CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.

WATER RIGHT LICENSE

WATER RIGHT NO. 71-07063

CONDITIONS/REMARKS:

4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. This right does not constitute Idaho Public Utilities Commission or Federal Energy Regulatory Commission approval that may be required.
6. This right when combined with all other rights shall provide no more than .03 cfs per acre nor more than 3.0 afa per acre for the lands above.
7. The water right confirmed in this license for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this license and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this license.
8. Domestic use is for 1 home.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code. Witness the seal and signature of the Director, affixed at Boise, this 28TH day of DECEMBER, 1993.

That under the terms and conditions of said permit, work thereunder was required to be completed on or before

Department of Water Resources

December 1, 1987

That he has heretofore performed the following work described under said permit

(This must be filled out! If no work has been completed put none)

Domestic water right: Completed. Installed 700 ft. 1" pipe. System has been in use since 1981.

Irrigation water: Completed. Diversion and ditches have been reconstructed & in use since 1982.

Power: Constructed measurement weir and completed engineering & design studies

for a cross-flow turbine hydro power system. Have arranged for construction of turbine, to be installed in
summer of 1986. Costing \$ 650.00

That he is unable to complete the remainder of the work within the required time for the following reasons, to-wit:

Power: Needed additional time to research available technical data to
build economical, small cross-flow turbine which can operate in
severe spring and fall weather conditions [STANLEY, ID] and with low water head.

Wherefore, he asks that the Department of Water Resources extend the time for the completion of obligations

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 71-7063, and said application is hereby approved.

1. Approval of said application is subject to the following limitations and conditions:

- a. SUBJECT TO ALL PRIOR WATER RIGHTS.
- b. Proof of construction of works and application of water to beneficial use shall be submitted on or before December 1, 19 85.
- c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.
- d. Other: (1) An access port or other device as specified by the Department shall be installed by the permit holder to provide for the installation of measuring equipment and the determination of the rate of diversion by the Department.
(2) This permit is subject to the provisions of Sections 42-205 through 42-210, Idaho Code, restricting the sale, transfer, assignment, or mortgage of this permit. Failure to comply with these provisions is cause for immediate cancellation of this permit.
(3) This project shall be operated in a manner that will not conflict or interfere with the future upstream diversion of water for irrigation or other beneficial consumption.
(4) This permit does not constitute Idaho Public Utilities Commission or Federal Energy Regulatory Commission approval that may be required.

Log check dam in stream, concrete headworks into 8" buried pipeline 200' to power generator. About 15' of drop in system. Onan 170 2446 generator 2.25 kW.
Rock check dam & earth ditch for irrigation. 1" plastic pipe serves 2 homes (71-7063 & 7064). 1 Rainbird sprinkler does a small lawn of about 1/2 acre.
Ditch system has existed for many years as part of old ranch. 700' of domestic pipeline to Schneider home. Ditches are quite small & shallow, probably would only water the Schneider property. Mr. Schneider assumes that he got water rights with the property, but isn't clear as to exactly what those rights might be. Water returns to Goat Cr. in NE/NW Sec. 17. H. REMARKS AND OVERLAP REVIEW ANALYSIS

System waters about 1/2 acre around the house, and another acre of general forest area, according to Mr. Schneider. About 1/4 acre is sprinkled from domestic line, the rest is watered by old ditches. Main purpose is to keep down fire danger.

There is no place in the power system for a measuring device. System is totally non-consumptive. No other rights are affected by this diversion. Recommend measuring device requirement be dropped.

Lower developed supplies power for permittee's summer cabin.

Also have well for domestic use, but well is not hooked up.

Permittees travel extensively during the winter, and are only available during 5-1 to 10-1.

Upper P/D is approximate on the quad map. Due to wet weather, I did not walk into the site. I did observe the domestic pipeline on the Schneider property, however.

I. RECOMMENDATIONS

1. Recommended Amounts Not to exceed 0.05 cfs for all irrigation rights combined on this property.

PROOF DUE NOTICE

RE: Permit No. 71-7063

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before December 1, 1987. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a completed field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this Department on or before the above described proof due date, or the permit will no longer be of any force nor effect.

Sincerely,

RITA FLECK
Secretary/Records Manager

Re: Application for Permit # 71-7063

Dear Mr. Funderburg:

Replying to your letter of September 16 I am enclosing the affidavit to establish residence and a short summary of our plan to use the water appropriation.

There is an old, presently unused irrigation ditch which crosses our property along Goat Creek and which diverts water immediately downstream from the culvert where the stream first meets the property. The ditch parallels the stream for approximately 150 feet at which point it lies about 10 feet above the ditch. It is at this point we plan to drop the water back into the stream using the 10 foot drop for head.

We are studying two methods for developing this hydro site; either using a water wheel with a shaft driven alternator, or by installing a cross-flow turbine which can operate with a relatively low head. In either case it is hoped that approximately 2,000 to 2,500 watts can be developed which with the use of a 12 volt system and batteries could be used for lighting and perhaps some light appliances including a refrigerator.

Since you have viewed the site you are aware that there is a considerable flow of water past our property all summer ~~most~~ of which isn't used for irrigation purposes until it is diverted into pastures a half mile or so downstream. No diversion structures are needed, merely the removal of temporary sod dams on our property which presently keep the water out of the ditch. For the last five years to my certain knowledge no one has attempt to use this ditch other than ourselves although it does flow through ~~our~~ property and across other land at a lower elevation.

It probably will be a year or so before we could begin construction of this site because of other unfinished projects at the cabin. And I am awaiting awaiting brochures from the Bell Hydroelectric Co. regarding crossflow turbines before deciding the most practical method of developing this resource. If any more information is needed please advise.

Sincerely,

Dick Schneider
