TO: File 65-13480 / Donald Sabala
FROM: Brenda Chapman
DATE: November 22, 1995
RE: Recommendation Adjustment(s)

=====

The final licensing recommendations for Right 65-13480 are based on the information below:

Note: According to Idaho Code Sections 42-133 and 42-1501, the only two uses that can be approved within a "stream" without any diverting works are in-stream stockwatering and minimum stream flow rights. There is no diverting works or active flow from the spring. The spring bubbles up under a rock within the pond. Therefore, the active flow components of wildlife and aesthetic uses are not being recommended.

H. RECOMMENDATIONS

1. Recommended Amounts

Beneficial Use	Period of Use	Rate of Div	Annual Vol
Wildlife Stor	1-01 to 12-31		.5
Aesthetic Stor	1-01 to 12-31		.5

The examiner stated that when the flow was higher, the pond volume could conceivably reach the permitted .5 af.

E. NARRATIVE/REMARKS/COMMENTS

- Govt. lots 1 + 6 were found.
- Overlaps for P/D were different sources; overlaps for P/U were other land &/or other uses, overlap 65-13507 was the same property but will be used for washing down planters + outside area of house not for the pond.
- Use is for aesthetic + wildlife (birds, deer, ducks, + misc. animals).
- The system consists of one P/D located on or near T17N R2E S1 Lot 1 (SWNE) + Lot 6 (NWSENE). The spring feeds into the pond under the pond, so a physical measurement was able to be taken. The pond surface area equals .01 acre, with a capacity of .01 Af, + using Appendix X conversion factors for flow rate, calculated the flow to be .01 cfs. There is a direct flow through out + around the rocks out to the Payette River, North Fork.
