ADDITIONAL INFO, OVERLAPPING RIGHTS

This lake was developed in the mid-1980's. The existing irrig. rights on applicant's property (under 65-2946, 7052, 7576, 7653 and 12136) are no longer being used and ceased at approximately the same time that the lake was developed. There is a chance that an accomplished transfer of those rights could be claimed in SRBA; this right will act as a back-up right in the interim. See adjudication splits on first 4 rights in applicant's name for more info.

SYSTEM DESCRIPTION: Duffner creek diverted at Hait Reservoir in Section 2. Conveyance to lake is through existing irrigation canal used for prior developments. Canal also known as Hait Creek. (HAIT not to be confused with applicant HAID - different parties). Springs arise on applicant's property and flow into canal for conveyance to lake. All overflow tributary to Payette River, North Fork.

NOTE: This claim was not mentioned in the listing of rights that Mr. Weaver gave to Mr. Haid. However, this claim does include lands now owned by Mr. Haid. This claim also includes a stockwater use which I have split. The license was issued for watering 500 head of cattle on the entire irrigated place of use. I found that L. B. is the owner of 98% of this right and Mr. Haid owns 2%, so the stockwater use was split based on ownership.

There was never a SRBA Claim submitted for Right 65-12136 which was included in the listing of rights that Mr. Weaver gave to Mr. Haid. Therefore, I have not done anything in regard to this right.

INSTRUCTIONS

This form has been prepared to assist new owners of property to comply with the requirements of Sections 42-248 and 42-1409(6), Idaho Code. Section 42-248 requires certain property holders to notify the Department of Water Resources (IDWR) of any change in mailing address or ownership of all or part of a water right record on file with IDWR. Section 42-1409(6) provides that new property owners must notify IDWR of any change in ownership of a water right during an adjudication of water rights, and, if a required claim for the water right has not been filed, to file the needed claim.

Separate brochures are available from IDWR describing the adjudication of water rights and the requirement to notify IDWR of changes in ownership. If you would like any of these brochures, or if you have questions about completing this form, please contact your nearest IDWR office or call 1-800-451-4129.

If you need additional space to describe or explain any of the items on the form, please attach additional sheets to the form as you may require.

1. If there are water rights associated with the property, the seller should be able to provide you with the water right or adjudication claim number(s). Please enter these number(s) at Item 1. If you or the seller believe there are water rights for the property but the numbers are unknown, you may wish to call IDWR or come into an office of IDWR for assistance in identifying the water rights for the property in question. If claims for the rights are required, and have not been filed, IDWR will so advise you.
2. The information described at Item 2 is required, since IDWR cannot process the requested change without documentation of ownership. The preferred types of documentation are shown; contact IDWR if you have difficulty obtaining this information. Do not obtain a new survey for purposes of this form before contacting IDWR.
3. Please provide the name and address of the former owner of the water right and/or adjudication claim at Item 3.
4. The name, mailing address, and telephone number of the new owner(s) is entered at Item 4. Please indicate the relationship between multiple owners by using the connector "and", "or" or "and/or". If an "and" is used, all parties must sign this form. If an "and/or" or "or" is used, all parties may sign, however only one of the named parties is required to sign.
5. At Item 5, please provide the date the property in question was acquired. This may be the date of "closing" in the case of a real estate transaction or the date of court order for other types of ownership changes.
6. If the property you have purchased is only a portion of the property owned by the former owner/seller, you may be purchasing only a portion of the total water right held by the seller. This means the water right held by the seller may be "split" to provide your share of the right in question. Be sure to include a description of the portion of the water right you have purchased at Item 6.

Please provide as much detail as possible concerning your water right: include the number of homes, irrigated acreage if more than 1/2 acre is irrigated, type and number of stock if your right is for stockwater, etc. In the absence of information to the contrary, IDWR will assume the intent is to split the rights *proportionately*.

7. The new owner(s) must sign the form in the space(s) provided at Item 7. Corporations and other organizations must submit a list of directors or officers demonstrating the authority of the director or officer to sign the form.
8. There is no filing fee. When complete, you should retain a copy and return the original of the form to the IDWR office nearest you:

RE: Permit No. 65-13463

Dear Mr. & Mrs. Thompson:

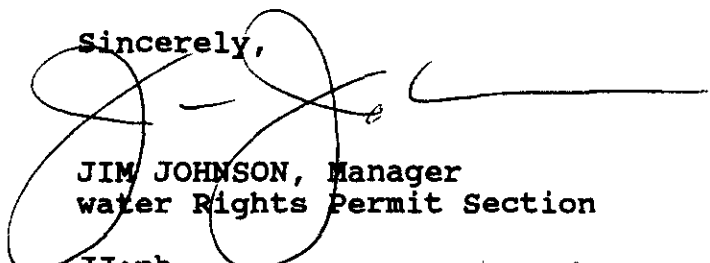

I recently received a Notice of Change of Water Right Ownership form on the above referenced permit changing ownership of the permit to you.

In Idaho, a water permit is considered **personal** property and can only be **assigned** by the owner of record, if it is not specifically identified in the warranty deed. Our records identify Charles M. Haid III as owner of the permit. I have enclosed an Assignment of Permit form that you will need the original owner to sign and have it notarized giving you the water rights.

As noted on the form, an assignment of a permit must be accompanied by a \$25.00 filing fee. Please note that new legislation beginning July 1, 1996, requires water right owners to report any change of water right ownership and any change of mailing address to the department. Failure to report these changes could result in a \$100 late filing fee. Please submit the assignment with the filing fee to my attention at the above address.

If you have any questions, please let me know.

Sincerely,

JIM JOHNSON, Manager
Water Rights Permit Section

RE: Permit No. 65-13463

Dear Mr. & Mrs. Thompson:

I recently received an 'Assignment of Permit' form on the above referenced permit assigning the permit to you.

In Idaho, a permit is considered personal property and the assignment form must be signed by the owner of record, Charles Haid III. The assignment submitted was not signed and, therefore, is not acceptable.

As of July 1, 1994, the assignment of a permit must be accompanied by a \$25.00 filing fee. Assignments of permits are not acceptable without filing fees.

I am returning the assignment to you. Please resubmit the signed assignment with the filing fee to my attention at the above address.

If you have any questions, please feel free to contact me directly at (208) 327-7944.

Sincerely,

Cindy Zimmerman
Water Resource Agent

co-extensive with the lands being purchased.

- (4) The lands being purchased are subject to a certain right appurtenant to abutting lands owned by others. An 80 acre parcel on the southerly boundary of the premises, presently owned by Ralph *(now Charles) Haid* Weaver, et ux, enjoys diversion rights originating in the NW 1/4 Section 1, T17N, R2E, B.M.; in conjunction with the natural outflow of Halt Reservoir. To the extent water is available at the diversion point, being an adjustable head gate within the NW 1/4 of said Section 1, a flow is to be maintained into the Southwesterly Irrigation ditch originating at such headgate and crossing into the Weaver property in Section 12 (and eventually Section 13), for the purpose of maintaining the level of an artificial impoundment (of less than 50 acre feet) on the Weaver property. The maintenance of this flow is by adjustment of the headgate at the point of diversion as is necessary to maintain the level of the Weaver impoundment. The servient owner is not obligated to guarantee the availability of water at the diversion point; however, they are obligated to divert what water is available, rather than allow it to flow in the Southeasterly ditch from the diversion point to the Payette River, when it is needed for maintaining the level of the Weaver impoundment. Weaver, or successor, is obligated to maintain the ditch from the point of diversion to his impoundment; the servient owner is under a duty not to impede that flow.

- b. Buyer acknowledges that he has received and reviewed the existing water rights, permits, and pending applications and deems them acceptable.
- c. Included in the purchase price set forth are all wells and ancillary equipment upon the premises, houses, outbuildings, fixtures, furnishings, and equipment, including but not limited to an International Scout, VIN#

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 65-13463

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. Please be sure to thoroughly review the "CONDITIONS/REMARKS:" listing on the permit.

As a permit owner you must commence the excavation or construction of the diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The date shown under condition no. 1 is the date when the project must be completed. You will receive a "Proof Due Notice" from this Department approximately 60 days prior to the completion date requiring you to file either a Proof of Beneficial Use form stating that the project has been completed or file a Request for an Extension of Time in which to file the proof statement.

Be sure to note the special condition requiring you to install a measuring device and lockable controlling works that will enable the watermaster to control the rate of diversion.

Sincerely,

JIM JOHNSON
