RE: License No. 65-22752 - Issuance of License

Dear Water Right Holder(s):

The Department of Water Resources has issued the enclosed Water Right License confirming that a water right has been established in accordance with your permit. Please be sure to thoroughly review the conditions of approval and remarks listed on your license.

The license is a PRELIMINARY ORDER issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action by the Department unless a party petitions for reconsideration or files an exception and/or brief within fourteen (14) days of the service date as described in the enclosed information sheet.

Enclosed is a copy of the approved Application for Amendment.

Please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the Department or visit the Department's homepage on the Internet to obtain the proper forms and instructions.

If you have any questions, please contact me at 208-327-7946

Sincerely,

Shelley W. Keen

Water Rights Supervisor

SWK:klt

Enclosure(s)

CERTIFICATE OF SERVICE

I hereby certify that on July 26, 2004 I mailed a true and correct copy, postage prepaid, of the foregoing PRELIMINARY ORDER(Approved License) to the person(s) listed below:

RE: WATER RIGHT NO.

65-22752

**MAC GREGOR LAND & LIVESTOCK LTD PARTNERSHIP
PO BOX 107
SWEET ID 83670**

A handwritten signature in black ink, appearing to read "Kari Lynn Townsend", is written over a horizontal line.

**Kari Lynn Townsend
Secretary**

**EXPLANATORY INFORMATION
TO ACCOMPANY A
PRELIMINARY ORDER**

The accompanying order or approved document is a "**Preliminary Order**" issued by the department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department of Water Resources (department) unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below.

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the department or the Idaho Water Resource Board (Board) is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when

- (a) the petition for reconsideration is disposed of, or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

RE: Water Right Permit No. 65-22752

Dear Permit Holder(s):

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. The examiner who verified your water use reported that certain elements of the permit have been developed differently than described on your permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

Based on the examiner's report, the following elements were developed differently than described on your permit:

 X Point(s) of Diversion

 X Place(s) of Use

 X Other

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it with the \$50.00 filing fee within 14 days.

If you have any questions, please call me at (208) 327-5452.

Sincerely,

Erin Retelle
Water Resource Agent

Enclosure(s) 1

MEMORANDUM

Date: June 15, 2004
To: Water Right File 65-22752
From: ERetelle
Re: Reason for License Amendment

1. Location of (PoD/PoU) reported on permit differs from ground truth
2. Beneficial use of water is storage rather than stockwater. Field examiner indicated a spring directly feeds the 2 af storage pond. There is no instream flow component to justify a stockwater right with a flow rate

[illegible]

3. **Delivery System Diagram:** Indicate all major components and distances between components. Indicate weir size/ditch size/pipe i.d. as applicable.

Y Copy of USGS Quadrange Attached Showing location(s) of point(s) of diversion and place(s) of use (required).

N/A Aerial Photo Attached (required for irrigation of 10+ acres).

Y Photo of Diversion and System Attached

4.

Well or Diversion Identification No.*	Motor Make	Hp	Motor Serial No.	Pump Make	Pump Serial No. or Discharge Size

*Code to correspond with No. on map and aerial photo

D. FLOW MEASUREMENTS

1.

Measurement Equipment	Type	Make	Model No.	Serial No.	Size	Calib. Date

2. **Measurements:** Spring was flowing, but less than 9 gpm.

E. NARRATIVE/REMARKS/COMMENTS:

Water from a spring located at the bottom of a .4 af pond is collected for stockwater use. According to the maps, especially the ortho-photo quad, the pond is located on an unnamed stream and can also collect run-off water, which is why I added unnamed stream as a source. Applicant had constructed a dam on the sloping north sloping side of the pond indicating that the water is tributary to Soldier Creek and does not sink as listed on the permit. At the time of the exam, the spring area was damp and boggy, but not flowing. The surrounding area was very dry, with no sign of any stream action. Applicant did not apply for storage because a flow rate of .20 cfs could fill the pond in 24 hours, but .02 cfs cannot, which is why I recommended a storage component be added to the license. The recommended storage volume is within the parameters of the original permit. The GPS reading located the spring and pond in the SESWSE S5 rather than the NENWNE S8.

Applicant stated that he has 4000 animal unit months (AUMs) when he combines his 11,000+ acres of private and leased ground. His operation generally runs March through November. Based on these numbers, ~450 range cows and 275 dys/yr were used to calculate total volume.

Ten springs/water rights are currently used throughout the property (65-22727, 22728, 22729, 22730, 22731, 22733, 22734, 22750, 22751, 22752). When combined, they should be limited to 4.6 afa based on the AUM capacity of the lands.

Have conditions of permit approval been met? ☒ yes ☐ no

F. FLOW CALCULATIONS

_____ Additional Computation Sheets Attached

Measured Method:

Spring or stream were not flowing

Allow .02 cfs

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$V_{IR} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) =$

$V_{DR} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 =$

$V = \text{Smaller of } V_{IR} \text{ and } V_{DR} =$

2. Volume Calculations for Other Uses:

Required: 450 stock x 12 gpd x 275 dys/325850 = 4.6 afa

Potential: .02 cfs x 365 dys x 1.9835 = 14.5 afa

Pond size: (Triangle shaped) 90 ft x 90 ft x 4 ft average depth/2/43560 = .4 af

H. RECOMMENDATIONS

1. Recommended Amounts

Beneficial Use	Period Of Use		Rate Of Diversion Q (CFS)	Annual Volume V (AFA)
	From	To		
Stockwater	1/1	12/31	.02	4.6
Stock Storage	1/1	12/31		.4
TOTAL			.02 CFS	4.6 AFA

2. Recommended Amendments

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 65-22727 – 65-22734, and 65-22750 – 65-22752

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use forms submitted for the above referenced permits. I am enclosing copies of the proofs you filed, along with a receipt for the fees paid. The next step in the process of developing a water right is for the department to contact you to schedule a field examination to determine and confirm the use being made of the water, and that it meets the permitted beneficial uses.

Be advised that Section 42-248, Idaho Code, requires you or the owner of these water rights to maintain current ownership and address records on file with the department. Forms to file a change of ownership of a water right and/or a change in the address of the water right owner are available from any department office.

If you have questions concerning the field examination, please contact the **Western** Regional Office of the department in Boise at (208) 334-2190.

Sincerely,

Deborah J. Gibson
Administrative Assistant

RE: Permit No. 65-22752

Permit Approval Notice

Dear Permit Holder:

The Department of Water Resources has issued the enclosed permit authorizing you to establish a new water right. Please be sure to thoroughly review the conditions of approval and remarks listed on your permit.

The permit is a PRELIMINARY ORDER issued by the Department pursuant to Section 67-5243, Idaho Code. It can and will become a final order without further action by the Department unless a party petitions for reconsideration or files an exception and/or brief within fourteen (14) days of the service date as described in the enclosed information sheet.

Enclosed is a form entitled 'Instructions for Proof of Beneficial Use.' Please read the instructions carefully since you must take further action to develop this permit into a licensed water right. Also enclosed is a form entitled 'Proof of Beneficial Use.' If your project is already completed, you should complete and submit this form immediately.

Please note that a separate stream channel alteration permit must be obtained from the Department prior to any activity in the stream channel other than construction or maintenance of the diversion structure for your water right(s). Applications for stream channel alteration permits must be filed a least sixty days prior to the commencement of work in the stream.

MICROFILMED

MAR 12 2004

Also, please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the Department or visit the Department's homepage on the Internet to obtain the proper forms and instructions.

If you have any questions, please contact me at 208-327-7946.

Sincerely,

A handwritten signature in black ink, appearing to read "Shelley W. Keen". The signature is fluid and cursive, with the first name being the most prominent.

Eric,

Here is my first attempt at sending you three applications we would like you to comment on. If you do not get all three or have any problems, please let me know.

This office normally completes the processing of an application within a six-week period and is required to take final action shortly thereafter. However, if your agency desires to file a formal protest against the approval of any of these applications, your written protest along with the \$25.00 protest fee for each application protested, must be received in this office by February 3, 2003

Re: Multiple Applications for Permit

Dear Mr. MacGregor:

The Idaho Department of Water Resources (IDWR) received thirteen applications for permit from you several weeks ago. The applications as received were noted as numbers 1 through 13, with a unique number listed in pencil in the upper left corner on each form.

Applications numbers 1, 4, 5, 7-9, and 11-13 are being processed. The other filings – numbers 2, 3, 6 and 10 – are returned for clarification.

First, please confirm that eleven applications describing stockwater cover the same 900 cattle and horses described in the filings. = yes

Application #2

✓ Point of diversion – The topo map suggests the spring is at/near the intersection of four ten-acre tracts and that the application should list all four sites plus a remark stating that a single diversion point at/near the intersection is proposed. See the copy of a topo map I included with this application. If the preceding is correct, list all four ten-acre tracts in item 3 of the application. Clarify the single point in item 12 of the filing. This method can prevent a future amendment to correct the water permit record, saving you \$50 over the life of the permit.

✓ Water use – List stockwater in the first underlined space in item 4.

✓ Request to Process form – Although stockwater is generally non-consumptive, inclusion of dust control per item 8e constitutes a consumptive use. The enclosed form should be used for this application. Most applicants choose the third alternative on the form, "possible future mitigation." The form is needed in this case to allow processing to continue.

N/A
per
deletion
to
this use

MICHAEL
JAN 1, 2003

December 16, 2002

Page 2 of 3

Application #3

✓ Request to process form is needed for an irrigation use.

✓ Beneficial use - No irrigation records can be found for the proposed site. A new irrigation right would be expected to provide a flow rate of at least 0.01 cubic feet per second (cfs) per acre - or ½ miner's inch - or up to the maximum allowed for five acres or less, which is 0.03 cfs/acre. Therefore, the application should describe between 0.05 and 0.15 cfs from the spring to serve five acres. Anything less than the minimum flow rate of 0.05 cfs for five acres would not be considered a beneficial use and most likely would be denied.

If the source only produces 0.02 cfs (1 inch), you could reduce the acres to the maximum associated with an inch of water, which is two acres.

12/31/02
Resubmittal
Needs
Following
✓ Storage use - In either irrigation scenario, water storage associated with a pond holding less than 0.1 acre foot (af) would not be listed as a water use in application items 4 or 5.

Two general rules of thumb are used for storage issues as follows:

1. Storage capacity less than 0.1 af is listed as a detail in application remarks (item 12) but is not listed as a water use in items 4 and 5; only a rate of flow is described in items 4 and 5 in such a case.
2. Storage capacity greater than 0.1 af is not listed as a storage use in items 4 and 5 if the rate of flow can fill the storage capacity within 24 hours. To determine this latter step, multiply cfs by two to find total af produced per day, e.g., 0.10 cfs x 2 yields 0.2 af/day. If an application included 0.10 cfs and a pond holding less than 0.2 af, storage would not apply in application items 4 and 5. Instead, the applicant would describe the pond and estimate its dimensions in application item 12, remarks.

The above principles are applied even if a pond captures water from a spring or seep at the bottom of the pond where it appears a rate of flow would not apply.

Application #6

✓ Storage use - Pond factors similar to application #3 are found. In this case, 0.20 cfs x 2 yields 0.4 af/day. The proposed pond holds less than this amount and less than 0.1 af; storage is n/a to items 4 and 5. Strike the "only storage" reference in item 5.

Describe the proposed pond dimensions in remarks. The details should outline how you estimated the total capacity of the pond, including the surface area of the pond.

December 16, 2002

Page 3 of 3

N/A

Request to process form - Include this form if the pond will cover more than one-half acre of surface area. In that case, stockwater use becomes consumptive due to the evaporative loss from the pond (too minor to worry about if the pond covers less than ½ acre).

Application #10 65-22752

- ✓ Storage use – Same scenario as application #6. Strike “only storage” in item 5 and describe the pond in remarks. Include the request to process form if necessary as in application #6.

All the application can be revised as needed. Please initial and date the front page of each revised application to authenticate any changes. The applications can be processed when returned to this office. Please submit the above requested information within sixty (60) days of the date of this letter. If the information is not timely submitted, the applications will be removed from the records of this agency. Thank you for your attention to these matters.

Please contact me at 334-2190 if you have any questions or problems.

Sincerely,

Steve Lester
Water Rights Supervisor
