MICROFILMED
APR 13 1999

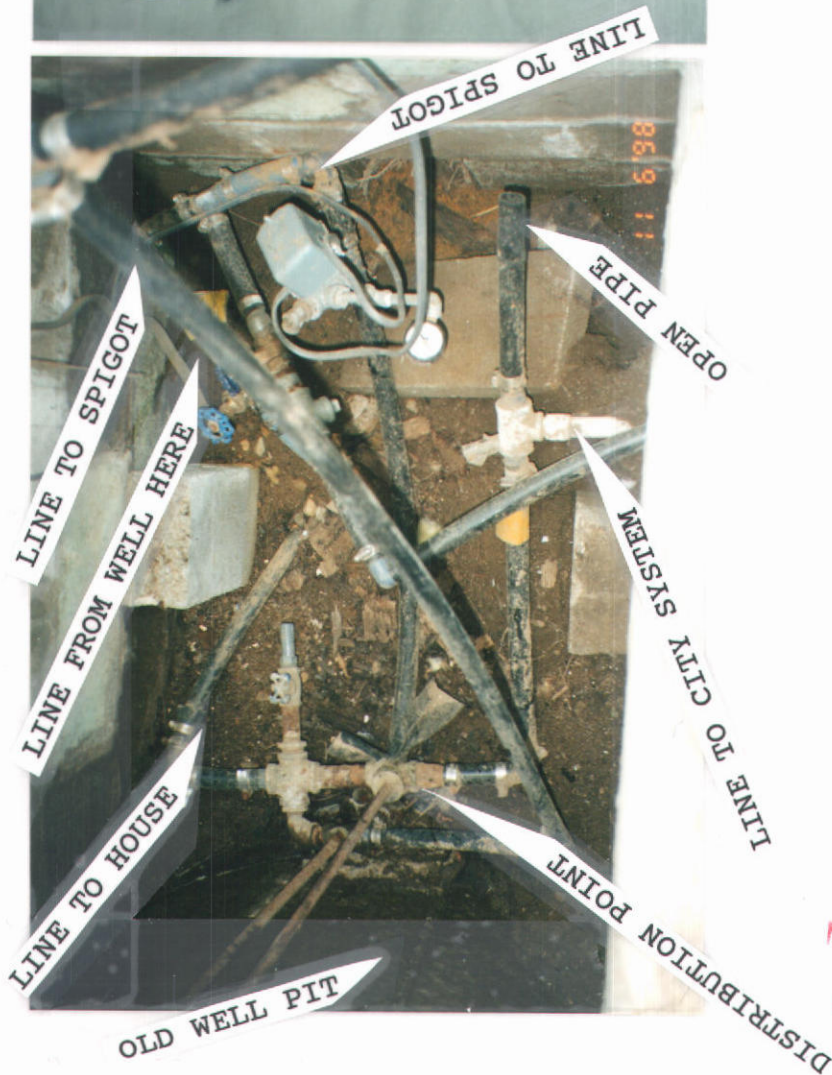

These are pictures of the place of use. The first picture shows the old house associated with water right # 65-07542. Behind this house is the new house which is connected by a full length driveway.

The second picture shows open field the owners plan to use as a pasture, the new house, the well site, the well pit and the 4 sheds. The pole fence is property line for this place of use.

MICROFILMED

APR 13 1999

65-13779

These are pictures of the well and the well pit. There is an old hand dug well located in the cemented area next to the well pit. The water from the well comes into the pit through the blue pipe with the yellow tag in the bottom of the pit. The blue line goes directly into the old well area where a pressure tank sits on top of the old well area on a metal grate (the old well pit has been cemented shut so I could not get any pictures of the pressure tank). The water comes out of the old well and into a split that sends the water through the new house to the old house and to the other two spigots. City water can come into this system through the white PVC pipe, but it is not currently being used. You can see that the city connection has an open pipe that would loose water if the city water was being used.

Water Right License
WATER RIGHT NO. 65-13779

Priority: March 9, 1998

Maximum Diversion Rate:
Maximum Diversion Volume:

0.05 CFS
3.6 AF

This is to certify, that LARRY E HETTINGER
8915 W LANDMARK CT
BOISE ID 83704

has complied with the terms and conditions of the permit, issued pursuant to Application for Permit dated March 9, 1998; and has submitted Proof of Beneficial Use on July 24, 1998. An examination indicates that the works have a diversion capacity of 0.090 cfs of water from a GROUNDWATER source, and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>ANNUAL VOLUME</u>
IRRIGATION	04/15 to 10/15	0.03 CFS	3.0 AF
DOMESTIC	01/01 to 12/31	0.02 CFS	0.6 AF
	Totals	0.05 CFS	3.6 AF

LOCATION OF POINT(S) OF DIVERSION: NWSW , Sec. 3, Township 18N, Range 03E
VALLEY County

PLACE OF USE: IRRIGATION

18N	03E	3	NWSW	1		1

Total number of acres irrigated: 1

PLACE OF USE:

DOMESTIC, same as IRRIGATION use

CONDITIONS OF APPROVAL AND REMARKS

1. This right when combined with all other rights shall provide no more than 0.03 cfs per acre nor more than 3.0 afa per acre at the field headgate for irrigation of the lands above.
2. The Director retains jurisdiction to require the right holder to provide purchased or leased natural flow or stored water to offset depletion of Lower Snake River flows needed for salmon migration purposes. The amount of water required to be released into the Snake River or a tributary for this purpose will be determined by the Director based upon the reduction in flow caused by the use of water pursuant to this permit.
3. Domestic use is for 1 home and does not include lawn, garden, landscape, or other types of irrigation.
4. Rights 65-07542 and 65-13779 when combined shall not exceed a total annual maximum diversion volume of 3.0 af for irrigation of a total of 1 acre.
5. Place of use is located within Lots 13 & 17-20, Flynn

ACTION OF THE DEPARTMENT OF WATER RESOURCES

I, Karl J. Dreher, of the Department of Water Resources hereby approve the
above Application for Amendment for Permit No. 65-13779 with the following;

CONDITIONS OF APPROVAL AND REMARKS

1. This right when combined with all other rights shall provide no more than 0.03 cfs per acre nor more than 3.0 afa per acre at the field headgate for irrigation of the lands above.
2. The Director retains jurisdiction to require the right holder to provide purchased or leased natural flow or stored water to offset depletion of Lower Snake River flows needed for salmon migration purposes. The amount of water required to be released into the Snake River or a tributary for this purpose will be determined by the Director based upon the reduction in flow caused by the use of water pursuant to this permit.
3. Domestic use is for 1 home and does not include lawn, garden, landscape, or other types of irrigation.
4. Rights 65-07542 and 65-13779 when combined shall not exceed a total annual maximum diversion volume of 3.0 af for irrigation of a total of 1 acre.
5. Place of use is located within Lots 13 & 17-20, Flynn Subdivision.
6. Right 65-07542 is also diverted through the points of diversion described above.
7. Two points of diversion are located within NWSW, S3, T18N, R3E.

RE: WATER RIGHT NO. 65-13779

Dear Water Right Holder(s):

The Department of Water Resources (the Department) has issued the enclosed license confirming that a water right has been established in accordance with the permit referenced above. The license is a preliminary order issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department unless a party petitions for reconsideration or files an exception and/or brief as described in the enclosed information sheet.

For your records I have also enclosed a copy of your Application for Amendment of Permit, which was approved.

If you have any questions, please call me at 208-327-7946.

Sincerely,

Shelley W. Keen
Water Rights Supervisor

Responding to Preliminary Orders Issued by the Idaho Department of Water Resources

The Idaho Department of Water Resources (Department) issues water right permits, licenses, and transfers as preliminary orders pursuant to section 67-5243, Idaho Code. A preliminary order can and will become a final order without further action of the department unless a party petitions for reconsideration or files an exception and/or brief as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the Department within fourteen (14) days of the service date of the order. The Department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See section 67-5243(3), Idaho Code.

EXCEPTIONS AND BRIEFS

Within twenty-one (21) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from a preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding. Otherwise, a preliminary order will become a final order of the Department.

If any party appeals or takes exceptions to a preliminary order, opposing parties shall have twenty-one (21) days to respond to any party's appeal. Written briefs in support of or taking exceptions to the preliminary order shall be filed with the Department. The Department retains the right to review the preliminary order on its own motion.

ORAL ARGUMENT

If the Department grants a petition to review a preliminary order, the Department shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Department will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Department orders otherwise, all oral arguments will be heard in Boise, Idaho.

MICROFILMED

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Department in connection with a preliminary order shall be served on all other parties to the proceedings in accordance with Rules of Procedure 302 and 303.

FINAL ORDER

The Department will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Department may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

RE: WATER RIGHT NO. 65-13779

Dear Permit Holder(s):

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms that a water right has been established in compliance with the terms of the permit. The examiner who verified your water use reported that you developed more points of diversion than were described on your permit. Therefore, before a license can be issued, your permit must be amended to include the additional point(s) of diversion.

The enclosed Application for Amendment form describes the additional point(s) of diversion and other information that will be included on the license when it is issued. In some cases, the reference to multiple points of diversion is contained in the list of conditions of approval and remarks on the last page of the amendment form. Please review the amendment carefully. If you concur with the information presented, please sign the form and return it with the \$50.00 filing fee within 14 days.

Also, please note that some of the proposed conditions of approval and remarks may be modified upon further administrative review.

If you do not concur, or if you have any questions about this information, please contact me as soon as possible. My telephone number is (208)327-7946.

Sincerely,

Shelley W. Keen
Water Rights Supervisor

MEMORANDUM

TO: File 65-13779

FROM: Sharla

DATE: February 24, 1999

RE: Recommendation Adjustment(s)

The adjustments to licensing recommendations for Permit 65-13779 are as follows.

C DIVERSION AND DELIVERY SYSTEM

1 Point of Diversion
T18N, R3E, S3 – NWSW

H. RECOMMENDATIONS

Irrigation	4/15 – 10/15	0.03 cfs	3.0 afa
Domestic	1/1 – 12/31	0.04 cfs	0.6 afa

Both wells will be listed on the license. The approved transfer for the earlier right, 65-07542, also identifies both wells. Both wells are located in the same $\frac{1}{4}$ section.

The earlier license was issued for domestic use (1 home) with a volume of 1.2 af for in-house and external use. Permit 65-13779 was filed for another home and a total irrigation of one (1) acre between the two homes. The license can be issued the same way with a condition limiting outside "irrigation" to a total of 1 acre associated with the 2 homes.

THEORETICAL & PUMP CURVE	N/A	N/A	N/A	N/A	N/A	N/A

2. **Measurements:** A theoretical analysis was performed on the new well which showed a diversion rate of .05 cfs. The pump curve for this pump also showed a .05 diversion rate. There was not a pump in the hand dug well at this time and so no calculations or diversion rates could be supplied.

MICROFILMED
APR 13 1999

65-13779

E. NARRATIVE/REMARKS/COMMENTS

There are two wells for this place of use, both of which are located in the same 10 acre tract described above. The main well is the new well located at the NW corner of the new house and is only well being used at the present time. The old well is a hand dug well located approximately 5 feet north of Strawberry lane (the southern boundary of the property). This well currently does not have a pump in it, but the owners state that they still may reinstall a pump in this well to use as a backup well.

The place of use covers 5 lots (lots 13, 17, 18, 19, & 20) of the Flynn Subdivision in McCall, Idaho. The lots cover a total of 1.3 acres of ground (see system map for acre calculations). There are 2 homes on this property. The owners have built a new home located on the southwest corner of the property and the owner's son lives in the old house located on the northwest corner of the property. There are 4 sheds located on this property. 2 or 3 of the old sheds may be torn down in the future. The total amount of ground that is being irrigated is approximately 1 acre (see system map for acre calculations).

The water used for this place of use currently comes from the new well and travels southwest to the well pit located next to the old well. The water is then run into a pressure tank which sits on a grate on top of the old well in a cement cistern type structure that has been sealed with cement. The water then comes out of pressure tank and out of the cistern back into the well pit. The water then goes to a distribution point that sends the water out in three different directions. The first direction is to a flexible PVC pipe that goes to a spigot located at the well pit. The second line goes underground to a spigot located in front of the middle old shed. The third line goes travels underground to new house. The new house has not yet been connected to this line, however the connections are there and available to connect the house to the system. The line then travels to the old house which does use this water. At the point that the line enters the old house the line splits and runs to a spigot located on the east side of the old house. After the water enters the old house the water line then attaches to the last spigot on the line located on the west side of the old house. The City of McCall has a water line that enters into the well pit. However, this line is not currently being used and until it is repaired can not be use.

APP 13 1999

There is one water right that overlaps both the point of diversion and place of use. This water right was originally for the old house. This water right is 65-07542. A transfer was done on this water right to include both wells on this water right. Water right number 65-07542 is a domestic right for in house use and ½ acre of irrigation.

65-13779

RECOMMENDATIONS:

I recommend that the irrigation component of his permit be included with the domestic portion of this permit for .02 cfs for both internal use and external use. There is only approximately 1 acre of irrigation and two households for this place of use. Water right 65-07542 covers .5 acres of the yard irrigation and the old house. This permit should allow in house use for the new house since it is stubbed into the system and the remaining ½ acre of irrigation. The combination of the two water rights would cover both houses and all of the 1 acre of irrigation.

I also recommend that ~~the~~ this water right be licensed for .02 cfs and a annual volume 1.2 af of water and maximum diversion rate of .06 cfs. When combined the two water rights would have a combined diversion rate of .06 cfs and a combined annual volume of 2.4 af of water.

I also recommend that the irrigation component of the water right be disallowed. The 2 domestic rights will cover all of the land that will be irrigated, which makes the irrigation component of this water right unnecessary.

Have conditions of permit approval been met? ☒ yes ☐ no

PLEASE NOTE: Conditions 4 and 7 are no longer applicable with the current recommendation of including the irrigation component into the domestic portion of this permit.

MICROFILMED

SEP 17 1999

65-13779

F. FLOW CALCULATIONSYES Additional Computation Sheets Attached

Measured Method:

NEW WELL = .05 cfs (See attached theoretical analysis and pump curve)

OLD WELL = UNKNOWN (There is currently no pump in the old well)

I recommend that the total diversion rate should be .02 cfs for this permit. The new well produces .05 cfs and the old well's production is unknown. Water right # 65-07542 is for .04 cfs from both wells and the departments standard for multiple domestic uses from the field examiners handbook is .06 cfs. Therefore, .06 cfs (standard) - .04 (licensed) leaves .02 cfs available to license. .02 cfs is an attainable diversion rate from the 2 wells since the new well already produces .05 cfs.

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

 $V_{IR} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = \underline{\text{NOT RECOMMENDED}}$ $V_{DR} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = \underline{\text{NOT RECOMMENDED}}$ $V = \text{Smaller of } V_{IR} \text{ and } V_{DR} = \underline{\text{NOT RECOMMENDED}}$

B

2. Volume Calculations for Other Uses:

1 DOMESTIC HOUSE HOLD & 1/2 ACRE OF IRRIGATION = DEPARTMENT STANDARD OF 1.2 AF

H. RECOMMENDATIONS

1. Recommended Amounts

System MAP

This place of use sits on 4 - 78 X 141 ft lots and 1 - 83 X 141 ft lot for a total of 1.3 acres $([4 \times (78 \times 141)] + [83 \times 141] / 43560 = 1.279 \text{ acres})$. The 2 houses, 4 sheds and driveway account for approximately 25 % of the property or .3 acres $(1.3 \times .25 = .325 \text{ ac})$. Therefore, approximately 1 acre of ground is actually irrigated on this place of use. Transfer 5260 of water right # 65-07542 for the old house is for domestic use of one house and .5 acres of irrigation. After this water right there is only 1 house and .5 acres of irrigation left to license on this property. The new house is currently not connected to the well, but is stubbed in and can be connected to the well at any time. I recommend that this permit be licensed for domestic use of .04 cfs and 1.2 afa for the remaining .5 acres and the new house.

GROUNDWATER MEASUREMENT REQUIREMENT ANALYSIS

FILE: 65-13779

DATE: 11-6-1998

BY: David A. Nelson

THEORETICAL RATE OF FLOW: $Q = \frac{(8.8) \times (H.P.) \times (EFF.)}{TDH}$

Q = CFS

H.P. = Total Brake Horsepower of pumping plant (including booster)

EFF. = Pumping plant efficiency (ASSUME 70% OR 0.70)

TDH = total dynamic head = [(LIFT) + (PSI X 2.31)]

LIFT = depth to water in FEET from land surface to pumping water level

PSI = pumping pressure measured in psi near pump (if open discharge assume zero [0])

$$Q = \frac{(8.8) (75) (0.70)}{[(.25 \text{ FT}) + (.30 \text{ PSI} \times 2.31)]} = \frac{4.62}{94.3} = .05 \text{ CFS}$$

22.44 gpm.

These are pictures of the place of use. The first picture shows the old house associated with water right # 65-07542. Behind this house is the new house which is connected by a full length driveway.

The second picture shows open field the owners plan to use as a pasture, the new house, the well site, the well pit and the 4 sheds. The pole fence is property line for this place of use.

WELL

These are pictures of the well and the well pit. There is an old hand dug well located in the cemented area next to the well pit. The water from the well comes into the pit through the blue pipe with the yellow tag in the bottom of the pit. The blue line goes directly into the old well area where a pressure tank sits on top of the old well area on a metal grate (the old well pit has been cemented shut so I could not get any pictures of the pressure tank). The water comes out of the old well and into a split that sends the water through the new house to the old house and to the other two spigots. City water can come into this system through the white PVC pipe, but it is not currently being used. You can see that the city connection has an open pipe that would loose water if the city water was being used.

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 65-13779

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

Be advised that Section 42-248, Idaho Code, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Forms to file a change of ownership of a water right and/or a change in the address of the water right owner are available from any department office.

If you have questions concerning the field examination, please contact the department's **WESTERN** Regional Office in Boise at (208)334-2190.

Sincerely,

JULIE L. YARBROUGH
Senior Secretary, Water Allocation Bureau

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 65-13779

Dear Permit Holder:

The Department of Water Resources (IDWR) has issued the enclosed permit authorizing you to establish a new water right. Please be sure to thoroughly review the conditions of approval and remarks listed on your permit.

The permit is a preliminary order issued by IDWR pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action by IDWR unless a party petitions for reconsideration or files an exception and/or brief as described in the enclosed information sheet.

Enclosed is a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a licensed water right. Also enclosed is a form entitled "Proof of Beneficial Use". If your project is already completed, you should complete and submit this form immediately.

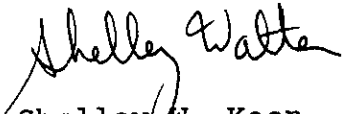

The right to drill a well is not a part of this permit to appropriate water. Beginning in July of 1987, a statute was enacted which requires a drilling permit for new well construction and deepening of existing wells. If the well(s) proposed for use under this right were drilled or deepened after July 1, 1987, a separate drilling permit must be obtained from this Department. Please contact the Groundwater Protection Section located here at this office or our regional office nearest you.

MICROFILMED

Also, please note that water right owners are required to report any change of water right ownership and/or change of mailing address to the department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the department or visit the department's homepage on the Internet to obtain the proper reporting form.

If you have any questions, please call me at 208-327-7946.

Sincerely,

A handwritten signature in cursive script that reads "Shelley W. Keen".

Responding to Preliminary Orders Issued by the Idaho Department of Water Resources

The Idaho Department of Water Resources (Department) issues water right permits, licenses, and transfers as preliminary orders pursuant to section 67-5243, Idaho Code. A preliminary order can and will become a final order without further action of the department unless a party petitions for reconsideration or files an exception and/or brief as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the Department within fourteen (14) days of the service date of the order. The Department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See section 67-5243(3), Idaho Code.

EXCEPTIONS AND BRIEFS

Within twenty-one (21) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from a preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding. Otherwise, a preliminary order will become a final order of the Department.

If any party appeals or takes exceptions to a preliminary order, opposing parties shall have twenty-one (21) days to respond to any party's appeal. Written briefs in support of or taking exceptions to the preliminary order shall be filed with the Department. The Department retains the right to review the preliminary order on its own motion.

ORAL ARGUMENT

If the Department grants a petition to review a preliminary order, the Department shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Department will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Department orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Department in connection with a preliminary order shall be served on all other parties to the proceedings in accordance with Rules of Procedure 302 and 303.

FINAL ORDER

The Department will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Department may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

RE: *Application for Permit*
Drilling Permit No. 65-98-W-0006-000

Dear Applicant:

The above application for permit to appropriate ground water was received on March 9, 1998.

According to your application for permit, the proposed well has already been constructed under the above drilling permit, with a \$75.00 fee paid. The well was constructed as an exempted-use domestic well, and its use is presently limited to diversions for a single-family home and no more than $\frac{1}{2}$ acre irrigation. Because the well is now proposed for purposes in excess of domestic use, the drilling permit must be upgraded to non-domestic use.

A \$200.00 drilling fee is required for non-domestic wells. The fee you have already paid has been applied to this amount, and you must submit the balance of \$125.00 so the drilling permit may be upgraded.

Your application for permit will be advertised, but will not be forwarded for possible approval until the drilling upgrade fees are received. In order to avoid further delays, please submit the additional \$125.00 fees by April 9, 1998.

If you have any questions or if I can be of any assistance please contact me at 208-334-2190.

Sincerely,

Lori Graves
Sr. Water Resource Agent

Application No.

Mitigation

Yes, I agree to accept a condition of approval on my application that will require mitigation related to fishery resources based upon a finding by the Director, Idaho Dept. of Water Resources. I understand that mitigation is not needed now but may be needed in the future. I also understand that the Director will not invoke this condition until I have an opportunity to participate in the process by which mitigation is identified and quantified.
