the lands have been withdrawn.

19. No claim shall be made against the United States or power licensee for or on account of prospective profits or for any injury or damage to properties, improvements, or operations due to such power or reclamation developments. The permittee will be allowed 90 days in which to remove his improvements, after which time, if not removed, they will become the property of the United States.

20. The permittee agrees to observe and comply with all State Laws and County ordinances or regulations concerning sanitation and the protection of health which are effective within the area covered by this permit; to adopt all necessary precautions to prevent the pollution of the waters of streams or springs; to construct toilets or latrines of approved flyproof type, to locate them only at points designated by the Forest Officer, and to maintain them in good sanitary condition; to burn or bury all garbage, debris, refuse, can, etc., resulting from the occupancy of such land.

21. No improvements of any character shall be constructed under this permit until the Forest Officer in charge has approved, in writing, the plans and specifications, including color scheme, signs, and exact location of improvements within the area under permit. No structure will be allowed within 25 feet of front line or within 10 feet of side line of the lot except with the approval in writing by the Supervisor. All buildings will be painted or stained in suitable color to blend with the natural surrounding and such colors must be approved by the Forest Supervisor prior to actual painting.

22. The permittee agrees that in the event the Chief shall prescribe higher standards for the construction, maintenance, and operation of buildings and other improvements constructed and maintained under this permit, he will, upon written notice from the Forest Supervisor, and beginning January of the year following, comply with such higher standards in construction, maintenance and operation to the satisfaction of the Forest Supervisor.

23. The use of fire-arms on or adjacent to this area is prohibited on account of the attendant dangers to other permittees, and the public.

APPROVED
JUN 08 1995

24. Disorderly and otherwise objectionable conduct by the permittee or those occupying and the premises with his permission shall, upon proof thereof, be cause for revocation of this permit.

25. The permittee shall clear and keep clear the premises of all inflammable brush, undergrowth, and other debris, but shall burn no debris or refuse without consent of a Forest Officer.

26. Any landscaping of the area desired by the permittee must be approved by the Forest Supervisor before work begins.

27. No signs or other advertising devices are to be erected or maintained by the permittee except with approval of the Forest Supervisor.

RE: CABIN CREEK ORGANIZATION CAMP ALTURAS LAKE AREA

Gentlemen:

This letter is an attempt of the part of the Cabin Creek Organization Camp to appraise the Sawtooth National Recreation Area and the Forest Service of the past use, present use and maintenance and future plans of the Cabin Creek Organization Camp located near Alturas Lake in the Sawtooth National Recreation Area of Idaho. This statement and information prospectus is given for the purpose of giving the Forest Service enough information on the Cabin Creek Organization Camp to grant to our organization a long term lease for the maximum number of years allowed by the Forest Service regulations and guidelines. Such a lease is needed in order to be able to finance the type of lodge we are planning to build on the premises as outlined in detail hereafter.

Before going into detail, we of the the Twin Falls Kimberly Stakes of the Church of Jesus Christ of Latter-Day Saints who are the owners of the Cabin Creek Organization Camp, wish to express their gratitude for the cooperation, guidance and patience that has been given to us by the United States Forest Service and the Sawtooth National Recreational Area over these last years that we have been at our present location. We hope this cooperative relationship will continue for many years to come.

MAILED
JUN 8 1995

Sawtooth National Recreation Area
August 31, 1984

Past and Present Layout and Improvements

The Cabin Creek Organization Camp facility, as it presently exists consists of seven cabins, restroom facilities including showers, sinks and lavatories, RV hook-ups and parking. All cabins and the restroom are plumbed and are furnished with a refrigerator, stove and adequate furniture for use. The facility is furnished with underground power and an underground irrigation system for watering the land surrounding each of the cabins and the general area of the camp. The access road is graveled and is maintained on a regular basis. Over the years there have been many improvements made to the cabins and they are constantly being upgraded. Grass has been planted surrounding all of the cabins and is kept irrigated through the summer months. And a \$40,000.00 restroom and shower facility was constructed last year within easy access of all cabins.

There is a caretaker couple at the facility through-out the summer months when the facility is at peak use. The caretaker is responsible for maintenance and general care of the camp itself as well as making sure that the guests using the facility adequately care for the camp and obey the rules and regulations as established by the Forest Service. The duties of the caretakers are posted in the restroom and each caretaker knows his assignment. (a copy of said duties are attached to this statement as Exhibit "A".) In addition to the caretaker during the summer months, there is a chairman of the Cabin Creek Organization Camp and a committee under his direction that are in charge of the facility on a year-round basis. Maintenance of the grounds is done on a regular basis, including picking rock, irrigation, weed control, painting and clean up.

MICROFILMED
JUN 08 1995

Sawtooth National Recreational Area

Present Use

The Cabin Creek Organization Camp is used by individuals and families of all ages, both in the summer and in the winter with peak use in the summer months. Throughout the summer the facility is used for family recreation, family reunions and family organization meetings, scout outings and youth and adult leadership training. There is no time in the summer when the facility is not in use. In the winter the scouts and other youth groups use the facility but the use is not as often as in the summer.

Future Plans

In the future, the Cabin Creek Organization Camp plans to continue the constant maintenance program we have established in these past years. This includes the upgrading of all of the cabins in the surrounding area to facilitate our extensive training and recreation programs. We also plan more camp sites and RV parking as the need increases. Perhaps the greatest undertaking as far as future plans are concerned, is our proposal to construct a lodge facility. It is hoped that the construction of the lodge will increase the use of the camp ten-fold. It will allow us to have a large building in which to meet all together with the youth and those other individuals who use the facility. It will also allow us to have a caretakers apartment in a central location so that he can better perform his duties and responsibilities during the time that he is in charge of the facility. The lodge is to be constructed just southwest of the present restroom building. It is to be of a log construction approximately 82' X 32' in size. (The tentative plans for the lodge (PLANS APPROVED, 6/86) are attached to this prospectus as Exhibit "B".) The final specifications and plans, of course, will need to be constructed pursuant to Forest Service regulations and zoning laws within Blaine County and the laws of the State of Idaho. Those final plans and specifications are

RECEIVED
JUN 08 1995

Sawtooth National Recreation Area
August 31, 1984

presently being drawn by Jack Christensen, and will generally be along the same lines as the plans attached to this prospectus. The lodge as planned will have a construction cost of approximately between \$90,000.00 and \$100,000.00.

As can be seen from the plans it will provide an area large enough to seat 128 to 160 people and has restroom facilities, kitchen facilities and a large fireplace. At one end, it is proposed at this time (and is reflected on the plans) that we construct a caretakers apartment for use when the caretaker is in the camp.

We presently have a portion of the funds necessary for construction collected and pledged and anticipate that the entire amount of the construction costs will be collected prior to the completion of construction. Construction is planned to commence approximately June 15, 1985, and is set for completion approximately September 1, 1985. All work is scheduled to be done on a contract basis with some volunteer work being done as it can be scheduled.

Our plan is to work closely with the agencies necessary to make sure that we comply with all necessary regulations, zoning laws, ordinances and statutes. We are open to any suggestions that the Forest Service would offer and hope that the lines of communication will remain as open as they have in the past so that we can build the best lodge facility in the Alturas Lake area.

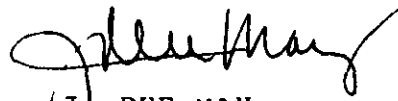

In order for us to finance such an undertaking, it is necessary for us to have the maximum term lease that the Forest Service can possibly allow us. This would give us some sort of security in knowing that if we finance such an undertaking, we will be able to use it for the longest time possible. We realize that in the past the Forest Service has been more than willing to renew the leases and permits if proper maintenance has been done and if the regulations have been complied with; however, it is felt that a maximum term lease is absolutely essential.

RECEIVED
JUN 08 1995

Sawtooth National Recreational Area
August 31, 1984

It is hoped that this information will give the Forest Service a picture of the Cabin Creek Organization Camp as it presently exists and what its plans for the future are. We request that our lease be renewed for the maximum time period allowed in order for us to commence the construction of our lodge facility and to continue to use the marvelous recreation area around Alturas Lake as we have in the past. We thank you for your consideration and are willing to furnish whatever additional information is necessary upon your request.

Very truly yours,

J. DEE MAY
Representative Cabin Creek
Organization Camp

ORGANIZATION CAMP MASTER PLAN CRITERIA

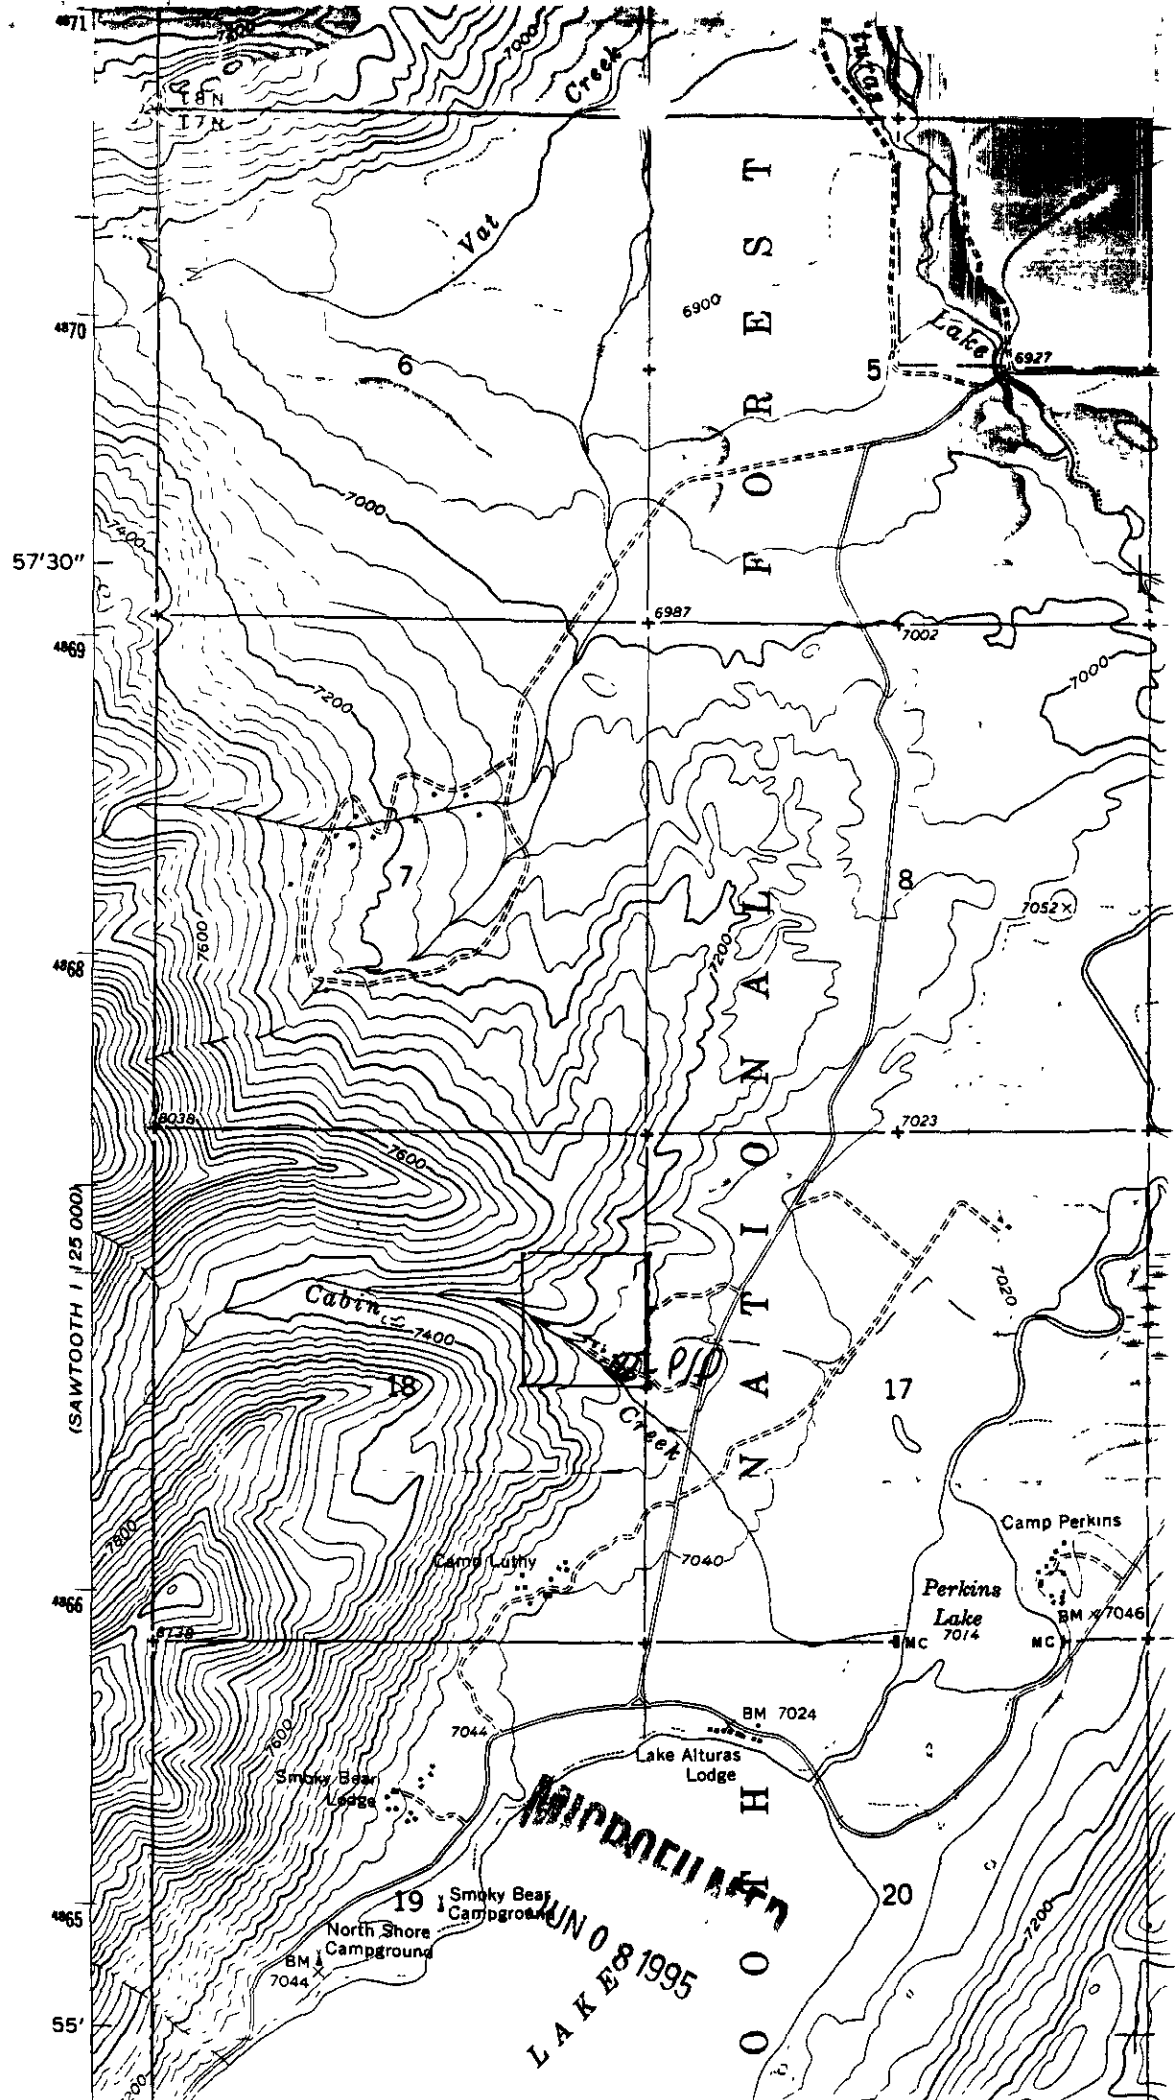

The following list of criteria must be met or evaluated before any organization camp master plan will be approved:

1. Meets management direction.
2. Meets State, Federal, and local laws, regulations, codes, and ordinances.
3. Meets or is compatible with existing VQO.
4. Stays within existing site boundaries.
5. Is compatible with FSM 2720 and 2340 Organization Camp Policies.
6. Establishes a camp carrying capacity which will not adversely impact resources within camp and surrounding National Forest areas.
7. Establishes a workable camp design compatible with L.A. concerns and recommendations.
8. Development will not occur:
 - (a) within 100 feet of any lake shore or live stream channel
 - (b) within a 100-year flood plain
 - (c) on fragile soils
 - (d) within avalanche runout zones
 - (e) within heavy aspen stands.

Any plan which meets each of these criteria and raises no additional concerns particular to its location will be approved with an E.A. categorical exclusion. A plan which does not meet the above criteria or which raises additional concerns must be evaluated further through the E.A. process.

RE: PERMIT NO. P71-07121

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.

Sincerely,

GARY SPACKMAN, Supervisor
Water Right Permits Section

Re: Application for Permit No. 71-07121

Dear Applicant (s):

The Department of Water Resources acknowledges receipt of your water right application for permit. The application has been assigned the above referenced identification number. Please refer to this number in all further correspondence.

This office will be advertising the application in the Wood River Journal on 4/19 & 4/26/89. A period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our State Office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Very truly yours,

Douglas Jones, E. I. T.
Water Resources Engineer
