DEPARTMENT OF WATER RESOURCES
CLAIM TO A WATER RIGHT

Under the provisions of Section 42-243, Idaho Code, any person using or claiming rights to the public waters of Idaho established by diversion and application to a beneficial use must file a claim with the Department of Water Resources on or before June 30, 1983. Exempted from this filing are single family domestic uses as defined in Section 42-230(d), Idaho Code. Also exempted are rights represented by a permit, license, decree, adjudicated right, or a previously filed claim.

The filing of this claim does not confirm the water right claimed but failure to file may result in forfeiture of a water right.

Notice is hereby given that C. William Goodwin &/or Kathryn Goodwin

claims a right to the diversion and beneficial use of the surface or ground water. The extent and nature of said claim is as follows:

(1) Date of priority: (When was the water first applied to a beneficial use) Aug. 1, 1902

A claim is not acceptable on a ground water source with a priority later than March 25, 1963 or on a surface water source with a priority later than May 20, 1971. An exception is that a claim may be filed on single family domestic use from a ground water source.

(2) Describe the source of water (Name of stream, lake, spring, etc., or ground water)
Goat Creek tributary to Valley Creek

(3) Describe the purpose for which the water has been used and the time during the year when you have used the right claimed:

SUBJECT: TRANSFER NO. 3890

DATE: October 26, 1993

=====

Review of Transfer No. 3890 raised several questions, requiring contacting the applicant. I spoke with Jack Redmond on this date regarding the transfer and found that he no longer owns the property in question and has no further interest in the transfer. He also states that Randall Hays has no possessory interest in the property.

I requested a withdrawal letter from Mr. Redmond to close the matter. The file will be held pending receipt of the withdrawal letter.

SUBJECT Pre-Transfer Exam, 71-4021, Redmond/Hays

On 8-15-91, I inspected the property involved in this transfer. The system of irrigation ditches from Champion Creek was readily visible from the home site. However, only about 10% of the ranch showed any beneficial use of water. The rest of the claimed land is covered by heavy sagebrush growth. Most of the grass growth is along the ditch at the ~~north~~ ^{west} end of the place. Water was flowing in this ditch during my visit (maybe 1-2 cfs), apparently headed for another property. I do not believe that the system can be operated so as not to irrigate 3 acres along the ditch in order to irrigate 1 acre around the home, at least as the system is presently built. IT would probably not be practical to install a pipeline in place of some of the ditch, as the ditch follows the curve of the hill. Transfer should be denied unless this question is resolved by the landowner.

Pereira Landscaping of Hailey told me that the domestic well at the house will water the 1/4 acre of lawn and maintain the pond. Owner does not plan to tap Champion Cr. at this time, but wants the right to do so in the future. Based on the recent 1-year rule, this makes the transfer speculative. It hardly makes sense to use dirty stream water in a buried sprinkler system when clean well water is available.

RE. TRANSFER OF WATER USE

Dear Mr. Holmes,

First, thank you very much for your continued effort and expertise in walking me through the tangled web of the Champion Creek water rights issue. Enclosed you will find my best effort at trying to complete the application for transfer of water right. I may have made some errors. I did not calculate the cfs. The landscaper gave me the figure of 11,000 gallons per day. Essentially what I am doing is to irrigate a new area east of the present use area by deleting an equivalent amount of water from the present area. The Forest Service has given us the certificate of approval for our landscaping plans but they wish to have some notice of approval from your office.

Mr. Merritt forwarded a letter to me concerning a conflict of water rights in Section 15. As per our discussion and your research the historical water (A71-04021) right I am claiming is in Section 22 (license? decree?)

Thank you again for your efforts. My plans are to tentitively begin the landscaping project around June 13th if the transfer application is completed and approved.

Sincerely,

RE: Transfer of portion of 71-02047 claimed under SRBA A71-02047A

Dear Mr. Redmond:

Based on our phone conversation this day please find enclosed the transfer application you requested which will allow the modification of an existing water right. As you indicated you wish to take your existing water right and move a portion of it to an area where you plan to landscape around a house. As you indicated the area around the house has not been historically irrigated but you choose to dry up a portion of your land that has been irrigated in trade for allowing this new development. If this represents your intentions then the enclosed application should accomplish this modification of the existing water right.

Enclosed please also find copies of the claims which have been filed for the historical right 71-02047 in the Snake River Basin Adjudication. (These claims are numbered A71-02047A and A71-02047B) Note that there exists a conflict in ownership of the historical water right which will need to be resolved before your transfer can be approved. In returning your transfer application you will need to provide documentation of your ownership to a portion of the historical water right.

If you have any questions please refer your questions to Loren Holmes, the Regional Manager, of our office.

Sincerely,

A handwritten signature in dark ink, appearing to read 'Allen Merritt'.

Attention: Mr. Loren Holmes

Department of Water Resources
Southern District Office

Gentlemen:

I am filing an exception to the Notice of Application for Water Right No. 71-4021 published in the Challis Messenger on 5/14/81 and 5/21/81 for 4.80 C.F.S. of water from Champion Creek, a tributary to Salmon River, by a Mr. Jack E. Monroe.

I am filing this exception for the excessive amount of water above the original filing for that land description and point of diversion. Mr. Monroe probably overlooked the fact that the Forest Service bought a portion of the original homesteads and that some water rights were to have gone with that land sale. Also, on short water years, Champion Creek will not furnish the kind of filing that Mr. Monroe is requesting, and still fill other water rights that are licensed. I have been familiar with Champion Creek since the 1930's and have owned land that is irrigated from that stream since 1947.

Another reason for filing this exception is that Mr. Anchustequi (along in the 1950's) made an additional filing and the Department of Reclamation disallowed it for various reasons, and the amount of water that Mr. Monroe is filing on was never used continuously since 1940 as he states.

Very truly yours,
