OVERLAP & ADDITIONAL INFORMATION

The spring has already been developed and appears to be same as 65-03802 and/or 65-03944, although cannot be sure when research Payette Decree information/claims or SRBA information/claims.

Also, a spring for 65-12366 is listed in this QQ but that appears to refer to another spring, probably in north 1/2 of QQ per info from Steve Dobson (Olivers' partner in developing the subd.).

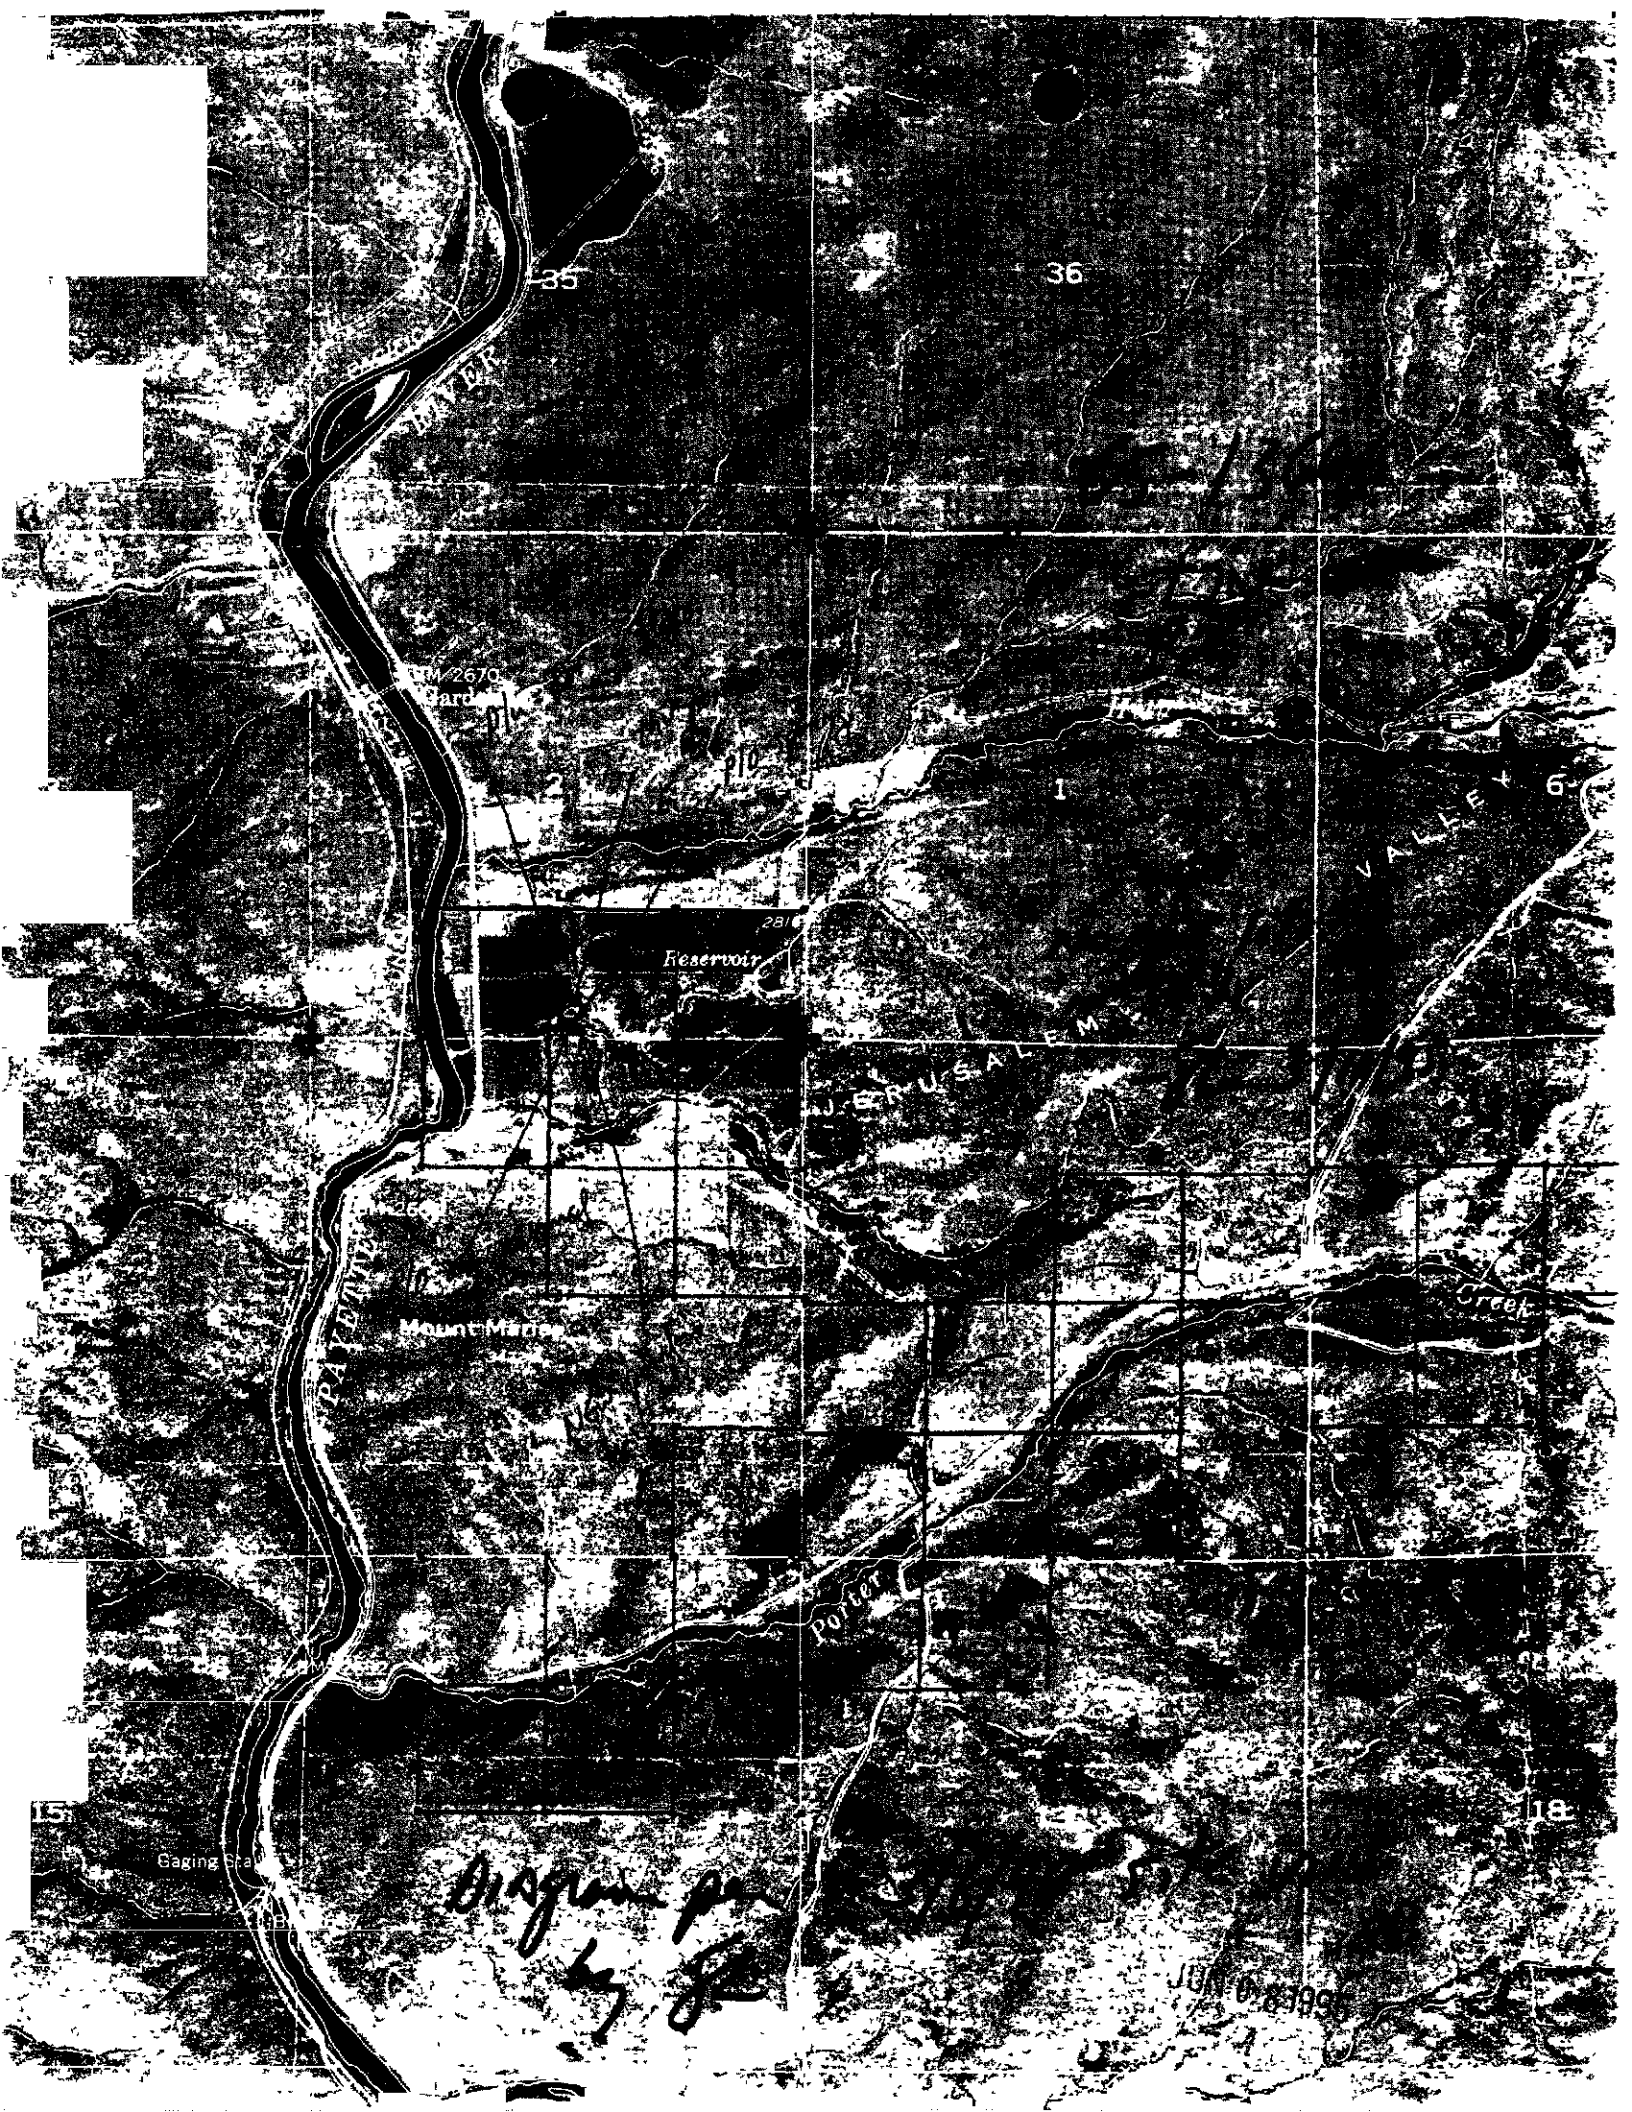

Steve D. also said that applicant might change this newly built pond so that stores off-stream instead of on-stream. This is an intermittent stream so SCA does not apply. (Steve D. delivered the application to Region on 3/14).

This application results from Leo Oliver's info at 3/6/95 Water District meeting for 65-B (Porter Creek). I visited the site after the meeting and findings are summarized in application diagram. Pond is about 100' x 70' x 7' and rounded volume to 1.5 to allow error margin. Pond is on-stream and pipe from spring provides water at north side of pond. Plans to pump from pond to acres. Land already irrigated by some combination of river, Hill Creek and/or Porter Creek.

Note season of use for irrigation shown to be same as Payette Decree although new season standard for legal is 3/15-11/15 but close to 4/15-10/15 boundary. Not sure how S.O. handling these discrepancies so went with Payette Decree standard.

Applicant requests maximum time frame to develop personal retirement acreage.

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 65-13606

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit.

While reviewing your proof of beneficial use, I noticed that you did not answer question number 7 regarding Measuring Device Requirements. Since I was unaware if you have installed a measuring device I checked your permit and found that according to the Conditions of Approval Nos. 4 and 5 of your permit, you are required to have a locking device installed. Please review your permit if you have any questions regarding those conditions, or call me at (208)327-7953.

The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water. Therefore, you should have the measuring device and controlling works installed before the department conducts the examination in order to meet the licensing requirements.

Be advised that Section 42-248, Idaho Code, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Forms to file a change of ownership of a water right and/or a change in the address of the water right owner are available from any department office.

If you have questions concerning the field examination, please contact the Western Regional Office of the department in Boise at (208) 334-2190.

Sincerely,

Deborah Drew-Ellis

RE: Permit No. 65-13606

Dear Permit Holder:

I have enclosed a copy of the approved request for extension of time submitted in connection with the above referenced permit, which extends the time within which to submit proof of beneficial use to **June 1, 2001**. Please note that the department granted the extension based on due diligence. It is important that you work diligently towards completion of this project since the department **will not** be able to grant additional extension requests based on due diligence.

Section 42-248, Idaho Code, which became effective on July 1, 1996, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Please contact this office or any regional office of the department for the proper form to file a change of ownership of a water right and/or a change in the address of the owner.

Please contact me at (208)327-7953, if you have any questions regarding this matter.

Sincerely,

JULIE L. YARBROUGH

Senior Secretary, Water Allocation Bureau

PROOF DUE NOTICE

RE: PERMIT NO. 65-13606

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before June 1, 1998.

(See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

JULIE L. YARBROUGH
Senior Secretary

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 65-13606

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. Please be sure to thoroughly review the "CONDITIONS/REMARKS:" listing on the permit.

As a permit owner you must commence the excavation or construction of the diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The date shown under condition no. 1 is the date when the project must be completed.

The Department will send you a "Proof Due Notice" approximately 60 days prior to the above referenced date requesting you to file either a Proof of Beneficial Use form or a Request for Extension of Time form.

Be sure to note the special condition requiring you to install a lockable device that will provide the watermaster control on your diversion.

Sincerely,

Shelley W. Keen
Water Rights Supervisor
