RE: Hunter Dam

D65-13257

Dear Mr. Fend:

Sometime ago, the Department received a small dam application for construction of the above referenced dam. The application was not processed immediately because there was some doubt whether or not the dam was large enough to be regulated by the Department. Recently, the dam was measured and the height was determined to be 19.8 feet, the reservoir area is 3.4 acres, and the reservoir capacity was estimated to be 27 acre-feet. Based on our survey, the dam is large enough to be regulated. Enclosed is an approved copy of the application.

As indicated, the Department estimated the storage capacity to be 27 ac-ft. The water right filed for the dam and reservoir is for only 8 ac-ft; therefore, you will need to file an additional water right for the difference, 19 ac-ft. Enclosed is an application form and instructions for filing a water right.

Inspection of the dam revealed it to be in satisfactory condition. In accordance with Title 42, Chapter 17 of the Idaho Code, the Department has issued the enclosed certificate authorizing storage. Prior to expiration of the certificate, the dam will be re-examined to evaluate its condition and the performance of maintenance. Routine maintenance should include removing large growth (trees, willows, brush, etc.) from the dam, eliminating rodents and other burrowing animals and filling in their burrows, and repairing eroded or settled areas on the embankment as necessary to maintain the integrity of the structure.

Should you have any questions, please contact me, phone 327-7952, or contact John Westra, phone 334-2190, in our Western Regional Office.

Sincerely,

A. Michael Stubblefield
