Full Circle Impact Sprinklers

30 Series

NEW FOR 1975

New longer wearing, high performance, TNT bearing on all model 30 series sprinklers where TNT is specified.

30

3/4" male bearing, Standard or TNT. Cast bronze body and arm. Brass bearing sleeve, nipple, straight bore range nozzle and low angle spreader nozzle (7° or 20°). Stainless steel arm spring and bearing spring. Available on special order with nylon range nozzles and 3/32", 1/8", 5/32" spreader nozzles.

30 W

Same as 30 above except has brass plug instead of spreader nozzle. Single nozzle for lower precipitation rates.

30 WS

Same as 30 above except has a special cast body for single range nozzle only. No provision for adding a spreader nozzle as in 30 W.

COLOR CODED NOZZLES

Color Coded Band

3/4" Green	1 1/4" Yellow
1/2" Red	3/16" Blue
3/4" Black	1 1/4" White
1/2" Orange	3/16" Brown

These nozzles fit #29, 30, 14600, 40 B, and 14070 Series Sprinklers. Add CC after range nozzle size to specify color coded nozzle — for example — 30 EWTNT 3/4 CC x 1/2-7°.

PERFORMANCE FOR 30

Highest point of stream is 9' above nozzle.*

WATER RIGHT LICENSE

WATER RIGHT NO. 65-13659

Priority: April 12, 1996

Maximum Diversion Rate:

0.04 CFS

Maximum Diversion Volume:

8.1 AF

This is to certify, that FRANK DE CROO
JOAN DE CROO

10492 RAILROAD LN
PALETTE ID 33661

has complied with the terms and conditions of the permit, issued pursuant to Application for Permit dated April 12, 1996; and has submitted Proof of Beneficial Use on February 12, 1997. An examination indicates that the works have a diversion capacity of 0.050 cfs of water from a GROUNDWATER source, and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>ANNUAL VOLUME</u>
IRRIGATION	03/15 to 11/15	0.04 CFS	8.1 AF

LOCATION OF POINT(S) OF DIVERSION:

NENW , Sec. 27, Township 09N, Range 05W
PAYETTE County

PLACE OF USE: IRRIGATION

<u>TWN</u>	<u>RGE</u>	<u>SEC</u>	<u>ACRES</u>	<u>ACRES</u>	<u>ACRES</u>	<u>TOTAL</u>
09N	05W	27	NENW	1.8		1.8

Total number of acres irrigated: 1.8

CONDITIONS OF APPROVAL AND REMARKS

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount that can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. This right when combined with all other rights shall provide no more than .03 cfs per acre nor more than 4.5 afa per acre for the lands above.
6. Diversion and use of water under this right is subject to rules that may subsequently be promulgated for the use of existing rights used for supplemental purposes.

RE: WATER RIGHT NO. 65-13659

Dear Water Right Holder(s):

The Department of Water Resources (the Department) has issued the enclosed license confirming that a water right has been established in accordance with the permit referenced above. The license is a preliminary order issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department unless a party petitions for reconsideration or files an exception and/or brief as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the Department within fourteen (14) days of the service date of this order. The Department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See section 67-5243(3), Idaho Code.

EXCEPTIONS AND BRIEFS

Within twenty-one (21) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding. Otherwise, this preliminary order will become a final order of the Department.

If any party appeals or takes exceptions to this preliminary order, opposing parties shall have twenty-one (21) days to respond to any party's appeal. Written briefs in support of or taking exceptions to the preliminary order shall be filed with the Department. The Department retains the right to review the preliminary order on its own motion.

4 1997

ORAL ARGUMENT

If the Department grants a petition to review the preliminary order, the Department shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Department will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Department orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Department in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with Rules of Procedure 302 and 303.

FINAL ORDER

The Department will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Department may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The Department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

Sincerely,

A handwritten signature in cursive script that reads "Shelley W. Keen". The signature is written in dark ink and is positioned above the typed name and title.

Shelley W. Keen
Water Rights Supervisor

4.

Well or Diversion Identification No.*	Motor Make	Hp	Motor Serial No.	Pump Make	Pump Serial No. or Discharge Size
	Sta-Rite	1.5		(submersible)	3" discharge

*Code to correspond with No. on map and aerial photo

D. FLOW MEASUREMENTS

1.

Measurement Equipment	Type	Make	Model No	Serial No	Size	Calib. Date

2. **Measurements:** Irrigation system was not operating at time of exam; no measurements were taken.

E. NARRATIVE/REMARKS/COMMENTS

The delivery system consists of a 6" by 32' deep well with a static level of 5' located in the northeast corner of the pasture (see photo #1). The well discharges to a 3" mainline with 5 risers. One handline is operated at a time. The system was not operating at the time but the handline had been set up in the pasture.

The handline has 1 Nelson sprinkler with a 9/64" nozzle and 6 Rainbird 30W sprinklers with 5/32" nozzles. According to Rainbird specifications (see attached) and assuming an average 45 psi per nozzle, the 9/64" nozzle would use 3.84 gpm and the 5/32" nozzles would each use 4.72 gpm. The rate of diversion for the irrigation system would be 32 gpm or 0.07 cfs.

An irrigation lateral runs to mid field along the east side of the field. However, most of the ditch as far as I could see had caved away. Owner stated that users on the lateral upstream had not maintained or repaired the ditch for years. The permit holder filed this permit to convert from surface water to groundwater for irrigation because surface water could no longer be delivered. The permit is conditioned requiring continued use of surface water. Meeting that condition is physically impossible.

THEORETICAL WELL CAPACITY: $\frac{8.8 \times 0.7 \times 1.5 \text{ HP}}{15' + (2.31 \times 50\text{psi})} = \frac{9.24}{130.5} = 0.05 \text{ cfs}$

Have conditions of permit approval been met? yes no Condition #6 (see above narrative)

NOV 19 1997
LX
LMEU

F. FLOW CALCULATIONS

1. Irrigation use:

- a. System capacity; cfs = gpm / (gal per cfs) = (7 nozzles @ 50 psi) / 448.83
= 3.84 + (6 x 4.72) / 448.83 * = per Rainbird specifications
= 32.16 / 448.83
= 0.07 cfs.
- b. Maximum rate per acre; cfs = acres x (cfs/acre) = 1.8 x 0.03 = 0.05 cfs

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation.

$$V_{IR} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 1.8 \times 4.5 = 8.1 \text{ AF.}$$

$$V_{DR} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = 0.05 \times 246 \times 1.9835 = 24.4 \text{ AF.}$$

$$V = \text{Smaller of } V_{IR} \text{ and } V_{DR} = 8.1 \text{ AF.}$$

H. RECOMMENDATIONS

1. Recommended Amounts

Beneficial Use	Period of Use		Rate of Diversion Q (cfs)	Annual Volume V (afa)
	From	To		
Irrigation	3/15	11/15	0.05	8.1
	Totals:		0.05	8.1

2. Recommended Amendments

☐ Change P.D. as reflected above ☐ Add P.D. as reflected above ☒ None
☐ Change P.U. as reflected above ☐ Add P.U. as reflected above ☐ Other

Full Circle Impact Sprinklers

30 Series

NEW FOR 1975

New longer wearing, high performance,
TNT bearing on all model 30 series
sprinklers where TNT is specified.

30

3/4" male bearing, Standard or TNT. Cast bronze body and arm. Brass bearing sleeve, nipple, straight bore range nozzle and low angle spreader nozzle (7° or 20°). Stainless steel arm spring and bearing spring. Available on special order with nylon range nozzles and 3/32", 1/8", 5/32" spreader nozzles.

30 W

Same as 30 above except has brass plug instead of spreader nozzle. Single nozzle for lower precipitation rates.

30 WS

Same as 30 above except has a special cast body for single nozzle only. No provision for adding a spreader nozzle as in 30 W

PERFORMANCE FOR 30

Highest point of stream is 9' above nozzle.*

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 65-13659

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the WESTERN Regional Office in Boise at (208)334-2190.

Sincerely,

JULIE L. YARBROUGH
Senior Secretary

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 65-13659

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. Please be sure to thoroughly review the "CONDITIONS/REMARKS:" listing on the permit.

Enclosed is a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a licensed water right. Also enclosed is a form entitled "Proof of Beneficial Use". If your project is already completed, you should complete and submit this form immediately.

If a well has not already been constructed you are required to obtain a "drilling permit" from the department. The right to drill a well is not a part of this permit to appropriate water.

You should be aware that you are located within a drainage basin where surface water diversions are regulated by a watermaster. It is possible that diversion of groundwater under your permit may cause a reduction of surface water flow. Siting your well as far as possible from surface water channels and casing your well so that groundwater tributary to surface water flows are not diverted will reduce the potential for the watermaster to regulate your water use.

Sincerely,

A handwritten signature in cursive script that reads 'Shelley W. Keen'.
