2. Measurements: Measured with Pigmy meter:

Willow Creek, $Q = 0.96 = 1.0$ cfs

Side Stream, $Q = 1.5$ cfs

E. NARRATIVE/REMARKS/COMMENTS

1. Three ponds were constructed to benefit wildlife and to improve water quality in Cascade Reservoir by trapping sediments and cattle wastes. Two ponds are on Willow Creek, and the third is on an adjacent side stream.

2. The ponds were constructed by placing 3 large logs in the channel - for each dam - and sealing them with an impervious fabric on the upstream side. The log barriers serve to create a detention pond as the reservoir drops, but are submerged at full pool.

3. Inflow measurements were done with a Pigmy Meter - however, this was done at a time of low flow and the inflow would be greater in the spring and early summer.

Have conditions of permit approval been met? ☒ yes ☐ no

F. FLOW CALCULATIONS

Additional Computation Sheets Attached

Measured Method: With Pigmy Meter: @ Low Flow

1) Willow Creek - Av. Velocity = 0.8 fps, channel was 0.6' x 2.0'
 $Q = (0.8 \text{ fps})(0.6')(2.0') = 0.96, \underline{1.0 \text{ cfs}}$

2) Side Stream - Av. Velocity = 0.9 fps, channel was 7 1/2" x 31"

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$Q = (0.9 \text{ fps}) \left(\frac{7.5}{12} \right) \left(\frac{31}{12} \right) = 1.45 \text{ cfs}$$

$$= \underline{1.5 \text{ cfs}}$$

$$V_{LR} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) =$$

$$V_{D,R} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = \underline{\text{Allow for higher diversion}}$$

$$V = \text{Smaller of } V_{LR} \text{ and } V_{D,R} = \underline{\text{as shown in permit.}}$$

2. Volume Calculations for Other Uses: Ponds: Wildlife + Water Quality

$$\text{Pond ①: Vol.} = (5')(12')(150') \left(\frac{AF}{(66)(66)(10)} \right) = \underline{0.2 AF}$$

$$\text{Pond ②: Vol.} = (5')(20')(210') \left(\frac{AF}{(66)(66)(10)} \right) = \underline{0.5 AF}$$

$$\text{Pond ③: Vol.} = (5')(20')(175') \left(\frac{AF}{(66)(66)(10)} \right) = \underline{0.4 AF}$$

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before March 1, 1997.

(See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

RE: Application 65-13575

=====

I am concerned that approval of this application with the instream flow components for wildlife and water quality improvement purposes will create a de facto minimum instream flow. With that concern in mind, I suggest applying the following condition on any permit issued for this application.

Remark # 2: Instream use of water under this right for wildlife and water quality improvement purposes is subordinated to future diversion of water either upstream or downstream for irrigation or other consumptive beneficial uses.
