Lot 16, Block 1, Haw Creek Subdivision.

Can-Ada Well Drilling apparently drilled well March 4, 1992, but no well log found. Two wells drilled by Can-Ada in the same QR, SESW, so used an estimate between the two wells. Static Levels were 42' and 33'. Assumed a static level of 40'.

As per proof of B/U, a 1 h.p. pump is installed in well.

Since system capacity of 0.05 CFS is greater than the requested allocation of 0.04 CFS, therefore recommend licensing for 0.04 CFS for domestic use.

$$\text{Theoretical: } Q = \frac{(8.8)(0.7)(1)}{50 + (2.31 \times 40)} = \frac{6.16}{142.4} \approx 0.05 \text{ CFS}$$

Note: Dynamic Pumping Level as per office diagram and specifications. Used local wells to estimate static level. System pressure assumed as per pump size.

Re: Permit No. 65-13429

Dear Permit Holder:

In the department's review of the proof of beneficial use submitted in connection with the above referenced permit, the department was not able to locate a drilling permit which should have been applied for before the opening of your well began. We have also been unable to locate a well log which should have been submitted by your well driller 30 days after completion of the construction of your well.

If you have a drilling permit or a copy of the well log, please provide this office with a copy of each. If you do not have a copy of the well log, please contact your driller and ask that he submit a copy. In your return letter, please be sure to show the above referenced permit number on any documents. Also, please address any correspondence directly to me. Your response, with both forms attached, should be received within 30 days of the date of this mailing.

This information is needed before the department can proceed further with the examination of your system and the eventual issuance of a license of water right.

If you have any questions or if I can be of any further assistance, please feel free to contact me.

Sincerely,

Karen L. Gustafson
Secretary/Records Manager
