NOTICE OF AMENDMENT OF WATER RIGHT PERMIT

NO. 65-13476

Notice is hereby given that Permit No. 65-13476 in the name of City of McCall, Idaho, with a priority date of 8/20/1993 is recorded as follows:

SOURCE & POINT OF DIVERSION: Ground Water (excavated pond site) in NENE, S.10, T18N, R3E, Valley County.

AMOUNT & USE & PERIOD: 2.23 cfs and 25.0 acre feet (storage) for Municipal & Municipal Storage, from 1/1 to 12/31.

PLACE OF USE: Within city limits of McCall.

The permit owner now proposes to amend the permit by changing the Point of Diversion and Nature of Use as follows:

CORRECT THE RECORDED RIGHT: Originally filed for two ground water sites for excavated ponds in NENE & NWNE, S.10 but permit was issued in error for only NENE, S.10. Amendment will add second site in NWNE, S.10 as originally intended. Storage occurs at these two sites.

ADD DRILLED WELLS: Proposes to add existing well in NENW, S.10 and to drill a second well in NWNE, S.10. Water will be pumped to the two pond sites previously listed.

CHANGE NATURE OF USE: Proposes to add a use, Diversion to Storage at 2.23 cfs from 1/1 to 12/31, from two wells to two ponds. Total rate of flow in right will not increase from original 2.23 cfs (just redesigning use of water).

All in T18N, R3E.

The permit will be subject to all prior water rights. Any protest against the approval of the proposed amendment must be filed with the Department of Water Resources, Western Region, 2735 Airport Way, Boise, Idaho 83705, together with a protest fee of \$25.00 on or before August 8, 1994. The protestant must also send a copy of the protest to the applicant.

**ATTACHMENT
TO
APPLICATION FOR AMENDMENT OF A PERMIT**

**CITY OF McCALL
WATER RIGHT #65-13476
May 20, 1994**

Purpose of Amendment:

The Applicant proposes to divert groundwater from an existing well to supplement the groundwater storage ponds permitted under Water Right #65-13476. The need to supplement the shallow groundwater ponds arises from the slow recharge rate of the ponds.

plus new well to be drilled by pond site in NW 1/4 S10 7/6 7/7/94 info as noted. -JL

Proposed Change in Diversion Works:

The Applicant proposes to construct dedicated piping to divert groundwater from the existing well to the groundwater ponds. The well is therefore proposed as an additional point of diversion under Water Right #65-13476. The well is located at the NE 1/4, NW 1/4, Section 10, Township 18 North, Range 3 East, Boise Meridian.

Proposed Changes in Nature of Use:

The proposed diversion from the existing well to the groundwater ponds requires amendment of Water Right #65-13476 to include diversion to storage. The requested 2.23 cfs diversion to storage is equal to the permitted 2.23 cfs diversion from the ponds.

Land Ownership:

The land at the existing well is owned by the City of McCall. The land at the permitted storage ponds is owned by Spring Mountain Ranch Limited Partnership and will be deeded to the City of McCall upon completion of the diversion works proposed in Water Right #65-13476.

Effect on the Water Right Appurtenant to the Existing Well:

The existing well is currently permitted under Water Right #65-13119 for irrigation of 8 acres of golf course practice range. The Applicant proposes to detach the well from its current irrigation network and divert directly from the well to the storage ponds. Irrigation of the practice range will be restored by connecting the practice range irrigation network to the irrigation system that will divert water out of the ponds.

CONDITIONS/REMARKS:

1. Proof of construction of works and application of water to beneficial use shall be submitted on or before October 1, 1996.
2. Subject to all prior water rights.
3. Project construction shall commence within one year from the date of permit issuance and shall proceed diligently to completion unless it can be shown to the satisfaction of the Director of the Department of Water Resources that delays were due to circumstances over which permit holder had no control.
4. Prior to the diversion of water under this right a flow measurement port or other device as specified by the Department shall be installed to provide for the installation of measuring equipment and the determination of the rate of diversion by the Department.
5. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
6. A well drilled pursuant to this permit must be located at least 500 feet from any existing well. Well spacing closer than 500 feet must be approved by the Department of Water Resources.
7. Construction of the well must comply with Idaho well construction standards.
8. The issuance of this right in no way grants any right-of-way or easement across the land of another.
9. Place of use within the city limits of McCall.
10. The domestic use authorized under this permit shall not exceed 13,000 gallons per day per dwelling in accordance with Section 42-111, Idaho Code.

Item 6a. Description of Proposed Diverting Works

The proposed diverting works includes an excavated groundwater source with an intake structure and pump station.

Groundwater will be captured by excavating two ponds, one at each of the two points of diversion listed in Item #3 above. At present, it is anticipated that groundwater will be diverted for beneficial use from only one of the ponds, pending final siting and design of the ponds and the amount of groundwater captured within each pond. For this Application, however, the total volume of both ponds is requested as "municipal storage" in Item #4 above in the event that both ponds are required to capture sufficient volume for the proposed municipal use.

The pump intake structure will reside in one of the ponds and will consist of a screened, perforated corrugated metal pipe with an approximate diameter of 20 inches. The ponds will be linked with a culvert if storage in both ponds is required to accommodate the proposed diversion rate.

The pump is presently anticipated to be of centrifugal design with an approximate horsepower of 75 hp. Appropriate isolation and pump control valving will be installed on the pump face piping.

The proposed municipal uses include:

- a) irrigation of a proposed 9-hole addition to the municipal golf course,
- b) filling of additional aesthetic ponds associated with the proposed 9-hole addition,
- c) recharge of wetland amenities associated with the proposed 9-hole addition,
- d) an emergency fire fighting supply for area development,
- e) an alternate domestic supply source, in conjunction with anticipated water treatment works, to supplement the present sole domestic supply from Payette Lake.

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 65-13476

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

Please be advised that Section 42-248, Idaho Code, which became affective on July 1, 1996, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Please contact any office of the department for the proper form to file a change of ownership of a water right and/or a change in the address of the owner. Failure to maintain current records with the department could result in the assessment of a monetary penalty.

If you have questions concerning the field examination, contact the **WESTERN** Regional Office in Boise, at (208)334-2190.

Sincerely,

JULIE L. YARBROUGH
Senior Secretary

PROOF DUE NOTICE

RE: PERMIT NO. 65-13476

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before October 1, 1996. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

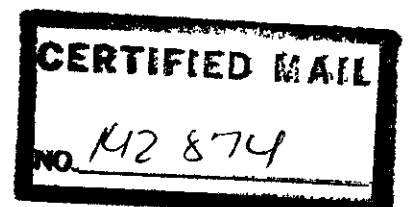

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

JULIE L. YARBROUGH
Senior Secretary

Conditions of Approval:

- 26A - Project construction shall commence within one year from the date of permit issuance and shall proceed diligently to completion unless it can be shown to the satisfaction of the Director of the Department of Water Resources that delays were due to circumstances over which permit holder had no control.
- 01G - Prior to the diversion of water under this right a flow measurement port or other device as specified by the Department shall be installed to provide for the installation of measuring equipment and the determination of the rate of diversion by the Department.
- 046 - Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
- 46A - A well drilled pursuant to this permit must be located at least 500 feet from any existing well. Well spacing closer than 500 feet must be approved by the Department of Water Resources.
- 46B - Construction of the well must comply with Idaho well construction standards.
- 004 - The issuance of this right in no way grants any right-of-way or easement across the land of another.

Remarks: Place of use within the city limits of McCall and the surrounding area served by the city of McCall.
The domestic use authorized under this permit shall not exceed 13,000 gallons per day per dwelling in accordance with Section 42-111, Idaho Code.

Comments: Date: 10/05/1993 User-ID: ZIMMERMA Subject: DIVERSION DESCRIPTION
Groundwater to 2 excavated ponds, pumped to p/u.

Date: 09/20/1994 User-ID: CZIMMERM Subject: AMENDMENT OF PERMIT
This permit has been amended to add a point of diversion (well)
located within NENW, S10, T18N, R03W; and to add uses Diversion
to Storage at 2.23 cfs and Municipal from Storage at 25.0 AF.
The two ponds are identified as Municipal Storage at 25.0 AF.
The file does not contain sufficient information to determine
if the depth of the two excavated ponds is below subsurface water
level and therefore are a source of water. The file does clearly
identify that the two wells will be diverted to the ponds, then
the water will be diverted to municipal use.

MEMORANDUM

DATE: September 20, 1994
TO: File 65-13476
FROM: Cindy Zimmerman
SUBJECT: Review of Amendment

=====

During the review of the amendment on this permit, I noted that 'Municipal from Storage' component was not on the original permit. This use is appropriate for this permit and has been added to the amendment. Also, the place of use description has been modified to reflect new departmental policy on describing municipal place of use.

TOOTHMAN-ORTON ENGINEERING COMPANY

MEMORANDUM

TO: JIM FRONK, McCALL OFFICE

FROM: STEVE HOLT, BOISE OFFICE

DATE: 7/29/94

RE: NEW WELL ON GOLF COURSE

This Memo confirms our discussion of 7/29/94 with Rick Orton regarding testing and development of the new well.

The pending water right amendment proposes that the well be used for a variety of uses, including irrigation, recharge of wetland amenities, emergency fire fighting and an alternate domestic supply source. The latter use generally requires extensive testing to characterize the well and its aquifer. We should begin immediately with hydraulic testing and follow up with water quality tests.

The following are general guidelines to be followed during testing. I will provide a copy of the Valhvois well test as an example.

- **DEVELOP WELL** Allow approximately 24 hours to air-lift or pump the well up to its maximum yield. Refer to Mr. Gestrin to confirm the development technique and any modification to the suggested time period. Monitor static water surface after development to allow recovery before proceeding with additional tests.
- **STEP-TEST WELL** Pump well at increments of 25 gpm or so for approximately 1-2 hours at each flowrate. Monitor the time, flow, water level, sand content and temperature at each interval. Monitor water level in the nearby practice range well, if possible. Conduct step-test up to maximum yield.
- **EXTENDED PUMP TEST** Conduct an extended pump test at or near the maximum yield for at least 24 hours. Monitor the flowrate and drawdown to achieve a steady state condition if possible.

Keep us informed of your test results so that we may modify or repeat individual tests as necessary. I am sure you recognize the need to control drainage during these tests: the existing nearby pond and ditch network is ideal for this purpose.

You are also aware that we cannot legally use the water until the pending water right amendment is approved.

OCT 31 1994

NOTICE OF AMENDMENT
OF WATER RIGHT PERMIT
NO. 65-13476

Notice is hereby given that Permit No. 65-13476 in the name of City of McCall, Idaho, with a priority date of 8/20/1993 is recorded as follows:

SOURCE & POINT OF DIVERSION: Ground Water (excavated pond site) in NENE, S.10, T18N, R3E, Valley County.

AMOUNT & USE & PERIOD: 2.23 cfs and 25.0 acre feet (storage) for Municipal & Municipal Storage, from 1/1 to 12/31.

PLACE OF USE: Within city limits of McCall.

The permit owner now proposes to amend the permit by changing the Point of Diversion and Nature of Use as follows:

CORRECT THE RECORDED RIGHT: Originally filed for two ground water sites for excavated ponds in NENE & NWNE, S.10 but permit was issued in error for only NENE, S.10. Amendment will add second site in NWNE, S.10 as originally intended. Storage occurs at these two sites.

ADD DRILLED WELLS: Proposes to add existing well in NENW, S.10 and to drill a second well in NWNE, S.10. Water will be pumped to the two pond sites previously listed.

CHANGE NATURE OF USE: Proposes to add a use, Diversion to Storage at 2.23 cfs from 1/1 to 12/31, from two wells to two ponds. Total rate of flow in right will not increase from original 2.23 cfs (just redescribing use of water).

All in T18N, R3E.

The permit will be subject to all prior water rights. Any protest against the approval of the proposed amendment must be filed with the Department of Water Resources, Western Region, 2735 Airport Way, Boise, Idaho 83705, together with a protest fee of \$25.00 on or before August 8, 1994. The protestant must also send a copy of the protest to the applicant.

R. Keith Higginson
Director

McCALL, IDAHO 83638

July 7, 1994

Mr. Steve Lester
Senior Water Resource Agent
Idaho Department of Water Resources
2735 Airport Way
Boise, ID 83705

Via Fax Mail

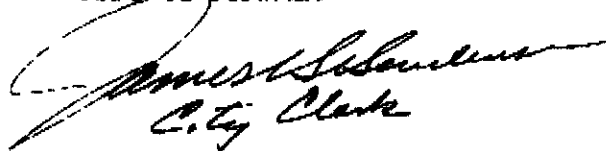

Dear Mr. Lester:

By this fax transmission, I am authorizing a change in the "Application for Amendment of a Permit" filed with your office on June 3, 1994. The amendment was filed in regards to the Permit to Appropriate the Public Waters of the State of Idaho No. 65-13476.

The change consists of adding a point of diversion at the NW $\frac{1}{4}$ of the NE $\frac{1}{4}$, Section 10, T.18 N., R.3 E., B.M., Valley County. The additional diversion will be a drilled well.

Sincerely,

CITY OF McCALL

City Clerk

RE:

① Need to drill another well by one of 2 ponds covered in permit.

② Think well will be in NWNE S10 by westerly pond & pump station.

③ Told him & apparent dept. error in original permit: Appl. 65-13476 2 P/D, 1 in NENE & 1 in NWNE.

: advertised as only NENE, nothing in S.D. or Region file to change from 2 P/D to 1 P/D.

: Permit issued with P/D NENE only.

④ Now: Correct p/d location NENE + NNE
add existing well NENW
add new well NWNE (?)
(to drill)⑤ NEED→ confirmation from City of McCall - written
OK prior to advertising prepared 7/13/94
- add 'tl. amendment fee needed?' ✓ & call
him back.Original Amendment not yet advertised so
no add 'tl. fee to revise it.

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 65-13476

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. Please be sure to thoroughly review the "CONDITIONS/REMARKS:" listing on the permit.

As a permit owner you must commence the excavation or construction of the diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The date shown under condition no. 1 is the date when the project must be completed. You will receive a "Proof Due Notice" from this Department approximately 60 days prior to the completion date requiring you to file either a Proof of Beneficial Use form stating that the project has been completed or file a Request for an Extension of Time in which to file the proof statement.

Be sure to note the special condition requiring you to install a measuring device. Enclosed, for your reference, is a list of measuring device options.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

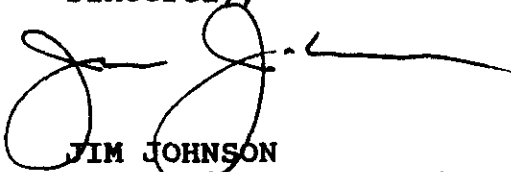

You should be aware that you are located within a drainage basin where surface water diversions are regulated by a watermaster. It is possible that diversion of groundwater under your permit may cause a reduction of surface water flow. Siting your well as far as possible from surface water channels and casing your well

RECEIVED
OCT 25 1993

OCT 25 1993

so that groundwater tributary to surface water flows are not diverted will reduce the potential for the watermaster to regulate your water use.

Sincerely,

A handwritten signature in black ink, appearing to be 'Jim Johnson', with a long horizontal stroke extending to the right.

JIM JOHNSON
Water Rights Supervisor
