State of Idaho
Department of Water Resources
Permit To Appropriate Water

NO. 65-13538

Proposed Priority: June 30, 1994

Maximum Storage Volume:

15.0 AF

This is to certify, that **US DEPT OF INTERIOR**
BUREAU OF RECLAMATION
1150 N CURTIS RD
BOISE ID 83706-1234

has applied for a permit to appropriate water from:
UNNAMED STREAM tributary of **CASCADE RESERVOIR**

and a permit is **APPROVED** for development of water as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>ANNUAL VOLUME</u>
WILDLIFE STORAGE	01/01 to 12/31		15.0 AF

LOCATION OF POINT(S) OF DIVERSION:

SENW , Sec. 17, Township 15N, Range 03E
VALLEY County

PLACE OF USE: WILDLIFE STORAGE

TWN RGE SEC

15N 03E 17 SENW

CONDITIONS/REMARKS:

1. Proof of construction of works and application of water to beneficial use shall be submitted on or before April 1, 1997.
2. Subject to all prior water rights.
3. Project construction shall commence within one year from the date of permit issuance and shall proceed diligently to completion unless it can be shown to the satisfaction of the Director of the Department of Water Resources that delays were due to circumstances over which permit holder had no control.
4. Use of water under this right is subject to control by the watermaster of State Water District No. 65.
5. When water is not available to fill this right, the right holder shall cease diversion or shall rent water from the Payette River Rental Pool.
6. Place of use is locally known as Duck Creek North Wetland Site. Wildlife storage use is for a habitat pond.

This permit is issued pursuant to the provisions of Section 42-204, Idaho Code.
Witness the signature of the Director, affixed at Boise, this

Subject:

POND SIZE AND LOCATION

Pond dimensions = 4 acres X 4' average depth.

Pond is located in SENW Section 17.

Project name is Duck Creek North Wetland Site.

1. Name of applicant United States of America, Acting through the Regional Director, Phone 208-378-5322
Pacific Northwest Region, Bureau of Reclamation
Post office address 1150 North Curtis Road, Boise ID 83706-1234
2. Source of water supply unnamed stream which is a tributary of Cascade Reservoir
3. Location of point of diversion is _____ 1/4 of SE 1/4 of NW 1/4, Govt. Lot _____
Sec. 17 Township 15 N Range 3 E B.M. Valley County; additional
points of diversion if any: _____
4. Water will be used for the following purposes:
Amount 1 cfs for wildlife purposes from -1-1 to -12-31 (both dates inclusive)
(cfs or acre-feet per annum)
Amount 15 acre-feet per annum for wildlife storage purposes from 1-1 to 12-31 (both dates inclusive)
(cfs or acre-feet per annum)
Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per annum)
Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per annum)
5. Total quantity to be appropriated is (a) 1 and/or (b) 15
cubic feet per second acre feet per annum
6. Proposed diverting works:
a. Description of ditches, flumes, pumps, headgates, etc. Manual slide gates in dam
pond size 4 ac x 4' deep avg per Phil Gimp
b. Height of storage dam 5 feet; active reservoir capacity 15 acre-feet; total
reservoir capacity _____ acre-feet; period of year when water will be diverted to storage:
1-1 to 12-31 inclusive.
c. Proposed well diameter is _____ inches; proposed depth of well is _____ feet.
d. Is ground water with a temperature of greater than 85°F being sought? No
e. If well is already drilled, when? _____; Drilling firm _____
Well was drilled for (well owner) _____
7. Time required for the completion of the works and application of the water to the proposed beneficial use is
2 years (minimum 1 year). APP 1

APR 14 1965

8. Description of proposed uses (if irrigation only, go to item 9):
- Hydropower; show total of head and proposed capacity in KW. _____
 - Stockwatering; list number and kind of livestock. _____
 - Municipal; show name of municipality. _____
 - Domestic; show number of households. _____
 - Other; describe fully. Wildlife and wildlife storage uses are for a habitat pond for wildlife and large undulates - not to exceed 13,000 gpd

9. Description of place of use:
- If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
 - If water is used for other purposes, place a symbol of the use (example. *D* for Domestic) in the corresponding place of use below. See instructions for standard symbols.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of
Idaho No. _____, and said application is hereby _____.

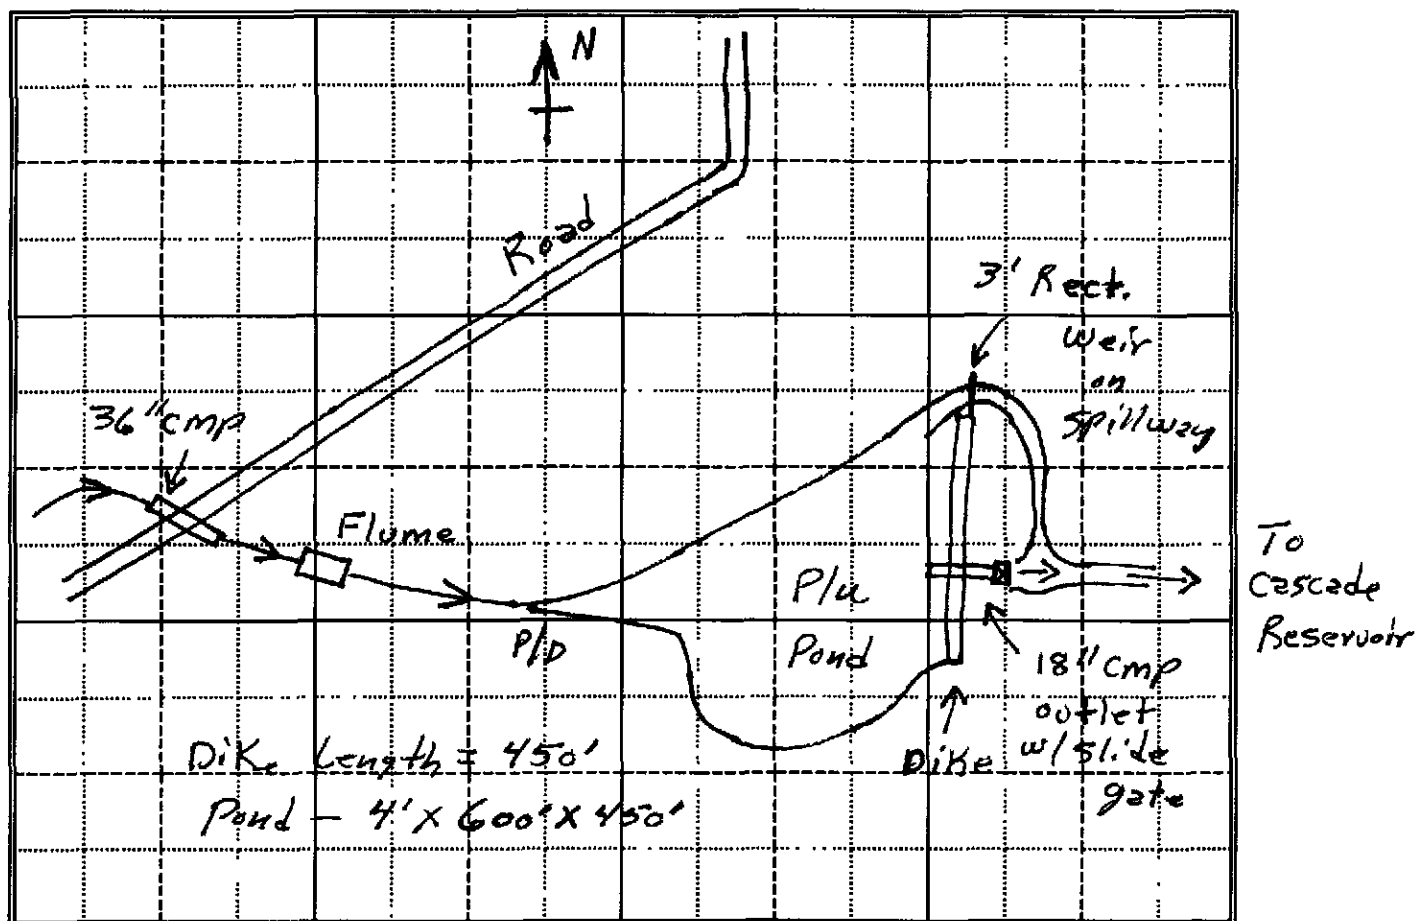

1. Approval of said application is subject to the following limitations and conditions:

- a. SUBJECT TO ALL PRIOR WATER RIGHTS.
- b. Proof of construction of works and application of water to beneficial use shall be submitted on or before
_____, 199 ____.
- c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights
for the same land shall not exceed 0.02 cubic feet per second for each acre of land.
- d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to
the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of
this permit and shall not give rise to any right or claim against any future rights to the use of water, other than
hydropower, within the State of Idaho initiated later in time than the priority of this permit.

D. FLOW MEASUREMENTS

1.

Measurement Equipment	Type	Make	Model No.	Serial No	Size	Calib. Date

2. Measurements: Low flow at time of exam:

Flume ; $Q = 0.5$ cfs

Rect. Weir, $Q = 0.57$ cfs
(Spillway)

(0.15' on staff gage)

18" CMP outlet pipe was closed.

E. NARRATIVE/REMARKS/COMMENTS

1. The wildlife pond is called Duck Creek North by the Bureau of Reclamation. The pond also serves to collect sediment and cattle waste, and improve the water quality of Cascade Reservoir.
2. The inflow to the pond is measured by a 36" wide adjustable flume. The flume is made by NU-Way Flume & Equipment Co. The sill height was set at 2", and the flume staff gage is calibrated to read directly in cfs. The flow was 0.5 cfs. The flume is located just downstream of the road culvert.
3. The spillway on the left side of the pond dike has a 3' contracted rectangular weir, and the outflow was 0.57 cfs - 0.15' staff gage reading.
4. The outlet gate on the 18" cnp was closed.
5. The outflow from the pond empties into Cascade Reservoir.

Have conditions of permit approval been met? ☒ yes ☐ no

F. FLOW CALCULATIONS

_____ Additional Computation Sheets Attached

Measured Method:

In flow, $Q = 0.5$ cfs
outflow, $Q = 0.57$ cfs

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$V_{IR} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) =$ _____

$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 =$ _____

$V = \text{Smaller of } V_{IR} \text{ and } V_{D.R.} =$ _____

2. Volume Calculations for Other Uses: Wildlife Storage,

$$\text{Vol. pond} = [(4') (600') (450')] \left[\frac{\text{AF}}{(66)(66)(10)} \right] = 24.8 \text{ AF}$$

Allow the 15.0 AF on Permit

H. RECOMMENDATIONS

1. Recommended Amounts

Beneficial Use	Period of Use		Rate of Diversion Q (cfs)	Annual Volume V (afa)

PROOF ACKNOWLEDGMENT LETTER

RE: Permit No. 65-13538

Dear Permit Holder:

The Department is in receipt of the proof of beneficial use statement and the \$125.00 license examination fee filed in connection with the above referenced water right permit.

This permit authorizes an annual storage volume of 15 acre feet. The license examination fee for a storage volume of 15 acre feet is \$50.00, therefore, I have initiated the process to refund the additional \$75.00 exam fee. The refund should arrive in seven (7) to ten (10) business days under separate cover.

Please be advised that Section 42-248, Idaho Code, which became affective on July 1, 1996, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Please contact any office of the department for the proper form to file a change of ownership of a water right and/or a change in the address of the owner. Failure to maintain current records with the department could result in the assessment of a monetary penalty.

The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water. If you have any questions concerning the field examination, contact the **WESTERN** Regional Office in Boise, at (208)334-2190.

Sincerely,

JULIE L. YARBROUGH
Senior Secretary

Subject: Proof of Beneficial Use for Permit No. 65-13538,
Unnamed Stream, Cascade Reservoir

Dear Ms. Yarbrough:

Enclosed is the Proof of Beneficial Use (Form No. 217) for the subject permit. I have also enclosed a check for \$125.00 for the examination. During development of our project as authorized by the subject permit, additional purposes of use have been identified. When you conduct the examination phase, please review the beneficial water use to be for water quality improvement and water quality improvement storage in addition to wildlife and wildlife storage purposes of use.

Sincerely,

Phillip E. Graf
Water Rights Officer

PROOF DUE NOTICE

RE: PERMIT NO. 65-13538

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before April 1, 1997.

(See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

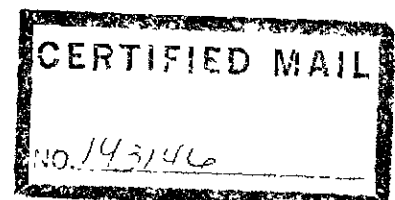

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

JULIE L. YARBROUGH
Senior Secretary

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. Please be sure to thoroughly review the "CONDITIONS/REMARKS:" listing on the permit.

As a permit owner you must commence the excavation or construction of the diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The date shown under condition no. 1 is the date when the project must be completed.

The Department will send you a "Proof Due Notice" approximately 60 days prior to the above referenced date requesting you to file either a Proof of Beneficial Use form or a Request for Extension of Time form.

Please note that a separate stream channel alteration permit must be obtained from the IDWR prior to any activity in the stream channel other than construction or maintenance of the diversion structure for your water right(s). Applications for stream channel alteration permits must be filed at least sixty days prior to the commencement of work in the stream.

Sincerely,

Shelley W. Keen
Water Rights Supervisor

MEMORANDUM

Date: March 27, 1995
From: Jim Johnson
To: Glen Saxton
Subject: Application for permit for in-stream wildlife flow

=====

This memo in follow up to our discussion concerning the BOR's attempt to file applications for in-stream wildlife flows.

The two attached applications identify 1.00 cfs wildlife flow and in-stream storage volumes. The applications do not identify specifically how the water for wildlife will be put to beneficial use. See item 8.e.

Cindy Zimmerman has talked to Phil Graf who indicated that no diversion of water from the streams are intended.

I don't believe we can approve an application which would have an affect of an in-stream appropriation, therefore, I would propose one of two actions.

Approve the application for Wildlife Storage volume only, or approve the application with subordination language to allow later in time consumptive or non consumptive uses. I recommend the first alternative.

FYI, BOR has filed one other application for wildlife and wildlife storage, along with other uses, in that approval we used a subordination condition. The file is attached for your reference.

*Per Glen's request we should remove
the wildlife flow.*

Jim.

COMMENTS TO APPLICATION FOR WATER RIGHT #65-13538 FROM THE SCPP

This permit does not relieve the applicant of the responsibility to obtain a separate permit from the U.S. Army Corps of Engineers if a permit is required. A copy of this permit has been provided to the Corps for their review.

The use of construction equipment below the mean high water mark shall be limited to rubber tired equipment and/or a track mounted backhoe with the provision that the track hoe shall be limited to forward and backward movement (no turning shall be allowed except on properly constructed work pads or with specific approval from the IDWR).

Stream bank vegetation shall be protected to the extent practicable during construction. Care shall be taken to select locations for ingress and egress from the stream that will minimize bank and riparian vegetation damage. Disturbed and eroded areas shall be revegetated with perennial shrubs, grasses, and forbs as recommended by Idaho Department of Fish and Game and/or the local office of the Soil Conservation Service, to reduce erosion, restore bank cover and habitat and inhibit the invasion of noxious weeds.

All vegetative debris and excavated material, shall be disposed of out of the stream channel where it cannot reenter the channel at high flows. All temporary structures, construction debris and litter from the construction and construction workers shall be removed from the site and disposed of properly.

All construction activities shall be conducted in such a manner as to minimize turbidity and other water quality impacts.

Fuel, oil, and other hazardous materials shall be stored, and equipment refueled, away from the stream to ensure that a spill cannot enter the stream channel.

All construction on the ponds and new channels must be completed prior to diverting water into the new channel. The water will then be slowly diverted into the new channel over a seven (7) day period allowing the sediments to settle out.
