ACTION OF THE DEPARTMENT OF WATER RESOURCES

This Permit is _____ Date _____

If approved, this permit authorizes the construction or modification of a well subject to the following conditions. READ CAREFULLY!

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from the above approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
3. This permit does not constitute an approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Approval of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
7. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
8. If a bottom hole temperature of 85° or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.
9. If this permit is for a replacement well, the well being replaced must be abandoned in accordance with Department Rules and Regulations.

KARL J. DREHER
DIRECTOR

RE: WATER RIGHTS 65-13710/65-13714

Dear Water Right Holder(s):

The Department of Water Resources (the Department) has issued the enclosed licenses confirming that water rights have been established in accordance with the permits referenced above. The license are **preliminary orders** issued by the Department pursuant to section 67-5243, Idaho Code. **They can and will become final orders without further action of the Department unless a party petitions for reconsideration or files an exception and/or brief as further described below.**

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the Department within fourteen (14) days of the service date of this order. The Department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See section 67-5243(3), Idaho Code.

EXCEPTIONS AND BRIEFS

Within twenty-one (21) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding. Otherwise, this preliminary order will become a final order of the Department.

If any party appeals or takes exceptions to this preliminary order, opposing parties shall have twenty-one (21) days to respond to any party's appeal. Written briefs in support of or taking exceptions to the preliminary order shall be filed with the Department. The Department retains the right to review the preliminary order on its own motion.

MICROFILMED

FEB 14 1999

ORAL ARGUMENT

If the Department grants a petition to review the preliminary order, the Department shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Department will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Department orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Department in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with Rules of Procedure 302 and 303.

FINAL ORDER

The Department will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Department may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The Department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one

(21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency

action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

If you have questions, please contact me at (208) 327-7946.

Sincerely,

A handwritten signature in cursive script that reads "Shelley Walter Keen".

PROOF ACKNOWLEDGMENT LETTER

RE: Permit No 65-13710

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit.

Enclosed is an order reinstating the permit since the department lapsed it in error. Note that the priority date has not been advanced.

Be advised that Section 42-248, Idaho Code, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Forms to file a change of ownership of a water right and/or a change in the address of the water right owner are available from any department office.

The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water. If you have questions concerning the field examination, you may contact the **WESTERN** Regional Office of the department in Boise at (208)334-2190.

Sincerely,

JULIE L. YARBROUGH

Senior Secretary, Water Allocation Bureau

From: Julie L. Yarbrough
Subject: Proof of B/U
Date: August 20, 1998

MEMORANDUM

The permit holder inquired about the status of these two rights when a lapse noticed was received. The permit holder submitted an extension of time request and filing fee's for both permits on April 24, 1998, to the Western Regional Office. There is no record that the State Office ever received the extension requests and a lapse notice was mailed June 26, 1998. The permit holder faxed a copy of the letter which accompanied the extension requests in April as well as a copy of the receipt for \$100.00 dated April 24, 1998, by Western Region. The permit holder has now submitted proof for these two rights. The exam fee for each proof is \$50.00. I informed the permit holder that proof would be accepted as filed April 24, 1998, the permits would be reinstated with no advance in priority and the filing fee's submitted with the extension requests would be credited as exam fee's for the proofs.

Boise, ID 83705

Dear Ms. Yarbrough:

Enclosed are the required fees and two copies of extensions of time applications for permits 65-13710 and 65-13714, groundwater developments at Bull Trout Campground. Even though the work has begun, they will not be put to beneficial use until after June 1; therefore, an extension of time to complete these projects is requested.

Permits 65-13711, 65-13712, and 65 13713 are not expected to be completed in the foreseeable future and may be cancelled.

Thank you for your assistance.

Sincerely,

DAVID D. RITTENHOUSE
Forest Supervisor

LAPSE NOTICE

RE: PERMIT NO. 65-13710

Dear Permit Holder:

You are hereby notified that under the provisions of Section 42-218A, Idaho Code, the above referenced permit has lapsed and is of no further force nor effect. The department provided the proper forms to you in our proof due notice dated April 30, 1998. No further construction or additional development is authorized under this permit unless it is reinstated.

The permit can only be reinstated if you submit an acceptable proof of beneficial use or an acceptable request for extension of time to the department within sixty (60) days of the mailing of this lapse notice. An acceptable proof of beneficial use submittal must include the examination fee or a completed field examination report. A request for extension of time must be accompanied by a fifty dollar (\$50.00) fee.

Enclosed again for your use are a proof of beneficial use form and a request for extension of time form. Please note that only one extension of time can be granted unless the project has not been completed because of lack of a necessary approval by a government agency or by litigation which may bring title to the water in question.

PROOF DUE NOTICE

RE: PERMIT NO. 65-13710

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before June 1, 1998.

(See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

JULIE L. YARBROUGH
Senior Secretary

ACTION OF THE DEPARTMENT OF WATER RESOURCES

This permit is

Approved

Date:

9-23-97

If approved, this permit authorizes the construction or modification of a well subject to the following conditions. READ CAREFULLY!

CONDITIONS OF APPROVAL:

1. This drilling permit is valid for two (2) months from the approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
2. This permit does not constitute an approval of the District Health Department or the Idaho Department of Health and Welfare which may be required prior to construction of this well. The local Health Department should be contacted for septic tank/drainfield locations. Domestic wells must not be drilled closer than 100' from any drainfield and 50' from any septic tank. Public Water Supply wells must not be drilled closer than 100' from any drainfield or septic tank.
3. The well shall be constructed by a driller currently licensed in the state of Idaho who must maintain a copy of the drilling permit at the drilling site.
4. Approval of this drilling permit does not authorize trespass on the land of another party.
5. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
6. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
7. If the bottom hole temperature of 85 Degrees F (29.44 oC) or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.
8. Idaho Code, S 55-2201 - 55-2210 requires the applicant and/or his contractors to contact "Digline" (DigLine is a one-call center for utility notification) not less than 2 working days prior to the start of any excavation for this project. The "Dig Line " Number for your area is 1-800-342-1585.
9. The uppermost unconfined aquifer shall be cased and sealed to exclude water from this zone from entering the well. All seals will be placed from the bottom up.
10. If an annular slurry seal of bentonite is to be utilized, a high (>30%) solids bentonite shall be pumped from the bottom up to land surface. The bentonite shall not contain chemical polymers which effect long term stability of the seal (and are often found in drilling fluid grade bentonites) but shall be a bentonite which has been specifically recommended by the manufacturer for use as a seal material in water wells.

(Continued)

MICROFILMED
OCT 27 1998

CONDITIONS OF APPROVAL:

11. If an annular space of at least 4 inches greater than the outside diameter of the casing is provided a granular bentonite or bentonite chips may be poured at the manufacturer's recommended rate or no greater than 50 pounds in five minutes. The pour shall also be presifted through 1/4 inch mesh screen to reduce the introduction of fines unless the annular space is free of water, ie. (above the water table and there is no cascading water). The top of the seal shall be tagged at regular intervals, ie. (30' intervals) during placement with a sinker bar or other appropriate device to ensure the seal is reaching the intended depth. If bridging occurs, the seal shall be tamped to its intended position or the Department will be contacted for evaluation.
12. The project engineer or geologist will be on site during seal placement should any peculiarities arise which require further evaluation. Any alteration of the proposed or herein modified well construction procedure shall be approved by the Department before they are undertaken.
13. If a neat cement grout is to be utilized as a seal material, additives such as the following shall be used to reduce dehydration and shrinkage. Mix water quantity shall strictly follow manufacturer's specifications paying close attention to cement grind and water ratios, (generally between 5 and 6 gallons per sack) eliminating free water. Water quality of the mix water should meet drinking water standards.
14. The use of bentonite added to cement grout to reduce hydraulic conductivity shall not exceed 4% and shall be prehydrated prior to mixing with the neat cement. The bentonite shall not contain chemical polymers which effect long term stability, and are often found in drilling fluid grade bentonites, but will be specifically recommended by the manufacturer for use as a seal material.
15. Drilling fluids shall be mixed with water which meets or exceeds drinking water standards.
16. The screened, perforated, filterpacked or otherwise open and commingled strata which are to be produced from, shall be of similiar hydraulic head, temperature and quality. If there are notable variations encountered as the well is drilled and/or developed, the Department will be notified for evaluation.
17. If the supply line is connected to the pump column below ground level, a pitless device will be utilized which provides a water tight seal through the casing. The pitless will be tested according to the means described by the U.S.EPA manual EPA-430/9-74-007. The test will be run in the presence of the engineer designing the surface distribution of the system.
18. Reference drilling specifications of the American Water Works Association Standard for Water Wells (ANSI/AWWA A100-90) and the Recommended Standards For Water Works (Greater Lakes Upper Mississippi River Board of States Public Health & Environmental Manager 1992).
19. Well schematic and drilling prospectus describes the following:
Drill a 10" bore to the sealing depth. Place 8", .277 wall steel casing to the overbored depth and seal with a cement grout the full length of the overbore;
Drill down to between 125' and a maximum of 250' with a 6" bit and place Sch40 PVC well casing with factory perforations located at depths

MICROFILMED
(Continued)

OCT 27 1998

CONDITIONS OF APPROVAL:

determined by engineer and filter packed its entire length;
Well will be developed by high velocity jetting, surging or sustained pumping at the discretion of the engineer;
Testing of the well will be done with variable discharge equipment, with drawdown of various pumping rates determined with a goal of 20gpm for sustained production.

20. Disinfection of the well shall follow ANSI/AWWA C654-87 or later standard and shall be done while drilling equipment is on site.
21. Eight inch casing for public water supply wells have a wall thickness of .322".
22. Casing and sealing depths will be determined based upon the sealing out of the first fractures encountered in the competent granitics or to a minimum depth of 10' into the granitics. If direct hydraulic connection with surface water is determined, deeper casing and sealing will be required.

RE: Water Right Nos. ~~65-13710~~, 65-13712, 65-13713, and 65-13714

PERMIT APPROVAL NOTICE

Dear Permit Holder:

The Department of Water Resources (IDWR) has issued the enclosed permits authorizing you to establish new water rights. Please be sure to thoroughly review the conditions of approval and remarks listed on your permits.

The permits are preliminary orders issued by IDWR pursuant to section 67-5243, Idaho Code. They can and will become a final orders without further action by IDWR unless a party petitions for reconsideration or files an exception and/or brief as described in the enclosed information sheet.

If your wells have not already been constructed, you are required to obtain a "drilling permit" from IDWR for each well. Permission to drill a well is not part of this permit to appropriate water.

Systems supplying water to groups of people for domestic consumption, such as water systems installed in subdivisions and campgrounds, must be approved by either District Health (2 to 9 homes and transient use) or the Idaho Division of Environmental Quality (10 or more connections or use by more than 25 persons over 60 days per year). Please contact the appropriate agency before beginning your project.

Enclosed is a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop these permits. Also enclosed is a form entitled "Proof of Beneficial Use". If any of your projects are already complete, you should complete and submit this form immediately.

Also, please note that as of July 1, 1996, water right owners are required to report any change of water right ownership and any change of mailing address to IDWR. If you acquired a water right

Page 2

or changed your mailing address prior to July 1, 1996, you have until July 30, 1998, to notify IDWR. If you acquire a water right or change your mailing address after July 1, 1996, you must notify IDWR within 120 days of the change. Failure to comply with these requirements could result in a \$100 late filing fee. Contact any IDWR office to obtain the proper reporting form

If you have any questions, please contact me at 208-327-7946.

Respectfully,

A handwritten signature in cursive script, reading "Shelley Walter Keen".

WATER RESOURCES
WESTERN REGION

Dear Mr. Spackman:

Enclosed are five applications for water rights, well drilling permits, and appropriate filing fees for new wells to serve expansion and reconstruction of the Bull Trout campground, located on the Lowman Ranger District. Lowman District personnel are requesting approval of the drilling permits to allow well drilling to coincide with campground reconstruction which is expected to begin in June.

In addition, I am submitting four completed Proof of Beneficial Use forms and filing fees for water use permits on the Cascade Ranger District.

If you have any questions, please contact Terry Hardy at 364-4313.

Sincerely,

Cathy Bouboulis

DAVID D. RITTENHOUSE
Forest Supervisor
